This outpost of the tropics — six pains or aching to the hips, running leagues south of the tropic of Cancer, and already in sight of the Southern Cross—is the commercially first part of the Pacific coast of Mexico, and the second of the whole republic. It is key to the Gulf of California—or Gulf of Cortes, for its discoverer; or Mar Bermejo, for the tinging of its waters by ferruginous rivers—and to an extensive interior of vast potentiality. It was port not only for Similou, but for Sonora, Chilmahus, Durango and even to Zacatecas, until the opening of ports.

The largest annie that was ever idlied on the American continent was that mentioned by Dr. Gardner in his book, "Travels in Mexico." The snake was dead when Dr. Gardner found it, and was lying in the forits of a tree with its body full of arrows, just as it had been left by the Indians who dispatched it. It was dragged into an opening by the aid of four horses, and was found to measure this process. The Largest American Serpent.
