

Lebanon Express.

H. Y. KIRKPATRICK,
Editor and Proprietor

Lebanon will have a bank.

Advertise in the EXPRESS. It will bring you good returns.

Lebanon's exhibits at the state fair and Portland exposition will be good.

A small stock well advertised will prove more profitable than a large stock not advertised.—Printers' Ink.

It may be better to be born lucky than rich. All the same, it's mighty unlucky not to be born rich.—Judge.

Many people want what many others want to get rid of. The means to satisfy both is printers' ink.—Printers' Ink.

The season is approaching when it may rain and it may not; but generally it may. But that is what makes our crops.

There are 964 women employed in the national and state banks of the United States, and no woman so employed has ever yet been found to be a defaulter.

A Chicago editor pays a handsome and deserved tribute to Oregon climate and woman by remarking that "every lady is beautiful, for her complexion is as clear as crystal and tinted like the rose. For the climate does it."

An Arkansas editor says: "We have mountains so high that you can tickle the feet of the free silver angels in heaven, and gorges so deep that you descend to their base and hand down ice to the goldbugs in—the infernal regions."

A. W. Bash, ex-collector of customs of Puget Sound, has returned from China with a lot of franchises and has gone east to raise money to build railroads in Li Hung Chang's domain. It is said that Li thought him the greatest of Americans, the image of General Grant, and secured for him valuable rights.

"Get out of debt and stay out," is what an eastern Oregon editor has been preaching to the readers of his paper for some time. With wheat at the present price, the Umatilla county farmer would vote this editor a golden crown and a free pass to heaven, if he would furnish the key to the problem of how to get out of debt. The farmer once out of debt will stay out. The dearly acquired experience of the past has more than the lesson; "stay out of debt." A person advocating a theory, an argument or a subject for the advance of mankind, is naturally supposed to be in a manner conversant with the question he is handling, and, consequently, is looked to for his solution of the problem which he has unraveled. The average farmer, when once out of debt, will stay out. But to get out—"aye, there's the rub!"—Athena Press.

The press association of the state of New York, in its recent annual convention, unanimously adopted resolutions rejoicing in every effort on the part of the different women's organizations to educate public sentiment in favor of a higher moral standard for the press, and pledging its influence and co-operation; also pledging co-operation with the National Editorial Association in the resolution adopted by that body last year in reference to the exclusion of immoral and questionable advertisements. May the wave come westward and southward and wash our secular press. It is claimed that the press follows in the wake of public opinion and caters to the public; in a sense this is true, but in a more important sense the press is responsible for the vitiated taste it endeavors to gratify. Let the good work go on until the press is thoroughly reeducated.

Our "new woman" has been again heard from. This time in a divorce court in Cincinnati. A few days ago one of the number sued for a divorce from her husband. He filed an answer. He says she is one of the "coming women." He has been compelled to don an old calico apron, wash the dishes, scrub the children, attend to their clothing and perform other acts of household druggery which custom has relegated to the sphere of lovely woman from time immemorial. Hoping that the court still entertains the old-fashioned idea as to man's proper relation to a domestic arrangement, Mr. Gravius humbly prays for authority to get away.

In a cemetery in the suburbs of Lowell, Mass., there are five headstones all alike except the inscriptions. The first one reads, "First wife of John Smith," and the second "Second wife," and so on until the fifth stone, which reads, "John Smith, at rest at last."

The people of the United States use, on an average, 12,000,000 postage stamps of all kinds every day, or a total of about 4,380,000,000 per annum.

Insure your property with Peterson & Andrews. They are agents for the Old Reliable, Home Mutual, New Zealand, Springfield of Massachusetts, Continental, and other good, reliable companies.

If you desire to purchase property at a bargain, call on M. A. Miller.

Albany, Oregon.

MAKING OLAY PIPES.

How and Where They Are Manufactured—An Interesting Process.
Charles W. Maxwell of Strawbridge, Miss., in conversation with a St. Louis Star-Buzz reporter said:
"It is popularly believed that all clay pipes are either made in Europe or from clay brought from the other hemisphere, but such is not the case, as a very large share of the clay pipes made in America are from clay found at and near Woodbridge, N. J. The clay comes by the carload and the first step toward preparing it for molding is to sufficiently dampen it with water to make it pliable. This is done by placing it in a tank, where it soaks for about twenty-four hours. It is then hammered with iron bars, thus ridding it of any lumps or dry chunks. Then the molding begins. The workman takes a lump of clay in each hand and by squeezing and rolling it molds the pieces into a rough stem about three times as large as the finished pipe stem, having a rough ball at its end. These rolls, as they are called, are piled on wooden trays, sixteen to each tray, after which they are dried, either by the sun or by artificial means, according to the weather. After having been dried, not to hardness but sufficiently to dispose of all superfluous dampness, the rolls are ready to have the stem drilled and the bowl formed. To drill the stem the workman holds a small iron rod the size of the stem holes, and with his left hand pulls the clay roll over the rod instead of shoring the rod through the stem. To do this the workman is guided solely by the sense of touch in his finger tips, and that sense is so accurate that the hole is invariably made correctly. The ball at the end of the roll is turned up, and then roll and rod are placed in an iron matrix which presses the pliable clay into the desired outside pattern. The matrix and its contents are placed in a hand press, and the workman, by pulling a lever, forms the hole of the pipe bowl. The molded pipe, still soft and pliable, then passes to the hands of the trimmer girls, who scrape off the superfluous clay, making the joints of the matrix. Then the pipes are placed in fire-proof clay sagger and the loaded sagger are placed in a large furnace. This furnace has eight flues at the bottom, and the six sheets of flame at the bottom concentrate at the top, thus making the heat even throughout. Until the pipes go into the furnace they are blue in color, but when they come out they are pure white."

BRAIN WORK AT NIGHT.

Unless It Is Imperative It Should Be Avoided.
To the imaginative young writer there is a fascination about the quietude of uninterrupted night work until much of the midnight has been done. If he has a fixed daily occupation, or is popular among his friends, the night offers the best chance for continued application by its quietness and peace. This very cessation of life's turmoil and the resulting feeling of ease should be accepted as nature's preparation for rest. Unless it is imperative night work should be avoided, says a writer in the Herald of Health. It must be imperative to the staff of morning papers, and the question thus assumes importance—of accomplishing the work with the least possible expenditure of vital force. While by working during the day persistently and deliberately an enormous amount of copy can be thrown off, that produced after midnight absorbs the best part of the writer's vitality.

When he should be in the prime of his faculties he is nervous, suffers from insomnia, and his overtaxed nervous system cannot rest, even in artificial slumber. The natural temptation is to apply the whip of stimulation to the jaded brain; but this is dangerous, and at the best only a transient and uncertain remedy. The imagination answers fitfully to this kind of forcing, the next day's critical judgment of the results almost certainly will be unfavorable, and the mental excitement thus induced will probably be extravagant. Try to contain the brain under such stress rather than to excite it.

SOMETHING ABOUT BLONDES.

An Observing Gotham Conductor Says They Are Careless About Their Hair.
She was a big, tall blonde, with square shoulders, a narrow waist, patent leather shoes and a swagger air that would have taken the train along by itself. She got in the car at Twenty-eighth street, got off at Fourteenth street, and between the two stations she picked up four hairpins from the cross seats of the car and hid them in her tuff-colored back hair. The big brakeman in charge of the car said to a New York Telegram Reporter while he stood near the platform: "Did you see the big blonde pick up the hairpins? Well, there are a great many women who do that same thing every day, and there are some of them that we know simply because they seem to find pleasure in taking odd hairpins and using them."
"Are there so many hairpins to be found on the elevated cars?" asked the reporter.
"Why, their name is legion," said Ned, "and most of them are to be found either early in the morning or late in the afternoon. It is peculiar how many of these same hairpins, which are found all over the car seats, are the gilt ones used by blondes. It is generally supposed that there are three brunettes to one blonde, yet it is a peculiar fact that we pick up more hairpins for the use of blondes in the elevated cars than we do black ones, and that is the reason that the lady who just got out of the car found so many hairpins that she could use."

Maximilian's Race.
Apropos of the recent train robberies an old story told on Maximilian is recalled: When Maximilian was emperor of Mexico he broke up train robberies by a trick. He disguised three hundred soldiers as peasant women and placed them on a train. A gang of bandits stopped the engine, when the three hundred disguised soldiers rose and fired a volley that killed one bandit and robbed the others. The bandits were not indicted.

Catarrh Cannot be Cured.
with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials, free.
