Two new applications for superintendent were received today. After the meeting, there was a lively controversy between Superintendent Reid and Director Gilbert, when Reid brought Gilbert to task for circulating reports Reid gave to the superintendent's character. Gilbert admitted that the report had been seen in various places, but Reid denied any man to produce evidence that he had ever been seen in a school or any where."

A Tramp Killed. (Albany Herald, April 17.) The south bound overland Southern Pacific train when leaving the station at Salem Thursday night killed a tramp on the trestle 250 feet south of the depot. The body was found by the men on a freight train which pulled in on the track a few minutes later. The deceased was a Saxon about 35 years old, weighed about 160 and had light hair and mustache. His right arm and left shoulder were broken, his right leg was cut off and his head crushed. The railroad men explained that he had evidently attempted to board the passenger train when it left the station, had slipped, missed his hold, and gone down under the wheels, being dragged a distance before falling out of the way of the train. This theory is supported by the fact that the man's hat was found about fifty feet north of the body and one shoe about thirty feet in the same direction, and by the fact that the loose earth between the main line and switch, recently put there by a workman, showed marks of a body having been dragged along. The body was dressed in dark pants and coat of cheap goods, but nearly new; the hat, while covered with dirt and mud, was also found to be nearly new, and the strong, verrievable lace shoes had been but little worn. In the dead man's pockets were found a number of articles, among them a dirty white handkerchief having a half dollar, four dimes and one nickel tied up in one of its corners, a package of smoking tobacco, a package of cigarette paper, a comb, a new spool of heavy, coarse thread, a small wheat-stalk, a pair of laborer's heavy wool mittens covered with leather (such as are used in cold regions by railroad and farm laborers), and an O. R. & N. Co's draw-back check good for 10 cents—showing that the holder had paid fare on that company's train, the amount paid being shown (by the punch marks) to be 10 cents. The draw-back check was issued by Conductor C. S. Carter, and bore no date, but had the appearance of being newly issued. The unfortunate man did not look like the ordinary tramp, but more like a laboring man, who was trying to get to some place where he expected to find work. Conductor Shan Omsler, who was in charge of the overland train which killed the stranger, was not apprised of the accident until he reached Albany, when he received a message from Conductor Nash, of the freight train, notifying him of the fact.

Tennessee Items. TENNESSEE, APRIL 18, 1897. John Swink has succeeded at last through the efforts of his neighbors and an allwise providence to have his farm plowed and sowed. Now he can look with pleasure upon the laboring farmers and laugh. Bah! Who said we should not have rain for seven—well there it goes, we only meant to say who predicted a clear day for Easter. We are not affected with superstitiousness, neither do we believe in perpetual motion. Oscar Davis embarked on a hazardous expedition last week. We are sorry to hear of his departure and hope he will soon return. We hope some wild beast of the forest will not take a fancy to him and devour the fair lad of Tennessee. The first attempt at Sunday school was very good. The beautiful sunshine which we didn't see and that Oregon mist, with which we are all acquainted, prevented an outpouring. But weather permitting we will have Sunday school in the future. It is the first chapter and first verse of the scriptures according to Aunt Sall, we find we will have a social at the school house next Saturday evening. Better all come. There will be fine songs and dialogues. A fine time is expected. The record has been broken for once. Listen to me. A family of a few succeeded in getting outside of fifty-four eggs in less time than it takes to describe it. Those concerned do not wish their names connected with this article for reasons we will leave to the public. THE BIX-TWISERS.

Another Populist Hold-up. Representative J. S. Smith, who figured conspicuously in the recent legislative hold-up, experienced a hold up of his own Monday. Recently Mr. Smith, together with several of the populist county officers, purchased of J. A. Finch, the Imprint, the populist paper of this city. It seems that all of the purchase price had not been paid, and yesterday at noon Mr. Finch, who had not turned over the bill of sale on the keys of the building, upon which he holds a lease until July, proceeded to take possession of the office. When Mr. Smith arrived he found the door locked. He kicked out the glass door and went in, and then trouble began. He threatened to throw Mr. Finch out, but the latter stood his ground, and it is said a big six shooter, while not brought into actual use, was a persuader against a physical encounter. Mr. Finch in the meantime has purchased a new plant and will soon start another populist paper. A general airing of some of the populist maneuvers behind the scenes may be looked for.—Herald.

A Warning. Tuesday evening while helping the trainmen do some switching at the depot, Harley Crandall caught his foot under a car wheel and had it badly mangled. This should be a warning to the boys who are in the habit of doing the switching for the trainmen, besides the parents of such boys should see that they keep away from the train. We are informed the trainmen are in the habit of making the boys believe that if they will do the work for them and learn the business they will get them a job. It is the case as it is reported these men should be reported to the superintendent, for if they are not stopped they will yet be the cause of some one being a cripple for life and possibly a charge upon the county. Possibly our city authorities could do something in the matter if they would. X. Y. Laxative Bromo Quinine Tablets move the bowels gently, relieves the cough, cures the feverish condition and headache, making it the best and quickest remedy for Coughs, Colds and LaGrippe. Maine people claim that there is a state of good men and good morals and the following statement would seem to favor this idea. The jury of twelve men (who are drawn and not selected) before whom the cases of the superior court are being tried, all are total abstainers but one, and he occasionally drinks cider. They all believe in prohibition except this one and he favors the Gothenburg system. Nine out of the twelve never use tobacco in any form. Science is forever providing us with fresh facts about alcohol. It has been shown that a stimulated nerve sets up an electric current of its own. Professor Waller has demonstrated the possibility of measuring the degree of stimulation by that current, and that the more a muscle is stimulated, the less is its electricity. A little tobacco smoke or a little alcohol are shown by him to stimulate the nerves slightly; a strong dose, especially of the latter, immediately ceases from exciting the nerve, and begins to stupefy it. The experience is old enough, but gauging it by the electricity set up in new.
