BEWARE OF THE HOUSE-FLY.

Flies are the most dangerous insects we have. They are much more dangerous than bees or hornets; these may sting you, and the sting is painful, but you soon get over the pain. Flies do much more harm than this. They walk over filthy places like sewers and garbage cans, and after eating the filthy food which they find there, they come into your house and walk over your food, carrying on their feet the tiny germs which live in filth just as you live in a house. These germs are not only filthy and disgusting, but many of them cause such diseases as typhoid fever, cholera infantum and summer complaint. When the flies bring them from some dirty place to your food or leave some of them on your food, they may crawl on your face or you may swallow these germs without knowing it and be taken with one of these diseases. Some that seems so harmless may do you much more harm than a bee or a hornet.

Your parents should place screens at their doors and windows during the warm weather, to keep the flies out of the house. If they cannot screen all the rooms, they should screen those in which food is kept; and if anyone is sick in the house, flies should be kept from the sick room, so that they may not carry germs from the sick person to the rest of the family.

Children may help to keep flies from swarming in and around houses, and from carrying germs of sickness from one person to another. In the first place, they should not buy candy, fruit or other food which is left in front of stores or anywhere else where flies may feed and walk on it. Flies lay their eggs chiefly in stable manure, and if this is left without screens or other covers to keep the flies away, great numbers will be hatched in every stable. If you know of stores where food is not covered from flies, or of stables that have swarms of them around, get your father or mother to write to the Board of Health about them, and the Board will make the store-keepers or stable-men obey its rules. But before you report other people for being careless and dirty and so making it possible for flies to become a nuisance, be sure that your own house is clean, and that no garbage-cans or boxes are left uncovered to attract flies.

"If you and all the people you know will follow this advice, there will not be nearly so many flies to plague you in hot weather, and there will not be nearly so much sickness and death, especially among children, as now."

J A Waters made a business trip to Heppner Wednesday returning Thursday.

COUNCIL PROCEEDINGS.

The City Council met in regular session, Tuesday evening, September 7th, there being a quorum present and Mayor Padberg in the chair.

Minutes of preceding meeting were approved. The only bill presented as approved by the Finance Committee was one for \$18.59 in favor of Zimmerman, Wells, Brown Company. Upon motion of Councilman Perkins the same was allowed.

Motion was made by Perkins and seconded by Balsiger that a committee of the Mayor, Treasurer and Engineer of the City inspect the boiler at the Power plant and see what can be done in regard to moving and placing a new base under it.

Motion to adjourn carried.
C J Pennington, Recorder.

ANOTHER KIND OF WEED.

The people of Ione have very thoroughly awakened the past three weeks to the danger to the city from the accumulation of the masses of weeds and, thanks to some energy, Second street to-day is the prettiest street in Eastern Oregon. There is only one place on it now and that is in front of the City Hall, but we understand that the Marshall, Uncle Tom Carle is going to see about that and if so, then it will soon be all right.

Around the Odd Fellows and the old Proclaimer building are a few yet that should be cleaned out.

But we have another kind of weed growing here that must be attended to or there will be a sad harvest some of these days. The lack of proper entertainment for young boys and girls that are growing up about us, is actuated by a weed of infection that must be eradicated.

Satan found, and will find, mischief for idle hands and while we can push the children off on the school teacher, that only covers half the ground. After school, and Saturday there should be something provided to instruct and yet entertaining.

The only instructive method of entertainment that has been offered this year to the children is Mr Engleman's show and we will say in all truthfulness and honor that the people owe Mr Engleman more than they know, for lifting a little of the veil of obscurity in which we live and showing the children pictures of great cities in active life, rivers, the oceans, men-of-war and in fact so much that we can not tell of it here, in such a taking and pleasing manner. But there are other things they need. A warm reading room and library, a place where they can swing dumb bells and play at trapeze work. They need literary societies and active ways of social life. And unless these things are provided, they, with childish imitations, will soon be satisfied only with a "Pastime". So for the sake of the little ones that Christ said of, "Inasmuch as ye do it unto me, the least of these, ye do it unto me", kill and destroy the weed of indifference and get busy.

Ione Proclaimer and Weekly Oregonian-\$2.

NOTICE FOR PUBLICATION.

(Serial No. 6537) Not Coal Land
Department of the Interior,
U. S. Land Office, The Dalles, Or.
Aug. 11th, 1909
