On Thursday at noon a jack rabbit ran up the main street of Ione and on to the hills. The men on the street looked at it and made comment but as no firearms were handy no shots were fired.

The foot of snow that we have had come to us the past ten days is now slowly melting and sinking into the ground. The value to the coming crops cannot be estimated but the farmers say it has been many years since the ground has received such a wetting at such an opportune time.

THE KNEEL OF THE WEED.

Long and earnestly have the experts of the Department of Agriculture been striving to find some means of eradicating the weed, other than by grubbing or pulling it up, and news comes from North Dakota that the fight has been won—at least over the wild mustard the Canada thistle, the dandelion and many other similar pest abominations of people who till the ground for a living.

Spraying the territory affected with a solution of iron sulphate when the weeds are young does the work. The chemical, which is corrosive, attacks the tender tissue of the rapidly growing weeds and destroys them while there is little or no injury to the grain, particularly if it is a winter grain or was sown early in the spring and has gained considerable growth before the spraying—American Farmer.

Very Likely.
"You're a queer looking thing to want to fight with me," said the young bulldog contemptuously. "You're not in my class."
"Perhaps not," replied the perspicacious quietly, "but I think I can give you a few points."—Philadelphia Press.

Mending Things Even.
Customer (to watchmaker) — I told you that my watch lost half an hour every day, and now that you've repaired it it gains half an hour.
Watchmaker — Well, don't complain. It's only working to catch-up lost time.

Judicious Charity.

"Yes. They all live at a comfortable distance and pay for their board."

A GOOD POSITION
can be had by ambitious young men and ladies in the field of "Wireless" or Railway telegraphy. Since the 8-hour law became effective, and since the Wireless companies are establishing stations thru-out the country, there is a great shortage of telegraphers. Positions pay beginners from \$70 to \$90 per month, with good chance for advancement.
The National Telegraph Institute of Portland, Oregon, operates six official institutes in America, under supervision of R. R. and Wireless Officials and places all graduates into positions. It will pay you to write them for full details.
