A Magnificent Bible

Paid-up subscribers to the Ione Journal bring this coupon to the office with 98 cents (which covers cost of packing, transportation from factory, checking, clerk hire and other expense items), and this Bible will be delivered to you. If the bible is to be mailed, send 15 cents extra for postage.

Name and address

Subscribers in arrears can get this Bible by sending \$1.50 in addition to above, it's worth the money, both for \$2.48

CITY MEAT MARKET

All Kinds of Fresh and Cured Meats
Fat Stock Wanted at all times

Holgate & Slater

Main St. Ione, Oregon

Tum-a-Lum Silo at the O-W. R. & N. Corn Show
Tum-a-Lum Silos are recommended above all patented stave silos for this climate by Washington State College, Oregon Agricultural College, and U. S. Dept. of Agriculture.

Tum-a-Lum Silos cost about half of high priced patented stave silos, because there is no patent, they're made of stock lumber. Tum-a-Lum Silos are built according to our Free Complete Plans. Tum-a-Lum Silos are furnished with all lumber, shingles, cement, hardware, nails, and paint.

Tum-a-Lum Lumber Co

See Cronk or Rood about it at their offices at Ione and Lexington, Oregon.

Seventh-day Adventist Denomination

During the meetings recently held in Ione by the Adventists, considerable interest was aroused relative to the work of the denomination, and in view of this I give a brief report for the readers of the Journal.

The Seventh-day Adventist church dates from 1844, when a few people began keeping the Sabbath through the study of the prophecies. Along with other truths they began proclaiming the Prophecies of Daniel and the Revelation, and Matt: 24. Year by year others were added to this number and the cause grew. Churches and local conferences were organized in different parts of the United States and in 1863 the denomination was organized into a general conference embracing the world. At that time there were 3500 members, 125 churches, 6 local conferences, 80 ministers, 1 publishing house, 2 papers, one monthly and one weekly, and the entire amount raised that year for Gospel work was \$8,000. The membership, laborers and funds have doubled every ten years for 50 years the gain was equal to that of the previous history of the denomination.

At the close of 1913 the membership was 122,886, ministers and gospel workers, 5,248; churches, 3,589; local conferences 126; union conferences, 25; missions, 100; Tithe paid during the year 1913, \$1,771,889.60; offerings, \$2,866,727.40, making a total for the year for gospel work, \$4,638,717.00; publishing houses, 37; periodicals, 128; bound books, 360; pamphlets, 325; tracts, 1290 in 80 languages. There are 2,100 persons in the field distributing this reading matter and the output of 1913 was \$1,869,714.40; schools in operation, 786; teachers, 1,511; enrollment, 27,379; young people societies, 954; membership, 24,580; sanitariums, 34; physicians, 110; employees in sanitariums, 1,727; number baptized during the year 1913, 12,794; missionaries sent out during the year, 157; from the schools 828 students entered the same line of work.

These schools, publishing houses, and sanitariums are located in all parts of the world, and the denomination is carrying on missionary work in practically every country. Over 1800 years ago there was revealed to John on the isle of Palinas the message recorded in Rev. 14:6-12 same time to be proclaimed to every nation,

kindred, and tongue and people. With this was to be the restoration of the true blue Sabbath see v. 12. The master declared in Matt. 24:14, that when this should be done the end would come. The time has come and the work is being done.

W. H. Thurston

IF COW "BALKS" MILK HER.

Resourceful Young Man Tries It and Breaks Blockade.

The best way to get rid of an obstinate cow that plants herself across the highway, and will not permit an automobile to pass is to stop and milk the cow, according to Carroll Horton of Okmooze, Okla., who is visiting his father, ex-Supreme Court Justice Horton, at Ithaca, N. Y.

Young Horton was a member of an automobile party speeding toward Newfield when the road was blocked near that village by a large Jersey cow which had sprawled across the road. The cow refused to heed either horn or claxonette, and not wishing to run into the ditch the automobile party stopped.

All efforts to get the Jersey out of the way failed until Horton alighted, called "Here honey, here honey," took off his Panama hat and proceeded to milk the cow. When he had finished the milking the cow agreeably walked off the road and the party proceeded with a beautiful supply of milk.

Blamed the Planets.

In the middle of the fourteenth century in Paris a new ordinance enjoining the cleansing of the streets and the shutting up of swine was carefully neglected, as usual, and a terrible plague was the consequence. The faculty of medicine, called upon for a remedy by the king, sent to inform him after long discussion that the plague was the result of a hostile conjunction of the planets Mars and Jupiter.

Salem, Or., May 19—If everyone in the state does not know that after May 22 number plates cannot be transferred from one motor vehicle to another motor vehicle the purchaser must notify the secretary of state and pay the statutory filing fee of \$1 for noting such transfer upon the records, and the further fact that no sale or transfer of a motor vehicle is valid unless the required transfer notice is given by the purchaser and the fee paid by him, it will not be fault of Secretary of State Olcott. The latter has addressed notices to newspapers, dealers in automobiles, county clerks, sheriffs, justices of the peace, constables, city auditors and recorders, chief of police and banks throughout the state calling attention to the changes in the law.

Mr. and Mrs. J. B. Sparks of Heppner, spent last Friday and Saturday visiting in Ione.

Clive Huston, of Eightmile, was an Ione visitor last week.

Wm. McMillan was an Ione visitor from Lexington last Friday.

Lum Mobley, hide buyer, was in Ione this week.

Poor Egg!

"Here's a Swiss named Egg who lives in New York petitioning to have his name changed."

"Sort of an egg shake, eh? What's the trouble?"

"He and his family have four children, and his family is constantly referred to as 'the half dozen Eggs.' He claims his yolk is too heavy to be borne."

"Why doesn't he lay for his tormentors?"

"It appears that he did once and got beaten, whipped to a froth. Poor Egg could barely scramble home."—Boston Transcript.

Conundrums.

Why is an absconding bank cashier like an air gun? Because he goes off loaded and makes no report.

What is that which you cannot hold ten minutes, although it is light as a feather? Your breath.

When is the worst weather for rats and mice? When it rains cats and dogs.

Why is I the luckiest of the vowels? Because it is the center of bliss.

Why does an onion resemble a ringing bell? Because peel follows peel in an onion and peel follows peel in a ringing bell.

A Queer Animal.

There is a queer animal in Central and South America which is so disguised that when hanging from the branch of a tree it looks for all the world like a part of the tree. It is called the sloth. Its feet are curved and armed with long, powerful, hook-like claws with which it hangs to the branches of trees, generally back downward. It has a green growth upon its back which makes it closely resemble the foliage of the trees. It feeds upon the leaves and fruits and seldom comes down to the ground.

Those who will not be ruled by the ruler must be ruled by the rock.—Cornish proverb.

HOW EFFECTIVELY TO PRESERVE THE BRIDE'S BOUQUET.

Many years ago it was quite the fashion to save a part of the bride's bouquet, press the flowers and arrange them carefully, frame and hang them on the wall. Later, when wax flowers were introduced, the entire bouquet was sometimes reproduced in wax and placed under a glass case.

The wax flowers were somewhat more natural looking than the dried ones, as they did not fade or lose their color, but it was necessary to use extreme care in moving either the frame of dried flowers or the case of wax ones, as they were easily broken.

The twentieth century has introduced a custom much more lovely than those of the past. If the bride's bouquet is of roses take several and plant them. If cut roses are used for decorations at the wedding or reception the petals might be saved to make a rose pillow for the bride.

One method of slipping roses is: Place the stems in water for a day or two; then plant in rather sandy soil. Place a glass jar over the little slip and press it down in the soil, so that it will be quite firm. This forms a miniature greenhouse for the slip.

If the weather is too cold to plant the slip out of doors plant it in a pot and keep it inside. Whether indoors or out, the glass should be kept over the slip until the plant grows too large for it.
