"You've GOT To Earn MORE"

It isn't a question alone of whether you want a better salary—it's a hard condition of life that you must face to protect yourself and those dependent upon you.

You can't stand still—if you don't want to go backward, you must go forward—that is, you've got to earn more.

Earning more means holding a better position—Independence, happiness, and a chance to provide for the future.

Thousands upon thousands who once held low, poorly paid positions now earn high salaries as a result of letting the INTERNATIONAL CORRESPONDENCE SCHOOLS show them how to accomplish the change. During last year about 4,000 students voluntarily reported increases in salary amounting to over two million dollars! Every month an average of 300 men voluntarily report to us advancement in position and earnings. Why not make YOUR start this month?

HOW TO DO IT

Simply mark on the coupon the position you wish to secure, then tear out and mail the coupon to the International Correspondence Schools. This puts you under no obligation whatever but allows our experts to adapt a Course to your individual needs and circumstances.

You've got to earn more money. The I. C. S. will help you. Will you take the start today?

International Correspondence Schools

Box 909, Scranton, Pa.

Please specify, without further obligation on my part, how I can qualify for the position, trade, or profession before which I have marked X.

Start factory making candies, chewing gums, crackerjack, orangeade, cider etc. Sells fast. Nearly all profit. \$15 course. \$100 circular free. Box 588 Lebanon, Ore. 33-35

The Green Sailor.
Mark Twain was once talking about a play that had failed.

"No wonder it failed," he said. "It's author was a greenhorn. He knew no more of stagecraft than young Tom Bowling knew of sailing when he shipped before the mast."
"Greenhorn Tom, you know, being told to go aloft one dark, wet night, started up the rigging with a lantern and an umbrella."

Horse Clipping Pays.
I am an advocate of horse clipping and am thoroughly convinced that a machine will, in the course of one season, pay for itself, says W. G. Nolan in Orange Judd Farmer. Eight head of work horses are kept on my farm, and they are clipped every spring. I find that by clipping more work, with no more exertion or feed, can be accomplished. Then horses that are clipped are less apt to contract colds, etc. If properly cared for. They will also be fresh and full of vigor, while the horse with a heavy coat will be dull, out of condition and seldom or never dry or clean. Aside from this, the general appearance of the horse is greatly improved.

Parasites in Pigs.
We have never yet seen a bunch of pigs ranging in age from eight weeks to three months that did not expel worms when treated with a good worm remedy, says the Iowa Homestead. This being the case, it surely is a sensible prevention to get rid of these pests when the pigs are young. Some swine breeders prefer the prepared worm remedies; others will use turpentine, and still others will resort to the use of antiseptics. In any event the essential and important thing is to get rid of the worms before the parasites have had an opportunity to undermine the constitution of the pigs.

We can materially benefit this town and our farming community if we begin right now to make it a year of protection and prosperity. It would be difficult to find one among us who could not in some manner increase the result of his labors during the coming year and with each one of us persevering to this end the year's profits would mount high in the financial column of local history. While considering our own individual interests we might dwell also upon those of the community in which we dwell, for what is of value to all of the people is of equal value to us.

But we can without detriment, or inconvenience, or expense at least remember that we are all neighbors and friends and brothers and so act one to the other, to the end that peace, harmony and happiness may be our lot for the coming year.

Notice for Publication

Department of the Interior, U. S. Land Office at The Dalles, Oregon, December 7th 1915.

Notice is hereby given that Hallick Stange, of Ione, Oregon, who on December 8th 1911, made Homestead Entry, No. 09737, for W 1/2 N 1/2 S E 1/4 N W 1/4 & S W 1/4 Sec 6-N E 1/4 N W 1/4 Section 7, Township 1-South, Range 24 East, Willamette Meridian, has filed notice of intention to make Final three year Proof, to establish claim to the land above described, before U. C. Patterson, U. S. Commissioner, at Heppner Oregon, on the 21th day of January 1916. Claimant names as witnesses: Samuel Dennis, Henry Dennis, John Johnson and D. H. Gabril, all of Ione, Oregon
H. Frank Woodcock,
Register

Saturn.
As a planet Saturn is some 700 times as large as our earth. This remarkable planet varies at different times in its distances from our earth, but the average of such distances is approximately 800,000,000 miles. Since Saturn is so much farther away from King Sol than we are and its progress over its solar orbit much slower this large planet's "year" or time of one revolution is about 10,759 days, our year being 365 1/4 days. There are other peculiar and interesting facts about Saturn, such as its ten moons and girdle of three rings. It is a beautiful planet and exhibits a bright, clear, nonsparkling, yellowish iridescent body.—New York Sun.

Poor Egg!
"Here's a Swiss named Egg who lives in New York petitioning to have his name changed."
"Sort of an egg shake, eh? What's the trouble?"
"He and his family have four children, and his family is constantly referred to as 'the half dozen Eggs.' He claims his yolk is too heavy to be borne."
"Why doesn't he lay for his tormentors?"
"It appears that he did once and got beaten, whipped to a froth. Poor Egg could barely scramble home."—Boston Transcript.

A Skyscraper Water Tank.
Skyscraper dimensions are generally associated with metropolitan office buildings, but on the Salmon river hydroelectric development in upper New York state a steel tank 206 feet tall has been built—an unprecedented height of a structure of this type. The tank will hold 1,400,000 gallons of water and its function is to act as a sort of safety valve by absorbing any sudden pressures, or surges as they are called, which might develop in the pipe line which feeds the turbines in the power house.—Engineering Record.

A Pretty Compliment.
The "three beautiful Miss Gunnings" were in their day—which was after the middle of the eighteenth century—such famous beauties that the London crowd often followed their carriages on the street and fairly mobbed any shop they were known to have entered in the effort to get a sight of them. The handsomest of the trio, worn out by the activities of the London season, stayed for a time in the country near a market town. It was known in the neighborhood that she wished to pass unnoticed and was not well, and her wish was respected. But on the day of her departure from the town there was an unusual number of people at hand to see the coach start. As the lovely lady stepped from the inn door to the step of the coach the brush of a climbing rose caught for a moment in her hair. Instantly a voice called from the crowd:
"No names, my lady, and no starting, but three cheers for the queen of beauty that the roses crowns of their mistress!"
They were given with a will and won the response of a radiant face at the coach window and a gracious hand waving farewell.

Too many of us are strangers to each other in this community, where we should all be brothers and dwell together in unity for the common good of all. And that is because there are entirely too many hard shells and fast cliques and sets with each immersed in its own shell and never a peep at the light of outer day. We need a common ground for meeting, where neighbor greets neighbor and the stranger finds himself at home and among friends. If cooperation is good in commercial affairs it would be of equal benefit in private and social life. It would afford us a intimate knowledge of humanity and a broader perspective, of life and the resultant spirit of good fellowship would be felt in a thousand ways. A year of "getting together" would stamp a wonderful imprint upon the heart, the soul and the conscience of this community.

RECIPE FOR GRAY HAIR.

To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and 1/4 oz. of glycerine. Apply to the hair twice a week until it becomes the desired shade. Any druggist can put this up or you can mix it at home at very little cost. Full directions for making and use come in each box of Barbo Compound. It will gradually darken streaked, faded gray hair, and remove dandruff. It is excellent for falling hair and will make harsh hair soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off.

German Cleanings.

There are 30,500,000 young trees in the German forest nurseries.

In Germany the production of swine has increased threefold within forty years.

Baskets are used a great deal by the German army for carrying shells and cartridges.

A city radium commission was recently established in Berlin. The city has appropriated \$60,000 to buy radium and maintain the commission.

Household Helps.

Fasten a rubber tube a yard long to your bathroom faucet if you would have a noiseless bath.

If moths are in a carpet spread a damp towel over the part and iron it dry with a hot iron. The heat and steam will kill the worms and eggs.

When spots made by careless painting cling to the window panes they should not be scraped off with a knife, but hot vinegar on a soft cloth will remove them easily.

Increase of Motor Trucks.

Motor truck traffic growth in New York state is shown in some surprising figures recently issued by the office of the secretary of state. The total registrations of commercial trucks for 1912 was 9,806 and that for 1913 was 43,750, whereas for the three months of February, March and April of 1914 13,807 trucks were registered. Of this total 8,833 were credited to New York city, 3,524 representing new cars. More than 120,000 motor vehicles of all kinds have been registered.—Engineering Record.

Cement to Mend Broken Dishes.

An excellent cement for broken dishes, glassware and, for emergency, in mending a broken eyeglass is made of thick shellac. Carefully coat the broken edges with the shellac and then heat the article as much as it will stand to dry the shellac thoroughly. Broken dishes put together with this cement will hold indefinitely, as the shellac will not absorb moisture.

Remembered One.

At a medical college a class was being examined in anatomy, and one student was asked, "What muscles have their origin in the popliteal space?"
"Well," said the bright student, "there's that one with the darned long name, and I don't remember the other two."—Boston Transcript.

Saving Grace.

"Pa, what is meant by the saving grace of humor?"
"It means quite often, my son, that when a rascal gets -nught in some sort of dilemma he can escape punishment by making a joke out of it."—Birmingham Age Herald.

She! If the Past detains you,
Her sunshine and storms forget;
No chains so unworthy to hold you
As those of a vain regret.
Sad or bright, she is lifeless ever;
Cast her phantom arms away.
Nor look back, save to learn the lesson
Of a nobler strike Today.

Rise, for the day is passing;
The sound that you scarcely hear
Is the enemy marching to battle—
Arise, for the foe is here!
Stay not to sharpen your weapons,
Or the hour will strike at last.
When from dreams of a coming battle
You may wake to find it past!
—Adelaide A. Procter.

What the Maid Wanted to Know.

One of our leading actresses was engaged a maid and impressed upon her the necessity of not discussing out of doors what she heard said indoors.
"There wasn't a single thing said in this house that wasn't gossiped over by my last maid," added the actress.
"Now do you think you can keep your tongue still?" The would be maid was thoughtful for a minute, then piped out, "Please, madam, is there such to conceal?"

Special Bargains

In Wool Shirts, Sweaters, Ladies and Mens underwear, Childrens underwear, Heating Stoves and many other lines of seasonable goods which I do not want left on the shelves. Call and look over these goods and you will find them priced at CLEAR-UP prices.

DON'T DROP IT

A little boy with a piece of cake in his hand was watching his father stop the hogs. He dropped his cake and it was immediately swallowed up by a hog.

There are lots of people who drop their money in just this manner and there is always a lot of people who are glad to get what you let loose of. Of course we would not call them hogs, but they are none the less eager to get what you drop. If you keep your money in a good reliable bank like ours and talk with your banker regarding investments you won't drop your money.
