NUMBER 40

New Well Secured On Reed Ranch

Everett Ritchie Get Water Monday At Depth Of 108 Feet

Nicholson & Buffington's well rig in charge of Everett Ritchie working on the Chas Reed, place got a fine flow of water at 208 feet, after 16 days drilling. This well was finished up during the week, the ranch is owned by Chas Reed & son.

Frank Calkins purchased 5 head cows 17 head of hogs from T. B. Buffington. This week.

Of course your Willie has high ideals, but has he a single practical idea?

Rev. Starkey filled the pulpit in the Baptist Church last Sunday.

Even if you can't keep your money in your own possession, at least keep it in this town.

It costs from \$1 to \$5 to see a good show. And it costs nothing to hear a better sermon right in this town. Trot along!

Joe Copart left Sunday on the train.

Art Crawford was down from Heppner Friday evening with the ball players.

John Calkins left Sunday for Portland.

John Harbke left on the train Sunday for Portland.

Mr. and Mrs. Mason left on the train for Portland Sunday.

Bert Mason came in on the train this week from Portland.

T. M. Benedict and son Dode were in Saturday.

Howard Lane was in town Friday.

Mr. and Mrs. J. T. Knappenberg, departed on the train for Heppner Friday afternoon.

SUMMONS

In the Circuit Court of the State of Oregon, for Morrow County.

Velmaleta Woolery Jackson, Plaintiff.

VS Francis Gordon Jackson, Defendant.

To Francis Gordon Jackson, the above named defendant:

In the name of the State of Oregon, you are hereby required to appear and answer the complaint filed against you in the above entitled suit on or before the 15th day of April, 1916, which is six weeks after the first day of March 1916, the date of the first publication of this summons, and if you fail to appear or answer, for want thereof the plaintiff will apply to the Court for the relief prayed for in her complaint, to wit: for a decree dissolving the bonds of matrimony existing between the plaintiff and the defendant and forever divorcing them, the one from the other, and for such other and further relief as in equity shall seem just.

This summons is published by order of the Honorable Gilbert W. Phelps, Judge of the above entitled Court made and entered on the 16th day of February 1916.

A. E. Johnson
Attorney for Plaintiff.

Leo Gist was a passenger on the train Wednesday morning.

Harry Beasley departed on the train Wednesday morning.

The Falklands.
Buried in banks of fog, drenched in drizzling rains, swept by bitter winds from the Antarctic, the Falkland Islands are surely the most dismal of Great Britain's family of organized colonies. The rain ceases only when the wind blows the fiercest, the fog hangs low and heavy except when the gales whip it to shreds. It is a treeless land, part barren rocks and part grassy slopes. A day of sunshine is a rare joy. Tierra del Fuego is its nearest neighbor. The people, some 2,000 in number, are sturdy descendants of Scotch immigrants, and the sheep that browse on the eternally damp hills are their only source of revenue. Yet there is a capital, a government and a governor appointed by the crown and sent to suffer virtual exile for a time among the moist shepherds of the antipodes. The Falkland Islands appeal to the imagination as the remotest, loneliest and least desirable of all lands inhabited by Europeans.—Cleveland Plain Dealer.

Conscription.
With the exception of the one occasion in 1803, when the quotas of the states did not fill up as rapidly as desired, there has been no conscription in the United States. The draft riot in New York was the outcome of this conscription, and, as it happened, the muster rolls were filled in the meantime without need of the men originally drafted.
Conscription was ruthless at one time in England. The worst form of conscription was employed in connection with recruiting the navy in Nelson's time. No one was safe from attack by the redoubtable press gangs, and the victories of this glorious epoch of England's history were won in part by men who often kicked and bit and ruffled to break away from the gangs that buried them into the navy.—New York Sun.

Harder Than Diamonds.
Although the diamond is generally regarded as the hardest of all substances, it is a fact that there is a substance even harder. This is a metal known as tantalum, a rare metal, although not one of the rarest. Just how hard it is may be imagined when it is mentioned that a thin sheet of it was once placed under a diamond drill worked day and night for three days. The only effect was a slight indentation in the tantalum and the wearing out of the diamond. Tantalum is very difficult to produce, but when it can be obtained in sufficient quantities it will be an exceedingly useful substance. Among its other uses it will be employed to cut diamonds and to make filaments for electric lamps. It is one of the few substances that are hard without being brittle.

The "Death Watch."
The so-called "death watch" with its mysterious ticking at night time, is due to nothing more serious than the furniture beetle. The larva of this insect burrows in the furniture, making the pin holes which are often to be seen in old furniture. It is three years in its pupa condition and at length becomes a little brown insect with a great talent for shamming death, so that it is not very much observed. These beetles often strike the wood of their galleries with their heads, and so produce a ticking sound which is a call to the mate.

Blaze Razes 1,500 Feet Hill.
Colton, Cal.—Eighty thousand pounds of dynamite were used in one blast here to demolish part of Mount Storer, a hill about 1,500 feet high. The blast crumbled a large portion of the hill and uncovered millions of tons of limestone used for making cement.

Rev. J. L. Jones preached both in the morning and evening at Lexington, last Sunday. Mrs. Jones, went up to Lexington, in the afternoon on the train, returning Monday morning with Mr. Jones. He will preach here next Sunday.

E. J. Mahoney passed thru Ione on his way to Portland.

Those who listened to the Junior Chorus a few Sundays ago at the Christian Church will be pleased to know that the chorus will sing again next Sunday evening. Mr. Reynolds will speak on the topic "The Bible God's Revealed Will to Men." There will be a great Bible School in the morning followed by the communion and preaching services.

INDIVIDUAL HOG HOUSE.

Useful Adjunct to the Farm in Warm or Cold Weather.

Suitable farrowing houses are very necessary to successful handling of pigs. The houses that are used for farrowing purposes in the early spring can be used almost throughout the year in connection with the proper handling of the hogs, says the Kansas Farmer. This is especially true of the small individual farrowing houses which may be moved about the farm wherever it is desired to have suitable shelter for the stock. By blocking them up in the pastures they furnish shelter from the sun while permitting the wind to blow through underneath.

On figuring the cost of labor and material required to build a hog house large enough to accommodate a dozen sows conveniently at farrowing time it is found at the Kansas Agricultural college that the cost is greater than that required to build a dozen individual hog houses, the difference varying somewhat according to the style and size of the houses.

In the case of the centralized hog house the work of taking care of the sows can all be done in the same building, thus taking less work than the same number of sows would require if kept in individual houses. A centralized hog house is warmer than an individual house, and in case of early farrowing this makes the former very desirable.

A centralized hog house, however, keeps the hogs close together, and in case of disease there is greater danger that it will spread rapidly than if the hogs were kept in individual houses.

FEED AND MILK FLAVOR.

Corn and Bran Not Superior to Other Wholemeal Grain Mixtures.

The federal department of agriculture recently reported the results of experiments to test the effect of oats on the flavor of milk. These experiments showed that oats do not have the beneficial effect on the flavor of milk which many dairymen believe. But as corn and bran constituted the ration tested against oats the public has gained the impression erroneously that the department recommends the feeding of corn and bran to improve the flavor of milk.

Of fifty opinions expressed regarding the flavor of the samples twenty-five preferred the milk from cows fed corn and bran. As sixteen preferred the milk from cows fed oats and nine expressed no choice, it does not appear that either ration has any decided advantage over the other. There can be no great superiority in the bran and corn when one-half of the opinions were either indifferent or were in favor of the other milk.

In view of these experiments the department does not recommend the feeding of bran and corn to improve the flavor of milk. Oats, corn, alfalfa hay, cottonseed meal, linseed meal, bran, gluten and other good feeds for dairy cows when properly fed in reasonable amounts produce a fine flavored milk, but there is no substantial evidence that any one of them is superior to any of the others in this respect.

Short Stories.

Seven thousand women practice medicine in the United States.

All over the world sixty-seven people die every minute, or 60,480 every day.

It is officially estimated that there are 170,000,000 real negroes in the world.

It has been estimated that the earth can maintain a population of 6,000,000,000, a total which will be reached about the year 2100 at the present rate of increase.

The Panama-Pacific exposition has established a clearing house for lost children and relatives and has communication with the entire San Francisco telephone system.

Golden Weddings.
Only one out of every thousand married couples live on an average to celebrate their golden wedding.

Regime is now being advocated as a spur to economic energy, but who wants to be a horse?

BLACK MINORCA. Buff Orpington and R. L. Red cockerels; eggs for hatching. Mrs. R. A. Holdridge, Box 282, Dixon, Cal.

Reserve seats are on sale at the Drug store for the Yeomen Minstrels, March 8-1916. They are going like hot cakes, better get in.

Dr. D. R. Haylor eye specialist will be at Ione Hotel, Monday and Tuesday, March 6th and 7th.

Mr. Norydke was in Friday from Lexington.

Lewis Padberg was in Ione Friday.

The farmers are commencing to plow and disc their land.

This office has received an inquiry from a possible purchaser who wants to buy a good piece of residence property near the business section of Ione. Call at Journal office, Ione, Oregon.

John Blake came in on the train Thursday afternoon after a long visit in Texas.

Vergie Crawford was down from Heppner last Thursday to visit her parents.

LAUNDRY CABINET.

It Should Contain Stain Removers and Other Helps For Wash Day.

The careful and economical housewife who watches all the small outlays will have a small shelf or even a cabinet, no matter how roughly put together, in her laundry, where many helps may always be found. Oxalic acid to take out stains, a bottle of Javelle water, a box of fine starch and one of cornstarch, some gum arabic, a bottle of vinegar and one of ammonia, besides the bluing, the wax and soda, should be there.

For ink stains and iron rust the oxalic acid crystals are dissolved and the spots moistened, left until the spot shows that it is fading and then well rinsed in several waters, as this, like Javelle water, will eat holes in the fabric if left on too long.

When silk ribbons are to be laundered a little gum arabic dissolved to a thin muddage will give them the stiffness and luster of new. Where colors are to be washed in ammonia, vinegar and salt should be used in the water, and for stains from varnish or the usual furniture staining fluids the Javelle water is invaluable.

The laundress must be taught how to use these things; otherwise economy will prove extravagance. She should be instructed that any white goods will stand the application of oxalic acid and the lime and soda of Javelle water, but that either will surely take out the color from a printed fabric. Silks and satins will not stand these strong mediums.

AN ALCOHOLIC ENIGMA.

Fewer Persons Seem to Drink, Yet More Liquor is Consumed.

It is the testimony of the internal revenue receipts of our own government that, notwithstanding the noteworthy extension of the dry areas by reason of state wide prohibitions and local option laws, consumption of alcoholic liquor has greatly increased.

In addition to the dry areas established by political action (we use the term in its broad sense) there has been wide promotion of personal abstinence because of rules against drinking established by large employers of labor, who realize the wisdom of guarding the safety of employees and the public against accident, as well as promoting general efficiency.

We know that in addition to these powerful influences there has grown up a social opposition to intemperate habits that has a wholesome effect against overindulgence in intoxicating liquors and in favor of total abstinence in any circle of acquaintances the persistent drinkers—the men who "make a business of it"—do not appear to be numerous.

The question naturally arises in consequence. Where does all the liquor go, and who uses it? Increase of population in the wet areas does not account for all of it.—Pittsburgh Chronicle-Telegraph.

Too Well Done.

"Yes, dear," continued the newly made husband as he gazed despondingly at the steak that was broiled almost to a crisp, "you are very charming, and you do several things uncommonly well, but you don't know how to cook a steak."

"And yet, my love," answered the culprit with a becoming penitent air, "you said yourself that it was very well done."

It is scarcely necessary to add that the cyclone was averted.

Two second hand incubators for sale cheap—apply Journal office.

Mrs. John H. Wilt arrived on the train Thursday from Portland.

Ione Gets More Snow Melting Rapidly

Yeomen Minstrels Promise To Amuse Patrons Friday Eve

Snow came early Wednesday morning and stayed only a while melting almost as soon as it reached the ground. For a time it looked as if winter was with us again. Another heavy snowfall has been predicted by the weather prophets.

CULTIVATE THE NEIGHBORS.

Too many farmers are neglecting to cultivate the friendship and confidence of the neighbors across the line fence. Before co-operation can be successful in handling any business enterprise, the men who are working together must believe in each other, and have a kind of friendship that will hold them together throughout all sorts of vicissitudes which are almost sure to come. It is not enough to merely greet the nearby farmers with an occasional wave of the hand when you pass them on the road, nor is it right to neglect all possibilities for business friendship except when there is a big job of thrashing or silage cutting to be done. There are still some farmers who keep themselves wedged in by the line fence and are not willing to exchange help or to go in as any part of a community proposition, but happily they are becoming fewer. A whole lot of difficulties will be eliminated when there is more of this wholesome neighborly friendship, and business affairs will begin to adjust themselves a good deal more easily.

PUBLIC PLAYGROUNDS.

The importance of establishing playgrounds in our cities can scarcely be overestimated. Play is the natural and normal portion of the life of every boy and girl. Exercise is to the child no less vitally important than food, for without exercise his body will starve just as surely as it would were it deprived of material nutriment.

We who may have been fortunate enough to have been brought up in the country can but dimly understand the lot of the child of the city streets. With us exercise and recreation came in natural course. The necessity for finding a place to play was quite undreamed of, for opportunities for play lay all about us. But for the city child the problem is more difficult. There are always the streets, of course, and of course—and necessarily—there must also be the city ordinance and the policeman forbidding him to use the streets for play.

Provisional measures, such, for instance, as the closing of a block to traffic, are expedients at best. The playground is the only real remedy. And the playgrounds should be ready for the coming of spring.

More to Be Feared.

"Don't you get tired of finding fault?"

"No," replied the patient man of responsibilities. "I suppose people have a right to discover faults. What I object to is the man who assumes that faults exist and never troubles himself to investigate."—Washington Star.

Musical Note.

"What is technique?" "Technique is the art of making the simplest passages sound difficult."—Musical America.

Perseverance is an admirable trait, but without the safety valve of common sense it becomes a menace.

No sister, not all men are beasts. There are times when the beast would object to the comparison.

Ione Yeomen Homestead 5239 expect a record crowd at their First Annual Minstrel performance to be held in their hall over Bender's Store, Friday evening March 3rd. They promise the most wonderful aggregation of entertainers ever brought together under one roof. Catchy songs, funny jokes, pretty girls, handsome men, beautiful costumes. Spectacular, Gorgeous, Thrilling, Mirth-Provoking. Forget your troubles for one night. You will sure feel dissatisfied if your friend asks you next morning why you stayed away. He will laugh for a month and you'll wonder why.

The Booster And The Killer

Nearly every town has two classes of citizens—the boosters and the killers. All the world loves the former, but even the devil shuns the latter. Be a booster! The town booster is known by everybody, for he is always doing and saying something to push his town and its people along. He is the man who makes the town. The killer is the one who destroys it. Be a booster! The booster never loses anything by his boosting. He boosts other people and other people boost him, and through this combination of boosting great things are accomplished. It is only the killer who fails of his own deeds. Be a booster! The booster is like a ray of sunshine on a cloudy day. He brightens everything and everybody around him. His geniality, his cheerfulness, his energy and his good deeds breed hope in the bosom of despair. His words and his acts aid others and enoble himself. But the killer only kills—just kills, kills, kills! BE A BOOSTER.

The editorial countenance is no indication of the spirit within. Even the wisest of men have resembled the fool.

A man will tighten his belt and chase a rabbit all day without a thought of hunger or fatigue. But when his wife wants an armful of wood he promptly sends the kid. Shoe pinch?

For Sale, Rent, or Exchange. 120 acres near Ione, will accept City property. Also have 57 acre Valley farm \$6500, for cheaper land. Box 67, Salem, Or. 40-43

Leave your sick watches and broken Jewelry with Frank Christensen to be repaired.

Even the buzzard, the lowliest of birds, is loyal to its home.

Yep, election time is trotting right along. It will soon be on the gallop.

W. H. Cronk returned to Ione from Portland, where he attended the session of the Western Lumber Dealers Association, last week.
