

For the convenience of our customers in lone and surrounding country, we have arranged for a Watch and Jewelry repair headquarters with Frank Christenson, druggist. All work left in his care will receive prompt ttention.

Haylor, the Jewelet Leppner, Or.

Everybody Help

We would like to see every man, woman and child in this community have an account at this bank.

We don't expect every person to deposit a thousand dollars. What we are after is the welfare of this community.

If this community prospers we will prosper. If everyone had an account with us we could help more and more.

A bank is a sort of a mutual enterprise. Its object is to assist in the promotion of the community's welfare by furnishing funds for the advancement of its industries.

All the money in the community should be placed in the bank. In the best interests of all conserned,

BANK OF IONE

For County School Superintendent

To the Republican voters of Morrow County: I hereby announce that I will be a canidate for the office of County chool Superintendent, subject to the will of the Republican voters, at the Primary Election to be held May, 19, 1916.

Respectfully

Paid Ady.

FEEDING DAIRY STOCK.

Young Animals Should Be Well Fed During Growing Period.

Calves, dropped in the spring and early summer should be growing nicely by the time they are in their winter quarters. They should be early accustomed to eating grain, grass and, later in the fall, alfalfa or clover hay. It is poor economy to limit their supply of roughage, as it develops large frame barrels and gives the appearance of vigor, and nothing will aid this more than clean, well grown hay.

The grain ration is necessary for steady growth. The grain should be given in two feeds, morning and even-

Regulate the amount of grain to the individual calf. No grain should be allowed to remain in the manger where it will become musty, as digestion disorders will result. Ground oats and brau are valuable supplements to skimmilk in a ration as they contain a large amount of mineral substitute necessary for good bone.

FUR BEARING SHEEP.

Kansas Agricultural College Experimenting With Karakul Crosses.

A test which has for its aim the in troduction of a new fur farming in dustry in the United States is showing some unusually promising results in Several hundred Persian ismb, astrakhan and krimmer fur pelts in that state by crossing Karakul sheep from Asia on American long wool breeds. ROAD BUILDING BY CONVICT WORK

Old Idea Adopted to Modern Requirements.

AN ECONOMIC PROBLEM.

Labor as Given by Various Author ties Varies Greatly-John B. Riley a Warm Advocate of Convict Road

While the idea of using prisoners to build roads is probably as old as the art of road building itself, the systematic use of municipal, county and state prisoners in that work is a compara tively recent development, says the Good Roads Magazine. It is growing in favor, however, as the recognition of its advantages become more general and as the lease system becomes more generally condemned. At present the inws of practically every state in the Union permit some use of convict labor in road building, and it is worthy of note that although only about a do states have made extensive use of such inbor, it has been found economical and efficient wherever given a fair

Aside from the fact that the em ployment of convict labor effects a considerable saving in the cost of road work, no definite conclusions can be ached as regards the relative cost and efficiency of convict and free labor

The cost data available show that the cost per convict per day for road building varies from perhaps as low as 25 cents to something over a dollar, depending upon the locality, the character of work upon which the convicts are engaged, the system under which

CONVICTS WORKING ON STATE BOAD

they are employed and other local con ditions. The relative efficiency of the convict and the free laborer as given by different authorities also varies greatly, some rating the convict as only about half as efficient as the free laborer, and others rating the convict Those states in which convict labor

has been or is at present employed ex-tensively are Alabama, Colorado, Geor-gia, Louisiana, Montana, New Mexico, North Carolina, Oregon, South Carolina, Virginia and Washington. in addition, Illinois, Iowa, Kentucky, New Jersey, New York, Ohio, Texas, West Virginia and Wisconsin have used convicts to some extent recently and may be expected to make greater use of bem in the future.

John B. Riley, New York state super intendent of prisons, is a warm advo-rate of the use of convicts for read work, and in a recent interview he

"The inmates of our prisons who are accorded the privilege of working on highways will, on the average, do as much work as the paid laborer. Quite

highways will, on the average, do as much work as the paid laborer. Quite as important as the value of the services the prisoner renders the state in building roads is the beneficial effect upon the individual inmate and, indivectly, the moral effect upon the whole body of inmates in our state prisons.

"The demonstration that there are several hundred men in each of our state prisons who may be employed outside the prison walls at manual inbor also has shown that it is entirely feasible to raise all vegetables required for use in the prisons, thereby making it possible to save many thousand doliars annually by the expenditure of a comparatively small sum in the purchase of prison farms.

"In the past organized labor has opposed the employment of convicts in highway construction. Having seen that they are performing work in the construction of highways that would not otherwise be improved and that the mosey appropriated is used in the employment of citizen labor and payment for teams and wagons required to render convict labor effective, all opposition to the plan has been withdraws."

ADVERTISING COLUMNS POPULAR ABROAD.

Are Noticeable Features In the Streets of European Cities.

Perhaps the most noticeable of the small structures of European streets is the advertising column or klock, which serves a good purpose. While such col-umns may be objected to by those who are not familiar with their use, yet since no large posters are allowed and since public advertising is more or less of a necessity, the columns are found to be of real service to the public especially in regard to announcements of theates and public meetings, by no sandwich men, banner men, billboard wagons or similar advertising chemes are permitted, the advertising column may well be pardoned. For

ordinary commercial purposes, news papers are found to be the best sources of publicity, and the public is thus saved the frightful displays of crude posters and signs which deface American streets. A commercial advertise-ment is thus seldom seen displayed in public. At prominent corners, how ever, often four advertising columns may be placed, two for the usual pur poses and two for news stands. They are not, however, without a certain artistic effect and do not excite ad verse criticism.

In Gormany and Austria advertising art has advance" ery rapidly during the last decade. The best posters de come from the hands of German and Austrian designers. These men are especially trained for this form of art and display extraordinary ability to use large masses of glowing colors in striking yet harmonious designs Americans are thought to be a people fond of jokes, but in what may be mans outdo us at every turn, and an official biliboard in a German street will often be covered with quaint de signs, each signed by the name of some famous poster asker. — Frank Koester in "Modern City Planning and Maintenance."
