The Ione Commercial Club met last Friday evening and transacted several items of importance. The committee on Constitution and By-Laws submitted their report and their articles were adopted by the Club after careful consideration. They can be found on page 3 and every member should clip them out for future reference.

The matter of sending a delegate to Portland to confer with the agents of a colony of Swedes who desire to migrate from the Middle West to the Pacific Coast was discussed and will receive further attention at the meeting of the Club Friday night, and it is probable that a delegate will be appointed to try and induce them to settle in Morrow county. As the By-Laws provide for certain committees to be appointed at once, President Knappenberg will make known his appointments, to fill these positions, tomorrow night. A director is also to be elected.

Mrs. Walter Cason and daughters, Marie and Sibyl, visited several days at Mrs. Cason's sister's, Mrs. Tom Grabill in the Eightmile country.

AEROPLANE TO APPEAR AT IONE'S BIG CELEBRATION

Bird-Machine Will Make Flights all Three Days—Baseball Every Day and Horse Racing, Street Sports, Program at Park, etc., Will be Other Attractions—Large Crowds are Expected.

The contract has been signed for the appearance and flight of an aeroplane at Ione all three days of the monster celebration which is to be held on July 3, 4 and 5. This attraction alone should draw thousands of people to the first flying machine ever seen in this section of eastern Oregon. The machine will also be on exhibition so that the people can get a glimpse of it at close range. It is an expensive attraction and the celebration committee are to be congratulated for their enterprising spirit in bringing the first aeroplane into this country for the benefit of their visitors at this big celebration.

The aeroplane is by no means the only attraction offered to the people of Morrow County to attend the celebration. Baseball games will be held each day and it is possible that a double-header

will be held on the 4th. The Heppner team will be after the scalps of the Ione boys, with blood in their eyes, and exciting game between these ancient rivals are promised. Eightmile and Lexington will probably be represented in the fracas and the full program of ball games will appear in our next issue. Street sports of various kinds will be held on the evening of the 4th. Fifty dollars in cash prizes will be awarded for these events.

The horse racing program as published in our last issue will be held on the afternoon of the 4th and many prominent horsemen have signified their intentions of entering animals in these races.

The committee in charge of the program which will be held at the park on the morning of the 4th, reports everything progressing fine, promising several interesting numbers.

RAILROADS IN GERMANY.

Fine Discipline Because Employees Are All Ex-Army Men. It is well known that practically all of the railway employees of Prussia have served in the army. When they enter the railway ranks from the army certain credits are allowed for their military service, and certain positions are reserved for army men. This military experience shows its influence on their deportment and discipline in railway service. There is a noticeable orderliness and precision about everything connected with German railways. In respect for authority and strict observance of the rules the German railway employees has no superior. The traveler will not fail to notice the red capped station master standing at attention on the station platform as the train passes through each station. He will also find the tender signalmen, gatemen and other employees connected with the train service always in evidence, standing like sentries at the train platform. The

stalling official, while riding over the line, can thus take a census of all employees in positions of responsibility. When he alights at a station his rank is at once recognized. The station master immediately salutes and gives a verbal report of the situation at his station. If the official goes into a signal tower the signalmen in charge salutes and reports. If he passes an engine house the foreman salutes and gives a brief report of the work in progress.—Railway Age Gazette.

FORKS OF TREES.

They Stay Where They Develop and Never Grow Any Higher.

Some people through careless observation believe that the fork of a forest tree will gradually grow higher from the ground. If they would investigate it would be found that the forks and "heads" of fruit trees are at exactly the same point where they were when first noted.

The state forester in inspecting locust and catalpa groves throughout the state has found owners who have not removed one part of the fork of those trees that have formed forks below the fencepost length. Believing that in years the fork would grow up and a fencepost could be cut below the fork. This erroneous belief is the cause of so much of the delay and neglect of pruning in early life of street and roadside trees.

It should be remembered that the base of a fork or a branch of a tree will always remain at the same distance above the ground. The side branches of some trees, such as the elm, usually continue to grow upward, while those of other trees, such as the maple, incline upward when young, and as the tree grows older the weight of the branches gradually brings it to the horizontal. The latter often makes the removal of large branches necessary, which not only spoils the symmetry of the tree, but usually starts decay, which soon kills the tree.—Indiana Farmer.

The Wide, Wide World.

"It's awful how easy some folks get weighted down with a new experience," began the postmaster of Woburn in the Hills, with a significant glance at "Boosey" Fraser's bowed form in the Concord wagon at the door. "That's what bent him over like that. Yes," after a glance of interrogation from the only listener who was really listening. "He began to bow over soon's he realized the size of this globe of ours. You see, from one of the northern counties up 'bove here Boosey went all the way to the state capital. When he come back he looked solemn with the weight o' what he'd garnered."

"I tell you what," he says to us right here, scarcely speakin' above a whisper, "if the world's as big t'other way as 'tis this it's a whopper!"—Youth's Companion.

A Good Student.

"Is your boy a good student?" "Yes," replied Mr. Wealthy. "To a certain extent he is. The way he gets his mother and me to put up with his expense accounts shows that he is a wonderful student of human nature."—Chevrolet Leader.
