

HEPPNER WINS FROM UMATILLA IN EASY FASHION

12 To 6 Score Tells Tale—Locals Hit Ball Hard.

YOUNGSTERS GIVEN TRY-OUT

All Show Up Good—Fast Echo Team Plays Heppner on Local Grounds Tomorrow Afternoon.

"We have met the enemy and they are ours," said Admiral Perry a hundred years ago after a hard battle on Lake Erie, and this refrain was chanted again last Friday by a full-mouthed chorus of Heppner fans when the local willow wielders took the measure of the Umatilla horseshoe jugglers.

The game began at 2:15. At 2:20 Umatilla was leading, having scored a couple on an error or two and a couple clean bingles. Blakeslee was pitching for Heppner and Umatilla

SUMMARY
Two base hits—Ford, Hayes, Harlan; Three base hits—Romick; Sacrifice; hits—McKay, Spinning, Romick, Blakely, Crawford; Bases on balls—off McNurlin 2; off Harvey 1; off Blakeley 2, off Harlan 2; credit victory to Blakeley; charge defeat to McNurlin; Umpire Johnson.

NOTES OF THE GAME.
A bigger crowd than was expected witnessed the game. It looks as though week-day ball will prove a

Umpire Johnson Handles the Game in Fine Shape.

success as the season advances and the games become faster.

Manager Case will give his young talent every possible chance to make good. By doing so he will build up a team for the future as well as for the present.

Bert Johnson of Ione, who umpired the game, was a little off-color but his decisions were never questioned to any extent by the players. They all know that Johnson stands for fair play and calls them as he sees them. He will be asked to handle the indicator for the game tomorrow with Echo. Many fans concede Johnson to be the best umpire in the state outside of the Coast and Northwest Leagues. There is no nag-chewing when he is handling the game.

The rain in the morning cleared off just in time for the sun to come out and warm the air. The diamond was smooth but soft. Several ordinarily easy outs were converted into hits by both sides on this account.

The next game scheduled by the ball club's officers is due to be pulled off on the local grounds, tomorrow Friday the 15th, with Echo. Echo also has a team in the Irrigation league and they have been playing some fast games for several weeks. Manager Case has figured out a few changes in the line-up which he figures will strengthen the local team considerably. "Mug" Hayes will probably be given another try-out at the sackstopping position and Blakeslee will start the game in the box, with Harlan in reserve. If the fans want to see a real classy game they should not fail to be on hand Friday. Game starts sharply at 3 o'clock.

PLANNING AND HEALTH.

No community can afford, viewed from an economic basis, to grow in such wise as to increase the hazard of sickness to its people. Every dollar spent for public improvements or permitted to be spent for private gain should have a life producing result. It is almost inconceivable that any citizen or group of citizens would sanction plans or projects that, if carried out to their full extent, would prove detrimental to public health or welfare. Certainly none such would with knowledge and forethought give their approval to lines of community activity that can have only the ultimate effect of undermining public health and morals either through restriction placed upon those natural aids for the promotion of health or through the development of such conditions as will perpetuate or spread disease. Please notice that I state none would with malice and forethought so blight his community. But many do, without this unsocial spirit, project plans that have the above effect, and their action receives public sanction because we see results only in terms of their immediate consequences. The insidious influence which may come from an innumerate mass through a long process of slow development does not impress us while it is in the process of coming. Looking back over its period of growth, we can gauge it, or contrasting the state of social well being produced by it with that produced by a more constructive plan elsewhere, we can estimate its cost. As communities, however, we seldom attain a conception of this cost. Only when the social engineer reveals the ugly handicaps thus imposed upon the city is there any realising sense of the value of the one and the loss of the other.—Bernard J. Newman.

SUPT. NOTSON NAMES IMPROVEMENTS NEEDED

By S. E. Notson, Co. Supt.
The State Board of Health has made its report to me concerning the conditions found in the schools inspected by the State School Nurse who recently visited the schools of this county. The Board will provide the services of skilled men to aid in remedying the defective sight of pupils whose parents are unable to bear the expense themselves. The same offer applies to other defects which interfere with the school work of pupils.

In several districts the outhouses are not what they should be. Some need repairs, some need cleaning, some need new vaults, and some need a coat of paint or whitewash to obliterate the obscene writing and vile pictures. In two districts one of the outbuildings has been blown down. The Board insists upon a compliance with the law which requires two outbuildings, even if the school is small, unless the pupils are all of one sex. In two or three districts new outbuildings should replace the old.

In nearly all the districts, the water supply is properly taken care of, though a close jar with a faucet would be a decided improvement over the present open pail used in some districts. The open pail, even when the pupils are provided with individual cups, is not the best means of caring for the water supply. Where the source of the water supply is near, a large jar fitted with a bubbling fountain, which can be purchased at a small cost, is better than the individual cups, for pupils neglect to take their cups home to be scalded.

The Board feel that the floors should be oiled. In this country the dust is one of the difficult things to contend with. The school boards would do well to provide some sort of sweeping compound for use on the floors, and floor brushes are better than brooms for sweeping, and in the end are cheaper. The sweeping and dusting should be done in the evening. A sweeping compound can be made at a very small cost. Few people appreciate the dangers arising from dust.

While it is not mentioned in the report, the light in many of the schools is not the best. In District No. 34 the light is admitted only from the left side, almost the entire side of the building being windows. This is the correct method. The light is regulated by means of tan colored, adjustable shades, which are the same kind as those used in the school buildings of Spokane. These shades cost a little more in the beginning, but they are much cheaper in the end, for they will outlast a dozen of the ordinary shades. Then they are so much better. The light can be properly regulated at all times. When the sun is shining on the side having the windows, the shades may be drawn entirely over the windows, yet the texture and color enables a soft light of sufficient quantity to enter the room.

In several of the districts, the matters needing attention have already been attended to. In all they should be attended to without delay.

State Supt. Churchill has called upon me for a report in regard to the work of the parent-teacher organizations of this county. It is to be regretted that more of these organizations were not organized during the year. Where there have been such organizations, much good has been accomplished. Portland has led the entire country in this line. At the Spokane meeting, Mr. O. M. Plummer of the Portland Board of Education, told of the great benefits which had been secured by the organizations in that city. Similar reports were made from other cities. Some of the speakers making the reports said that at first some of the teachers, principals, and superintendents were afraid to encourage the work, thinking that the organizations might be "meddlesome," but in every case they were now in hearty accord. The organization at Lexington, under the leadership of Prof. Doak, has done some most excellent things this year. If such an organization were formed in each district, many of the things criticized by the State Board of Health could be remedied without any difficulty. The purpose of the organizations is to secure intelligent co-operation between the homes and the schools and to secure the best equipment for school work which the district can afford. The school and the home are the two biggest factors in the education of the child, though not the only ones. Sometimes the teachers forget the part the home has in the work, and think that the school is the only factor. Sometimes the parents want to put all the responsibility upon the school. Both positions are erroneous. The solution is found in the parent-teacher organizations.

The Home Team Paraded the Bases

batters were as much surprised over their hits as he was. The locals failed to tally in their first time at bat. McMurdo shot a pop fly to the pitcher. The Herald man lost the ball over the creek, getting two bases on the hit. But was out a moment later trying to steal third. It was apparent that the Umatilla pitcher had little on the ball and it was only a matter of time until the locals were in the lead. As individuals, there were several good players on the visiting team and they gave their twirler good support. Errors were quite numerous on the local team's scorecard but they managed to hold Umatilla to six runs.

Spinning Almost Fell in the Creek Catching a Long Fly.

"Mug" Hayes was given a try-out for the position of first-string catcher and his showing was good. Two other high school players, Fiske and Young, at second and field looked good in faster company. They both hit and run in a way that makes the efforts of some of the veterans look sick. With a little seasoning they will make good as regulars. Jones playing right field, will be given a regular berth but will probably be shifted to the infield. He is a heavy stickler.

We give the tabulated score of the game as follows:

| UMATILLA | | | | | | |
|---------------|----|---|---|----|----|---|
| Names | A | B | H | P | O | E |
| A. Spinning | 4 | 2 | 0 | 3 | 1 | 2 |
| Castel | 4 | 1 | 1 | 0 | 5 | 4 |
| McKay, 1st | 4 | 1 | 1 | 10 | 1 | 0 |
| McNurlin, P&L | 4 | 0 | 1 | 2 | 7 | 1 |
| Lennox M | 5 | 0 | 1 | 1 | 0 | 0 |
| Ford C | 3 | 1 | 1 | 6 | 1 | 0 |
| B. Spinning R | 4 | 0 | 1 | 2 | 0 | 0 |
| Romick 2nd | 4 | 2 | 2 | 0 | 1 | 2 |
| Norton L | 2 | 0 | 0 | 0 | 0 | 0 |
| Means L | 2 | 0 | 0 | 0 | 0 | 0 |
| Harvey P | 1 | 0 | 0 | 0 | 0 | 0 |
| Total | 38 | 7 | 8 | 24 | 16 | 9 |

| HEPPNER | | | | | | |
|----------------|---|---|---|---|---|---|
| Names | A | B | H | P | O | E |
| McMurdo 1st | 6 | 1 | 2 | 9 | 0 | 2 |
| Harlan 3rd P | 5 | 1 | 1 | 1 | 0 | 0 |
| Young RF | 5 | 1 | 2 | 1 | 0 | 0 |
