WITH THE GROWTH OF SOCIALISM PROPAGANDA AND ITS COMMON-SENSE PROGRAM
 By Heppner Branch No. 1

Entering every legislative body today in this country and every civilized country Socialism is compelling the old parties to take up its immediate demands. This is shown in Congress when on Sept. 30 such Senators as Kenyon of Iowa, Borah of Idaho, Thomas of Colorado and Martsen of New Jersey advocated the National Ownership of Railroads as being cheaper than spending millions of dollars improving rivers and would-be rivers and would-be harbors, on the plea that such improvements will tend by competition with railroads to reduce freight rates, is wasted. That the railroads control the boat lines is well known. That regulation of freight rates by the Interstate Commerce Commission has been and will be a complete failure. That the only solution of the problem is for the Government to own and operate the railroads and other transportation lines. These are the statements made on the floor of the United States Senate by these Senators. Listen to this: Senator Kenyon was discussing the Pork Barrel Rivers and Harbors Bill. He said: "Mr. President, we have spent enough money on the Mississippi River from its source to its mouth to build a railroad on each side of the river, so if we are doing this work to control railroad rates, we are engaging in a most expensive way of doing it."

Thomas Cites Reason.
 Senator Thomas said: "Mr. President, if the expenditure contemplated by many of these items is designed to regulate freight rates, and is necessary, notwithstanding the control given by the law to the Interstate Com-

merce Commission, upon that subject, which control has been very frequently and beneficially exercised, does that not constitute a reason, if not a very good argument, for public ownership of railways and transportation routes." As a matter of National policy more desirable in view of the failure of Commissions to regulate properly. As soon as the valuation now going on shall be completed for the taking over of the railway lines and operating them as general public agencies for the common welfare of the people, Senator Thomas referred to the defiance by the New York Central of the decision of the Supreme Court in the Union Pacific Merger Case, and asked Senator Martsen if this did not indicate that the roads are greater than the Government.

Senator Martsen said, "They are unquestionably greater than the Government itself." And it all conspires to one argument. My hope and daily prayers are for Government ownership of every line of them."

As the growth of Socialism in Germany grew, Bismark gave the German workers one sap after another. Look over the railroads, old age pensions, widow's pensions, shorter hours in mines and industries, more sanitary conditions, better schools, compulsory education, better houses, thinking it would stop the growth of Socialism, but it grew from one member in the Reichstag in 1877 until in 1914 it has 111 members, and is the strongest political party in Germany in number of votes. And if it had its just representation as to votes cast it would have the largest party members in the Reichstag. The same could be said of all the European countries. In Sweden the Socialist party in their last election added 14 new members in the Landstrom, making a total of 78 members. This rising tide has caused 37 nations to own their railroads and are operating them successfully. This same sentiment has given us our parcels post and will compel the postal officials to extend it until it will be a parcels post in service as well as in name. And the same sentiment will make the banking business of this country under the postal system. Then you won't see this Government turn \$1,000,000,000 of currency to the large banking interests of the country to move the crops, charging them 8 per cent interest on the amount. It has made the farmer get up at daylight to move that 8 per cent crop allright. We all call him a jolly good fellow. The Socialists would have loaned him that money which was his own credit, based upon his own land values and produce. The Farmer's Equity Society of Wisconsin, at Madison, in their convention which represented 10,000 farmers of that state, endorsed the Socialist candidate for Governor of Wisconsin. Wake up, you farmers of Morrow County. Vote to own all the tools of production and Distribution.

South Portal to Palace of Food Products, Panama-Pacific International Exposition, San Francisco, 1915

Copyright, 1914, by Panama-Pacific International Exposition Co.

THIS portal is probably the most modern in feeling of any doorway to any of the main group of exhibit palaces. The portal is Italian renaissance in form and treatment, but much of the ornamentation is of more recent origin. The photograph gives no idea of the great dimensions of this portal, which is sixty-six feet in height to the tip of the ornamentation surrounding the arch. The eagles above the line of pilasters of the portal are six feet in height. The Exposition palaces are constructed of gray-lime cream plaster in imitation of Travertine marble.
