## Why You Should Vote For BOOTH Republican Candidate for United States Senator

Are you better off now than you were under a Republican administration?

Are you satisfied?

If you believe in the principles of the Republican Party, if you are convinced that these principles are best for the country, then prove it by voting for your standard bearer, Robert A. Booth, Republican candidate for the United States Senate.

You know that under Republican presidents the people of the United States have good times.

You know that under Democratic presidents you have Democratic times.

Remember the prosperity under McKinley, Roosevelt and Taft.

Remember the conditions under Cleveland and Wilson.

The issue in this campaign is not one of personality. It is not one of non-partisanship. It is a question of whether you prefer prosperity under Republican administration.

Do you have enough work? Are your business good? Is your business what you want it to be?

If you are satisfied with present conditions, well and good; if you believe that the present situation is better than under McKinley, Roosevelt and Taft, you know what to do.

The way to bring prosperity is to help elect a Republican Senate.

The Republican Candidate in Oregon is  
**R. A. BOOTH**

THIS IS THE REPUBLICAN YEAR—VOTE THE  
TICKET STRAIGHT

### SCHOOL NOTES

By Supt. S. E. Notson.  
On the 6th inst. I visited the school in District No. 18. Here I found five pupils under the direction of Miss Letitia Shewey. Although the school had been in session only a few days, the work was well under way. The teacher and pupils are determined to secure as many credits as possible toward a standard school.

In District No. 20, Miss Alice Arnold is again at the helm. This school is also a small school, the enrollment being seven. The flag was displayed from an excellent flag-pole on the building. This secured for the school the first star on the standard card. I noted that the floor had been carefully scrubbed. In fact the school room had been put into good condition before the opening of school.

In District No. 9 the enrollment is eleven. Miss Josephine McDevitt is the teacher. This school has a new flag, and the boys are arranging to repair the flag-pole so the flag can be kept flying in good weather. A fine set of maps and a new dictionary has been provided recently. At Cecil a well arranged two-room school building has just been built. Besides the two school rooms there is a large library room. The lighting of this building has been properly arranged and there is no lack in the amount of it, the window space being ample. The light will be regulated by means of adjustable canvas shades. The hall and the cloak rooms are convenient in arrangement and size. Twenty-three pupils were enrolled when I visited the school, and several more were ready to enter. Miss Ester Cox was in charge, but it was found necessary to employ another teacher in order to accommodate the pupils who wished the ninth and tenth grade work. Miss Erma Davenport, of Sumpter, was secured for the second room. With the new building and two teachers, everything points to a successful year's work.

In District No. 28, Miss Ida Olson is the teacher. Here I found the flag displayed. The interior of the building has been painted. The decorations are tasty. The water supply is kept in a closed tank, and the pupils have individual cups. A new set of maps and a new state map have been purchased recently.

Miss Olenna Olson teaches the school at Morgan. The flag was flying at this school. The enrollment is seventeen. The interior of the building was painted anew during vacation. The pupils have constructed some play apparatus and plan to build more. A good case is provided for the library books. The water supply is properly kept.

In District No. 52, Miss Troedson and nine pupils were getting started nicely with the work of the term. A number of improvements are contemplated by the board, among them a drinking fountain, which has been ordered but had not yet arrived. A new flag-pole will be erected, and the flag will then be properly displayed.

**HEPPNER SCHOOL NOTES**  
The University of Oregon gave our High School a dozen Fray Karl Druskie rose bushes taken from its

campus. The same have been carefully planted on the school campus. These roses, if they will grow in this climate will greatly beautify our school premises.

Tests are being made of milk for per cent of butter fat at the school. One sample tested 5%. This is a very high per centage. If anyone wishes to avail himself of this opportunity to get a scientific test of the per cent of butter fat in his milk he may do so by bringing or sending the milk to school. Miss Nellie Thompson writes as follows on the tests made recently: "The milk was tested by Miss Long in the eighth grade room Monday morning.

Milk from four different cows was tested. Cow No. I was three quarters bred Jersey, No. II, one-half bred Jersey, No. III and No. IV, thoroughbred Jersey. The amount of milk measured was seventeen centimeters. Put the milk in the test-bottles. Then put this in the tester and turn for four minutes, then take out and put ten centimeters of Sulphuric acid in each test bottle. The process turns the milk a dark purple which separates the cream from the milk. The milk is so hot it will burn your hands. In testing with Sulphuric acid you have to be very careful because it will burn or explode. After putting the acid in it turn for four minutes, one hundred revolutions to the minute. Then take the test-bottle out and pour an equal amount of hot water in each which is to be 150 degrees. After the water is added turn for one minute. Then you repeat putting in more water. By this time the cream has risen to the top. It is then measured with a compass. Milk No. I has 3.6 cream; No. II, 2.4%; No. III, 3.4% and No. IV, has 5% cream. This experiment was very interesting to watch. If anyone ever gets an opportunity to watch milk tested they should make use of it.

Louis Summerfield has ordered the only semi-weekly paper in Morrow County for the next 52 weeks. Thereby, Louis showed good judgement.

Albert Bowker is down at Arlington on a hunting expedition. Mrs. Bowker is also visiting there while Albert chases the long-necked fowls.

Henry Cohn was missing from home several days lately and upon investigation it was found that he had been spending the week-end with his friend, Ray Rogers.
