COLOSSAL STATUARY FOR PANAMA-PACIFIC EXPOSITION.

INTERIOR of one of three studios at the Panama-Pacific International Exposition to open in San Francisco next year, showing the partially completed figures, some of them thirty feet in height, which will adorn the vast courts.

GLOBE trotters and officials from all parts of the world who have visited the Panama-Pacific International Exposition grounds at San Francisco have expressed their astonishment and delight at the wonders already revealed there. "The most stupendous undertaking of the kind in history," "The furthest advanced toward completion" and "The most beautiful site and color effect of any exposition in the world" are a few of the expressions from men who are familiar with all of the great world exhibitions of modern times.

The exhibit palaces are of vast size. In the Palace of Machinery 20,000 people in masquerade costumes danced all night beneath the illuminated arches over nine acres of floor space. Lincoln Beachey flew an aeroplane in the same building.

No exposition has ever attracted such attention abroad. Thirty-six of the world's nations have accepted America's invitation to participate and will present on an elaborate scale exhibits revealing their progress. The participating nations are as follows: Argentina, Australia, Austria, Bolivia, Brazil, Bulgaria, Canada, Chile, China, Costa Rica, Cuba, Denmark, Dominican Republic, Ecuador, France, Great Britain, Guatemala, Haiti, Holland, Honduras, Italy, Japan, Liberia, New Zealand, Nicaragua, Panama, Persia, Peru, Portugal, Salvador, Siam, Spain, Sweden, Turkey, Uruguay and Venezuela.

Work is being rushed on the splendid illuminated towers, fountains and festival courts, where will be shown the masterpieces of architectural, landscape and sculptured decorations and the wonderful outdoor mural paintings, some of them 100 feet long and executed by eleven of America's greatest artists. The garden and landscape effects are almost completed at this writing, over a million rare trees, flowering shrubs and plants being used.

This greatest of universal exhibitions already gives proof that it will present the masterpieces of the world of art and that in its harmonious beauty, its high educational value and utility it will be unsurpassed in history.
