F. G. Penland, is again in Heppner after spending a portion of the winter in Portland.

## SEED BARLEY FOR SALE

### Hulless and Beardless

At the Eastern Oregon Jack Farm, seven miles northeast of Lexington. a few sacks of this late, improved hulless barley, which I am anxious to get a few sacks each into the hands of as many Morrow County farmers as my limited supply will furnish. An article in another part of this paper, telling of my experience with this grain, will convince all of its peculiar adaptibility in Morrow County, where it surpasses all other grain in yield and has no equal made into hay. Address,

B. F. SWAGGART.

Lexington, Oregon

Baths in Connection

State Veterinarian W. H. Lytle, informs us that his office is very much interested in the work of exterminating coyotes in this territory. In asking the news-papers of the state to co-operate with him he says:

After The Coyotes

You are probably aware of the fact that the Legislature has passed a coyote bounty law which provides for a bounty of \$3.00 on all coyotes killed in the year 1917, with an increase of \$1.00 per year on females thereafter. Naturally this increased bounty is going to materially assist in the eradication of the oyote. If your paper will join this crusade in promoting a systematic coyote poisoning before whelping time, the coyote will be materially lessened in number and a considerable less expenditure of money will be made neessary by the State and County to control this troublesome post.

Live Stock was never so valuable as at the present time. A good lamb at birth is well worth from three to five dollars and a calf is easily worth from seven to ten dollars; hence the services you may render your community in advertising and promoting this coyote poisoning crusade is indeed very great.

One of the most gratifying evidences of returning prosperity is the very heavy traffic over the lines of the Oregon-Washington Railroad & Navigation Company, which is making it necessary to re-lay its rails over the Sensation Blend beautifully col- Blue Mountains with hundred pound steel. At present ninety pound steel is used, but the heavy volume of traffile finds these rails insufficient for the strain.

These rails will be the heaviest used by any railroad in the west, and the total cost will approach lose to a half million dollars.

The first unit of this work will comprise about thirty miles. Other units will be undertaken as circumstances warrant.

### Farmer Smith at Irrigon

Farmer Smith of the O.-W. R. & N. Co., has purchased a sixacre tract from W. R. Walpole within the city limits of Irrigon and will establish a demonstration farm for the West Extension. He will make no experiments but will show how to prepare the land and produce crops that are known to be adapted to the soils and climatic conditions of the locality. He will inoculate some of the alfalfa seed and some will be planted without inoculation. He will fertilize some of the ground and other tracts will be seeded in the raw state. Corn, melons, root crops, potawes, etc., will be handled in the same way. He has selected a convenient tract of land near the railroad station and will welcome any farmer who wants to learn from the demonstrations the best methods to puzzare.

Quite a contest is raging to congress, over the salaries which Uncle-Sam pays to the government clurks. The salaries which they are now drawing were fixed more than 10 years ago, when one dollar would buy 10 or 12 pounds of tagon, or four pounds of good butter, and seven or right prouds of good beef steak. Today the government clerk is drawing a very small salacy with which to must his needs, Each doffer will only buy today, four pounds of baron, or two pounds of butter, or about three you all of book steak, so congress is having quite a struggle over this matter, and It is believed that a 10 per cent increase will be given the analog of he'p, and about five per cent increase to those who are receiving \$1000 per moroura or more. Even this increase, while it will help some, will come your near leaving the government clock what he is now being called, a "government

Uncle Sam can certainly afford to: OREGON pay his employee a decent living sa ary, and the above imposes theil not only go through Int should h doubled to meet the enormously k creased cost of living.
