New Fall Models in Wirthmor Waists

The Standard Dollar Waists of America

This Blouse is developed of a very pretty fancy striped Voile—a new Fall material. The front center is of plain white Voile solidly tucked, lending a most pleasing effect. The large collar, coming to deep points in front and turn back cuffs are also of plain white Voile. Sleeves are inset with hem-stitching. A model that will be much admired.

A simple, appealing model that almost anyone, be they large or small, could wear becomingly. The front is solidly tucked almost to shoulder seams with tucks of alternating widths. The collar is so fashioned that it is equally attractive when worn upstanding or laying down. Collar and turn-back cuffs are outlined with dainty Venice Pico edging. Two very large ocean pearl buttons for fastening. Made of a splendid quality of Voile.

A neat, semi tailored model, simply and effectively trimmed. The collar is convertible—can be worn high or low. The front is attractively trimmed with pretty embroidery and four full-length tucks with short shoulder tucks for fullness. Sleeves are finished with turn-back cut in point effect. Three large ocean pearl buttons for fastening are ornamental as well as useful. A practical, sensible, serviceable Waist.

Somewhat more elaborate than the other three models in this group, and distinctive; while the collar is embroidered all over in matching design. Hem-stitching is liberally applied on collar, down front fold, and to inset sleeves, lending added refinement. A Blouse that will find favor everywhere.

We highly recommend them because of their unusual merit—and genuine worth.

Earl Cramer came up from his ranch on the Sand last week on business. While here he had rather bad luck with his car. He left it on the hill near Hollie Leather's place and walked down to the house, as the hill, though a short one, is rather steep and rough. That night some youngsters from town thought they would play an early Halloween joke, it being only the 30th of October, and the supposition is they started it down the hill and lost control of it. The result was that next morning when he went to look for his car he found it at the bottom of the hill about a quarter of a mile from the house, three spokes broken out of one wheel, a bent tire, and pretty badly disfigured. He took it to the Hardman garage and soon had it repaired, though it cost him quite a sum. He left for his home Friday.
