## Packers' Profits —Large or Small

Packers' profits look big—

when the Federal Trade Commission reports that four of them earned \$140,000,000 during the three war years.

Packers' profits look small—

When it is explained that this profit was earned on total sales of over four and a half billion dollars—or only about three cents on each dollar of sales.

This is the relation between profits and sales:

Sales ██████████

If no packer profits had been earned, you could have bought your meat at only a fraction of a cent per pound cheaper?

Packers' profits on meats and animal products have been limited by the Food Administration, since November 1, 1917.
