THE HERALD COMES BACK

It is with a degree of satisfaction, a bit of what we hope may be considered pardonable pride and a big measure of relief that the Herald appears today printed in Heppner on its own newly installed plant. The fire gave the Herald a pretty hard bump and the first impression after looking over the ruins was that we were completely down and out. However, in a county like Morrow, whose people are the salt of the earth, all things are possible and because we lived in a county like Morrow and a city like Heppner and, perhaps, because the Herald had become an institution which the people wanted to see continued, we have been able to "come back" in better shape to give Morrow county people the kind of a newspaper they deserve than we were before the fire.

Truly it is an ill wind that brings no good and a comparison of the Herald's present splendid equipment with the meager collection of junk it formerly possessed is proof of the truthfulness of that old adage.

The ready collection of old, worn out type and the tedious and laborious method of hand composition has been supplanted by a modern Linotype type-casting machine and in place of the old "Diamond" which was a parody on all known printing presses and a machine much given to promoting profanity and jeopardizing a printer's immortal soul is a modern Cottrell cylinder taking four pages of the Herald at one impression and warranted to "stay on the job." In the job department the little old 8 x 12 press has been replaced with a late model 13 x 15 Chandler & Price, the standard job printing press of the world. Other equipment, including punch, wire sticher, muller, etc., will assist the Herald force in rendering to its patrons the best possible service on short notice.

The province of a newspaper should be to render service to its community—to render an equivalent in value for the support it receives. This the Herald has always striven to do although realizing that often, because of the lack of proper equipment, it failed to come up to its own ideals. With this barrier burned away, however, we hope to be able to render a more complete and satisfactory service than we could possibly do in the past both as a purveyor of news from all sections of Morrow county and in prompt and modern commercial and job printing.

However, no newspaper can succeed without the hearty co-operation and support of the people of its community, and by this is meant not only financial but moral support. If you want to see the Herald succeed as a business proposition; if you want to see its publisher able to pay his bills and hold up his end in community affairs, give him a share of your patronage. If you want to see the Herald a real local newspaper tell the editor the news; if you don't see him call him up on the phone or write a postal card. He will appreciate it and you will be glad to know that you are helping to give Morrow county a real, live newspaper.

HUN SHELLS ARE BAD

From 50 to 70 Per Cent Fail to Explode.

During Marne Retreat the Germans Used Old Stuff to Keep Up Morale.

With the American Army in France. American artillery officers estimated recently that at certain stages of the German retreat north of the Marne from 50 to 70 per cent of the shells fired by the enemy failed to explode. One night, after the Germans crossed the Vesle the enemy fired 72 shells of large caliber into a wooded tract where American troops were supposed to be quartered and artillery experts of one of the divisions engaged reported that only four of these shells had exploded.

None of the American officers suggested that the German shells were deteriorating. There had been day after day of rain during the retreat, and it was believed possible that in the withdrawal the Germans had not been able to take the usual precautions against dampness, the result being that many projectiles from some of the big guns failed to do anything more than strike the earth with a thud.

One officer suggested that possibly the Germans had been firing old shells rather than no shells at all, the officers insisting that only a few of them were exploding, but preferring to keep the big guns pounding away merely in an effort to keep up the morale of the men putting up the rear-guard fight. The average number of faulty shells is generally from 2 to 6 per cent.

He received the queen's medal with three clasps.

HE KNEW NAUGHT OF WAR

German Is Found in California Who Knew Nothing of Great Conflict.

Merced, Cal.—One man, and a German at that, has been found who admits that he did not know the United States was at war with Germany, according to Lester Hall, deputy United States marshal, B. I. in relating the incident, said: "I got an old German near Plymouth, Amador county, indicted on a charge of sedition and disloyalty to the United States. When I told him that he was charged with the expressed great surprise and stated in broken English that he did not know the United States was engaged in war against his native land."

CHARGES DEATH TO SAVE MEN

American Staff Officer Falls Mortally Wounded in Coldest Action in Lapland.

With the German army in Lapland.—The killing of the first American staff officer was reported by the general action of an American staff officer. When the officer saw there was danger of part of his advancing forces being annihilated by German machine guns he personally led his men in a charge against the guns. He captured one gun himself and his men took the others. The officer was wounded, probably mortally.

The officer's troops belonged to the British operating on the eastern wing of the American offensive sector. They had taken the village of Norroy and were pressing forward in the face of opposition from machine gun nests. The irregular advance suddenly exposed one unit to a sniping fire and the officer began that he as a staff officer was supposed to stay away from the fighting and rushed in.
