Ike always
thought

—a man was foolish to buy plug of the Gravely class when he could get a big plug of ordinary tobacco for the same money. But one day Bill gave him a chew of Gravely—just two or three small squares. Then Ike got the pure, sat-

isfying Gravely taste. It lasted so long, you can't tell him nowadays that it costs him anything extra to chew Real Gravely.

It goes further—that's why you can get the good taste of this class of tobacco without extra cost

Credit Accommodation

Credit accommodation at our bank is a reserve in business to be called upon when conditions warrant additional funds to forward your plans. A properly kept checking account helps to create confidence—confidence of the banker in your character and ability.

We invite every farmer around Heppner and especially the young men of this community, to open their checking accounts here, so that our acquaintance may ripen into a confidence that later will become mutually beneficial.

H. V. Gates, president of the Heppner Light and Power Co. is here on a business trip.

Billy Corson was a Lexington visitor in Heppner Saturday. Mr. Corson says the "flu" epidemic has about subsided in the Lexington neighborhood and the authorities expected to take the lid off yesterday and reopen the school.

Dr. McMurdo, who suffered from a very serious attack of influenza and pneumonia is able to be at his office again and is taking up his practice. The doctor looks as if a hard spell of sickness had done him good, so rapid has he recuperated since the crisis passed. He looks fine and says he has not felt so well in years.

Work is progressing on the excavation of the basement for the new Gilliam and Bisbee building at Main and May streets which was halted early in the fall when the steam shovel which had undertaken the job broke down and had to quit. The work is being completed by the pick, shovel and wagon process which, while less spectacular and noisy than the steam shovel, gets there just the same.

Wars are won with
metal—save it.

Iron and steel are needed for tanks, guns, ammunition, ships, railroads, etc. Folks at home must save iron and steel to help win the war.

Use the old range until after the war.

Make your old range do a little longer by having it repaired. If it's past repairing, then the next best step is to buy the range that saves fuel, food and repairs. The Majestic's heat-tight riveting prevents fuel waste; its perfect baking prevents food waste, and its unbreakable malleable iron and rust-resisting charcoal iron make repairs a rare need.

Caution: If your Majestic needs new parts, get them from us. We will supply you with genuine Majestic materials—no light, inferior parts, made by outsiders.
