It is understood that the city dads expect to employ the county road grader for a few days while the ground is still moist to grade up the streets and put them in better shape for navigation. Mayor Vaughan and the council has wisely decided that the proper time to do street work is NOW and the proper way is with modern road making machinery.

The HARP of GOLD Of Minna Irving

When Erin's sons to battle went
Their King was grieved to find
The gray-haired minstrel and his pipes
Alas! were left behind.
Then from a dark and rocky glen
Before his warriors bold,
Appeared a maiden robed in green,
Who bore a harp of gold.

On every long and weary march
O'er bog and mountainside
And every field where rose and fell
The battle's crimson tide,
Still ever fluttered in the van
Her mantle's emerald fold,
As leading on to victory
She played the harp of gold.

Back to his castle came the King,
He brought a fair young queen,
The sweet musician still arrayed
In robes of emerald green.
And if you doubt the ancient tale,
In Erin's flag behold,
The minstrel maiden's cloak of green,
And harp of shining gold.

Life is the apprenticeship to progressive renunciation, to the steady diminution of our claims, of our hopes, of our powers, of our liberty.—Journal.

FLASHLIGHTS

The last thing that a young fellow ought to be afraid of is overwork.

The trouble with night is that it is always sure to be outnumbered.

When a man has friends everything in the world is beautiful; when he is friendless nothing is.

Misery may love company, but our experience has been that mighty few folks want to associate with misery all the time.

Life is a great vessel waiting for us to put something into it and all the time we are trying to get something out of it, instead.

When, in 1506, the cannon boomed in Helligoland, the sound was heard at Hanover, a distance of 107 miles.

The cannonading at Florence was heard at Leghorn, 56 miles away, and that at Genoa over 100 miles.

The greatest distance at which artificial sounds are known to have been heard was on December 4, 1882, when the cannon at Antwerp were heard in Erzbirge, 370 miles distant.

Calladen, by experiments made at Lake Geneva, estimated that a bell of common size, one that could be heard a distance of three to five miles on land, could if submerged in the sea, be heard over 90 miles.
