Through the Looking Glass

By EVELYN NESBIT

While hubby is a vital cog in the realm of business and industry, while he chats with business friends and gets out into the world, wife is doing her curl papers and getting ready to wash up his breakfast dishes.

While hubby sits with his cronies at the club, wife is at home, cooking his dinner and mending his socks. That is just as it should be, says satisfied hubby. If wife should dare to stop serving him, woe to her! For so many ages it has been taken for granted that when a woman marries she becomes her husband's private property, that even in this enlightened era women are still slaving and toiling for their husbands.

It is perfectly fine for women to do their share in keeping the home fires burning. But they must not lose their independence entirely. Go on darning socks, go on mending babies, go on cooking dinners—but, for pity's sake, keep your independence!

The only way to keep your independence is to keep your friends. Don't let your housework absorb you so completely that the only outsiders you see are the tradesfolk and your husband's friends. Keep young and cheerful by maintaining your individuality. In spite of being married, the woman should keep up with the friends of her girlhood and make new friends, too. And if there are men friends among them, there's no harm done, so long as hubby knows about them. When there is to be a family party, hubby and wife both should choose the friends who will be invited. It's more fun that way, you will find.

FOR BETTER ROADS

GREAT ROAD BUILDING YEAR

Thousands of Miles of Improvement Arranged and More Will Surely Follow.

From the passage of the federal aid road act to December 15, 1918, 755 projects were approved by the secretary of agriculture. These projects involve the improvement of 7,867 miles of public roads at a total estimated cost of \$57,632,000, of which the federal government has been requested to contribute \$21,602,000. There have been actually completed to date twelve projects, involving a total of fifty-one miles of road, costing approximately \$617,548, and on which federal aid in the amount of \$260,860.19 was paid.

Altogether there are more than 7,500 miles of road, for which most of the steps preliminary to construction have been taken so far as the bureau of public roads is concerned. Numerous other projects not yet reported to the department have been completed or are under construction, so that the sum total of the road work now in progress under federal aid is greater than appears in this summary.

From Florida to Maine, through the North to the Pacific coast and down to Mexico road building work is going on. Every state has accepted its contribution from the government, and while no organized effort has been made along those lines to the present time, the states are working gradually to the system of national highways.

Coupled with plans already outlined for expenditures on the roads is the legislative program now before congress, which provides for \$500,000,000 to be expended over a period of seven years by federal aid. It is estimated that in the event of the passage of this bill, which would

make available immediately \$75,000,000 for use in federal aid, it would be possible for the government and the states to build 34,000 miles of highways this year if labor could be obtained.

VALUE OF POULTRY MANURE

The droppings from fowls, if carefully saved and applied to the garden soil, will increase the supply of fresh vegetables. Poultry manure is rich in nitrogen and is well worth the effort it requires to save and apply. The droppings from an average farm flock will amount to considerable fertility during the year.

AUTO TAXES TO GO TO ROADS

Committee Appointed in Alabama to Request License Fees Be Applied to Highways.

The Birmingham (Ala.) Automobile club has appointed a legislative committee which is to appear before the state legislature with the request that all automobile license fees and taxes be applied on the cost of improved roads in the state. The funds thus diverted would amount to \$1,500,000 annually.

Getting Them Mixed.

Hazel, age six, dotes on using big words, but she occasionally gets them mixed. She came home from school one day all aglow with sympathy. There was a little boy in her room too poor to buy any paints. "All right, Hazel," said her mother, "you may have the money to buy the paints, only you had better have the teacher give them to the little boy instead of giving them yourself, for fear he might be embarrassed."

"I gave them to Miss Wright, mother," said Hazel that evening in telling of what she had done, "and I told her not to tell the little boy who sent them 'cause I was afraid he might be so astonished."
