

Own Your Own Home

LEARN THE REAL JOY OF LIVING--BUILD A HOME FOR YOUR FAMILY

A stuffy apartment in a dusty, smoky town won't bring your children the health and happiness they are entitled to. Build a home for them, out where the sun shines on flowers; where the bird-songs are wafted on the fresh summer breezes from the rustling shady trees. Out where they can romp and play and grow to strong young manhood and womanhood.

USE TUM-A-LUM SERVICE

"Tum-A-Lum Service" is not merely an expression coined for more effective advertising. It is an actual fact built up by years of experience in the Retail Lumber Business. We have 30 retail lumber yards in Eastern Oregon and Washington and throughout these different yards "Tum-A-Lum Service" must at all times be paramount over all other issues.

The handling of so many different yards means that we cannot---and do not---do business in the old slipshod way but that we have built up a selling organization that must have a system of doing business---and from that system has arisen "Tum-A-Lum Service."

In "Tum-A-Lum Service" we aim at all times to give our patrons the very best in brains that money can buy---and we place the knowledge of these men at your command always.

Free Architectural Service Farm Housing Department

We maintain an Architectural Department---at the head of which are men whose life work has been devoted to the study of Building Problems. It is their duty---and their pleasure---to advise with you in all your Building Problems. We have hundreds of plans for buildings of all kinds always made up and we gladly place these at your disposal as well.

This service is free to you---and that alone means a great saving in actual money to the man who contemplates building.

Our Architectural Department is especially well qualified for the solution of the Farm Housing Question. Whether it is a house, a barn, a granery or a silo, or whatever building necessary on the farm we are prepared to consult with you and offer advice that will mean a satisfactory solution of your problems.

All these different features linked together have built up "Tum-A-Lum Service" until today it stands head and shoulders above anything of its kind in the territory we cover.

OUR COMMUNITY INTEREST

Service of this kind can only be built up and maintained when its promoters have an actual interest in the welfare of the community they represent. **And We Have That.** We are anxious to see each community in which we are located go ahead and will do everything possible to bring it about.

We are prepared to give you aid in many ways and to assist you in your building problems---and our men in charge of our yards will gladly talk it over with you.

What is the barn for my needs

It's a mighty important question---for the right barn will cut your work in half.

To help you solve your problems right, we invite you to make use of the books of plans we have at our office. Come any time---let us figure with you.

A Bungalow is a sensible home to build

There is a "homey" look about a bungalow that makes you glad you own one. Plenty of room in a small one for two---or in the larger ones for a good big family.

Stop in and look over the plans at our office---you'll be surprised how reasonably you can build now.
