TO MAKE PORTLAND WOOL SALE CENTER

(Continued from page one)

Under the agreement between growers and warehousemen, the established warehouses will handle the shipment on the following basis. No transfer charge is to be made. A storage charge of 5 cents a bag will be imposed for the first month, including cost of unloading, weighing, marking bags etc. Thereafter the charge will be 20 cents a month. An additional charge of 1/2 cent per pound a minimum fee, will be made for baling. For preparing the wool for sale the warehouse will impose another minimum charge of 1/2 cent per pound.

Wool growers say that there is no surplus of wool for the warehouses in these days, and that to handle the wool at the minimum figures may mean an actual loss. The warehousemen, however, entered into the agreement readily for the advancement of Portland as a wool center.

The present also adopted resolutions recommending the district create a wool-stitching center, branding the agreement as the propaganda of business cotton producers, and asserting that the cost of wool is a material factor in the exorbitant price of garments—pointing out, as well, that Oregon citizens who are lending aid to the overburdened are indirectly relieving the interests of the wool growers who are conducting one of the most important industries in the state.

Mr. Hunt announces that another meeting of sheepmen will be held in Heppner on Saturday, May 1st, when the plans discussed at Portland will be given further consideration.

Notes of this meeting is being sent to every sheepman in this section of Oregon and it is expected there will be a large and representative gathering.

Those in charge of the Heppner meeting want it to be generally known that every man interested in the sheep and wool industry is expected to be present whether or not he receives a special notice and invitation.

Dan Hanshaw was in town from his Sand Hollow ranch Thursday morning wearing a warm overcoat and glad of it. Mr. Hanshaw thinks it is some spell of weather for April but he says the wheat is holding its own. The young plants are not making much top growth yet but they are spreading out a network of roots that will help to rapid growth once the weather warms up. There is still considerable seeding to do in his neighborhood but with the moisture we have this year there is yet time to make a good crop. Mr. Hanshaw believes.
