NEW REVOLT LOOMS

Outbreak of Junker Army in Pomerania Feared.

Kapp Supporters Scattered Among Big Estates Obviously as Farm Laborers.

Stettin.—Everyone in this section of Pomerania will tell you something is going to happen, but they do not know what.

Former Minister of War Reinhardt, who is trying to find the answer and to devise a lid for threatening outbreaks, feels the same way, but apparently he is satisfied there is no immediate danger. Under his direction the headquarters of two junker outfits have been raided and closed, and the militarized police force has been strengthened. There are no outward signs, except that general unrest indicates a tensiety in the situation.

Everybody is sleeping on his arms, one eye open. No confidence is felt in the Reichswehr, which still retains most of the officers who supported the Kapp forces, and these still have their arms and are scattered among the big estates, obviously as farm laborers, but in reality more like small bands of mercenaries as bodyguards for the junker barons.

The opposing forces are the actual

workmen. On the estates there nominally are two organizations, but it needs only the first hint of a monarchist coup when they will be under one leadership ready for battle.

HONORS BRITISH DEAD

Practical House Dress.

A practical house dress that is easily laundered is cut in one piece with elbow-length kimono sleeves and is laced down the front.

Reckless Reggie.

Nephew—That was a pretty good dinner we had; shall we have a drink now?
Uncle—Ma, ye ken A'm teetotal.
Nephew—A cigar, then.
Uncle—A dinnis smoke.
Nephew—Oh, do something reckless—remember my firm is paying all the expenses!
Uncle—Weel, A think A'll ha'e my boots cleaned here then!—The By-stander.

APRON AND FROCK

Designs Effectively Carried Out in English Prints.

When White Organdie Fichu is Used the Ends Are Tucked Under the Band.

Any number of pretty flowered voile frocks have real aprons of organdie, the strings of which form a sash. Some of these have fichus as well as aprons. Such designs are most effective, observes a fashion writer, when carried out in the fresh, crisp-looking English prints of small design. The aprons are not at all like the panel skirts which have come to be known as apron skirts. They are real aprons, just like a maid's apron, with big strings tying in the back. When a white organdie fichu is used the ends are tucked under the apron band. Sometimes, when the apron is not used, the fichu crosses at the waistline and continues to form a big sash in the back.

A shade of blue chambray known as blue bonnet blue and which is somewhat darker than a French blue, makes very pretty morning dresses for the country. With some white linen and rickrack braid to be used as trimming, very pretty designs may be easily worked out.

A pleasing way of making such a frock is to cut it with a long waist portion hanging loose like a smock and attach to it a straight little skirt. A loose panel gathered with a heading may be placed at either side, the panels, heading and all, edged with the rickrack braid and the frock snatched with white linen. These blue chambray dresses are very pretty made with filled white organdie aprons.

New York.—A captive park bear has the right to claw any one who comes within its range, under a ruling of the appellate division of the New York supreme court. The court denied Blanche Guzzi, thirteen years old, damages sought in a suit against the New York Zoological society, which controls the Bronx zoo. It held she took her chances in pursuing a rolling ball too close to the bear's cage and that the resultant clawing could not be held against the zoo management.

Firestone

Sales of this tire have increased 96% the first six months of this year, proving the balanced tire, the Firestone 3½ has accomplished what Firestone sought for it, more mileage, greater economy, greater comfort, which has been passed on to the public at low cost—most miles per dollar.

Balanced! That means to you more than mere thickness of tread, greater air capacity, more plies of fabric, greater cushioning, or the gauge of the sidewall. It means that all component parts of the Firestone 3½ are scientifically balanced by specialists who have put years of study and practice into a single purpose—to meet your demand in a small car tire. You can now have all four tires on your car give uniform service if they are Firestone.
