

## News About Oregon Industries

The Dalles, Ore., July 27—Juniper Flat, a great level plateau south of here, which contains something over 100 square miles, has never produced anything but wheat. Now it is springing up in orchards, berry patches and diversified farms. This change, which has converted a near-desert to a veritable garden, is all due to the operations of the Wapinita Irrigation Company, which began work here six months ago. Water was brought from the high hills to the east of the plateau and works have now been completed to the point where every farm on the flat can be supplied with abundant water. Juniper Flat is bounded roughly. The principal towns in Juniper Flat are Wapinita, Maupin, Tygh Valley and Wamie. The territory is tributary to The Dalles and is connected with this city by a railroad and stage lines.

Shearar, Ore., July 27—The falls of the Deschutes river near here, which have been the site of nothing but a toll bridge and a white elephant hotel for the past 20 years, are to be harnessed soon by the Eastern Oregon Land Company. Enormous potential electrical energy is now going to waste.

Harrisburg, Ore., July 27—Hundreds of tons of hay recently harvested near here are lying around and may be lost, all because there is no baling wire to be had in this vicinity for love or money.

Hood River, Ore., July 27—It is estimated that this year's apple pack will reach only 50 or 60 per cent of

last year's 2,000,000 box crop, but the fruit is of exceptional quality.

Bend, Ore., July 27—The two sawmills and all the logging camps of the Booth-Kelly Lumber Company have resumed operations. The plant closed down for Independence Day, and the mills have been undergoing repairs since that time.

Portland, Ore., July 27—Iceless refrigerators, manufactured in this city by the Iceless Refrigerator Company, have been on the market less than a year, but are already selling in large quantities throughout the north and middle west. The iceless ice-box works on a principle of water circulation and evaporation.

Astoria, Ore., July 27—A six-side logging camp is planned by the Saddle Mountain Logging Company, now operating a two-side camp in its big tract of timber on the Lewis-Clark railroad. Two other companies are also logging along the lines of this road, and a third is moving in.

Portland, Ore., July 27—This city is destined to be the largest wool manufacturing center in the west, in the opinion of S. W. McClure, manager of the Columbia basin wool warehouse, who was recently a visitor in Portland.

The Portland Trust Company is offering stock in a new motion picture concern to operate in this city.

Work has started in Portland on the three-story \$750,000 building for

the American Can Company. With the completion of the new building, the plant will employ a minimum of 700 people and will turn out "tin cans" for the use of canneries and condensers throughout the Pacific Coast.

Bend, Ore., July 27—A tract of timber 12 miles in length, containing 26,000 acres and located from 32 to 50 miles from Bend, has been purchased by the Brooks-Scanlon Lumber Company for about \$1,000,000. Assurance of the permanence of the lumber industry here is given by the fact that this tract of timber will not be touched for another ten years.

Klamath county will within a few years lead the world in mint production, Oregon's pioneer mint grower.

Dallas, Ore., July 27—The big sawmill of the Willamette Valley Lumber Company, destroyed by fire a short time ago, will be rebuilt immediately. Work of clearing away the wreckage is now under way, and the owners expect to have the mill running to capacity again in three months.

Salem, Ore., July 27—With capital stock of \$500,000 the Moore Dry Kiln Company, organized under the laws of Florida, has filed application for permission to operate in Oregon.

Canyon City, Ore., July 27—A Mormon bishop, who has sunk a mine 200 feet deep, recently brought in several hundred dollars worth of wire gold. The bishop has been at work on his mine for two years.

Portland, Ore., July 27—Ralph Schneelock & Co. of this city have secured the contract for constructing the irrigation system of the

North Unit district. A \$5,000,000 bond issue for this project was voted last March.

The keel of the second of seven 12,000-ton tank steamers will be laid by the Northwest Bridge & Iron Company of Portland within the next two weeks. Only 500 men are now employed in the plant, but several thousand men will be required when steel production and transportation are improved sufficiently to allow the yard to operate at full blast.

After building the machinery for the seven largest milk condensaries on the Pacific Coast, the Schaefer-Copper Works of Portland is continuing the good work by equipping the packing plant of the Puwallup & Sumner Fruit Growers' Canning Company at Puwallup, Wash. The Schaefer plant has just purchased new buildings and equipment and doubled its capacity.

Increasing cost of wood and coal is proving highly beneficial to the Hall Gas Furnace Company of Portland. The mounting prices of solid fuel have caused such a demand for gas furnaces that the capacity of the Hall plant has had to be doubled to supply orders.

Though it has been running only seven months, the manufacturing plant of G. J. Mallon of Portland is now marketing its product throughout the Pacific Coast. The factory specializes in rolls and slides for the rapid handling of lumber on motor trucks.

The Portland Wicker Furniture Manufacturing Company newly established here, is the first industry in its particular line to operate here. The even upholstery, in the local factory. The company started operation at Oronco, Ore., three years ago. Product of this company includes a

wide variety of Wicker furniture, each article of which is completed.

By the acquisition of additional factory and show room space, the Hancock Sash & Door Company has enlarged its quarters to three times the original size. This concern now has an annual payroll of \$25,000.

### Appreciation.

Thou hast made me known to friends whom I knew not, Thou hast given me seats in homes not my own, Thou hast brought the distant near and made a brother of the stranger. When one knows thee, then alien there is none, then no door is shut. Oh grant me thy prayer that I may never lose the bliss of the touch of the one, in the clay of the many.—Tazora.

### NOTICE

Notice is hereby given that I, the undersigned, under the laws of the state of Oregon, have taken up the animals hereinafter described while running at large on my premises in Morrow county, near Castle Rock, Oregon, to-wit:

- 1 black gelding, weight about 900 pounds, branded U on left shoulder.
  - 1 sorrel mare, weight about 800 pounds, with sucking colt, mare branded with anchor on left hip, colt unbranded.
  - 1 dark brown mule, weight about 800 pounds, branded 2 left shoulder.
  - 1 gray mare weight 1200 pounds, branded M on left shoulder.
  - 1 sorrel yearling colt, branded I.
- That I will on Saturday, July 31, 1920, at the hour of 10:00 o'clock in the forenoon of said day, unless the same shall have been redeemed, at

my ranch in Juniper canyon, about 15 miles north of Lexington, Oregon, in said county, sell each and all of said animals to the highest and best bidder for cash in hand for the purpose of paying the costs of taking up, holding and selling said animals together with reasonable damages for the injury caused by said animals running at large on said premises.

James Carly.  
Dated and first published this 13th day of July, 1920.

### Danger! Beware!

A woman who was too economical to subscribe for her home paper sent her little son to borrow the copy taken by her neighbor. In his haste the boy ran over a four dollar stand of bees and in ten minutes looked like a warty Summer squash. His cries reached his father, who ran to his assistance, and falling to notice a barbed wire fence, ran into it breaking it down, cutting a handful of flesh from his anatomy and ruining a five dollar pair of pants. The old cow took advantage of the gap in the fence and got into the cornfield and killed herself eating corn. Hearing the racket, the mother ran, upset a four gallon churn of rich cream into a basket of kittens, destroying the whole litter. In her hurry she dropped and broke, past all hope of mending, a twenty-five dollar set of false teeth. The baby, left alone, crawled through the spilled cream and into the parlor, ruining a twenty dollar carpet. During the excitement the eldest daughter ran away with the hired man, the dog broke up eleven setting hens and the calves got out and chewed the tails off of four fine shirts.

And all to save fifty cents!  
Moral: Subscribe for the Herald at once and protect yourself from such calamities.

# High Prices, Crops, Lower Prices LUMBER

Lumber Reduced 30%—New Price List Just Started—May Advance Soon, Due to Fall Demand

## Put Today's Prosperity Into Much-Needed Buildings

District Manager Cronk of the Tum-A-Lum Lumber Company states that he is working on List No. 12, which is the third and latest decline in lumber prices this year. Manager Cronk says that much building is being talked of this year, but that shortage of cars and workmen may delay fall building until bad weather unless early actions taken and building plans are not left till the last minute as is usually the case.

Contractors in Heppner, Lexington and Ione are already busy and have much work ahead in some cases.

Almost certain advances in lumber prices and scarcity of labor will make the "Last Minute" builder wish he had planned and started earlier.

"Size up your crops" and PLAN "AFTER HARVEST BUILDING" NOW, is Manager Cronk's advice. Tum-A-Lum Department furnishes in 48 hours when required, plan and estimate of cost of buildings for Homes and Farms. No obligation to buy. District Manager Cronk has the Tum-A-Lum plan books of Homes (pictures of interiors) and Farm Buildings which he will be glad to explain.

Read this offer backed by Tum-A-Lum capital of One Million Dollars

Furnish complete Plans for HOMES and FARM BUILDINGS. Our GUARANTEED PRICE FOR ALL MATERIAL covers everything needed in our line. NO EXTRAS. Haul back material left over and receive credit. No Mail Order House ever made a similar offer.

## Here's the Secret Of that wonderful "round" tone

On hearing The Brunswick for the first time every music lover exclaims at its wonderful full, round, life-like tones. Back of the grill is the secret—an oval horn built entirely of wood on the violin principle. Sound waves are amplified and sent out to the listener in correct acoustical "circles." No metal touches them. That's the secret!
