DODGE BROTHERS BUSINESS CAR

THE ROUND-UP

Pendleton, Ore., September.—New relay strings from California, promising even faster relay and pony express races than heretofore, will be seen at the 1920 Round-Up which opens Thursday, September 23 and shows for three days. These strings will compete against the old favorites

who have thrilled Round-Up audiences for years past.

Indians of the Umatilla reservation in spite of the high cost of getting Indians to perform, will be in the parades and much in evidence at the show this year. There will be at least 500 of the natives and their cayuses in the parades, lending that element of savage finery that is so

appealing to those who come here to see the real west.

Roads leading to Pendleton are being put in the best possible condition for auto travel and each will be generously marked with signs to point the correct way to the Round-Up city. Special efforts have been made to provide ample accommodations for auto tourists and they are also to

and enough gasoline here to start them homeward with a full tank.

The Truth About Alaska

The demand of the pulp industry is for an assured permanent supply of timber and properly allocated water power under stable tenure; both of these can be found in the Tongass National Forest, in southeastern Alaska.

Southeastern Alaska is favored with numerous deep water harbors open the year round with comparatively smooth waters in straits and passages. It is advantageously located with reference to shipments by rail and water to the United States and water shipments to the Orient, South America and Australia.

With her enormous forests of rapidly growing species suitable for pulp, her water power, and her tidewater shipment of manufactured products, Alaska will undoubtedly become one of the principal paper sources of the United States.

Aside from fuel, the more important operating supplies for pulp mills in general are lime or limestones, sulphur, soda ash, salt cake, grindstones, bleaching agents, and repair materials. Alaska has numerous known deposits of lime rock that would furnish very high grades of lime.

According to Government agriculture experts in Alaska "it is possible to grow magnificent vegetables in all parts of Alaska, except on the tundras mountains. To Alaskas they are no novelty, but to strangers unacquainted with the country they are a constant surprise."

The harbors of southeastern Alaska are ice free the year round.

The Forest Products Laboratory, Madison, Wisconsin, has tested out Western hemlock and Sitka spruce for use as pulp wood and found that both species make excellent paper.

According to the Southern California movie, Alaska is all fur-clad eskimos, dog teams and snow fields, and yet fine crops of vegetables, berries and grain are grown each year in Alaska.

The large amounts of cottonwood in southeastern Alaska if like the other species of cottonwoods, might be used to make excellent paper, in addition to the enormous resources of hemlock and spruce timber found.

Although 400,000,000 feet of timber has been sold and cut from the National Forests of Alaska to date, not a stick of timber for commercial pulpwood has ever been cut, although there are wonderful possibilities for pulp plants in that country.

The successful installation of pulp and paper plants in British Columbia after a number of trials has proved the practicability of exploitation of this general region. They represent a logical progressive exploitation of known proportions. The conditions of acquirement of timber in British Columbia are no more advantageous than those of Alaska, nor are they likely to become so.

Roseburg Threatened With Suit

Because the city of Roseburg refused to pay the local water and light company for both water and light furnished the city hall, it being alleged that a verbal agreement having been in effect there should be no charges for this service, a suit is threatened in the courts by the water company.

LET HIM R. J. P.

Breathes there a man with soul so dead,
Who never to himself hath said:
"My trade of late is getting bad,
I'll try another ten inch ad."
If such there be, go mark him well,
For him no bank account shalt swell;
No angel watch the golden stair
To welcome home a millionaire.
The man who never asks for trade
By least line or ad displayed
Cares more for rest than worldly gain
And patronage but gives him pain.
Tread lightly, friends, let no rude
Sound
Disturb his solitude profound;
Here let him live in calm repose,
Unought, except by men he owns,
And when he dies go plant him deep,
That naught may break his dream-
less sleep;
Wherein no clamor may dispel
The quiet that he loved so well;
And that the world may know its
- loss,
Place on his grave a wreath of moss,
And on a stone above: "Here lies
A clump who would't advertise."
—Exchange—

"NOW-A-DAYS"

says the Good Judge

A man can get a heap more satisfaction from a small chew of this class of tobacco, than he ever could get from a big chew of the old kind.

He finds it costs less, too. The good tobacco taste lasts so much longer he doesn't need to have a fresh chew nearly as often.

Any man who uses the Real Tobacco Chew will tell you that.

Put up in two styles

W-B CUT is a long fine-cut tobacco
RIGHT CUT is a short-cut tobacco

Weyman-Braton Company, 807 Broadway, New York City

Fine Ranch Bargain

160-acre creek ranch, 40 acres ditch, good 7-room house, good barn and other out-buildings.

School adjoining.

Bargain if taken at once. Easy terms.

Reproduces All Tonal Beauties

STILL the very latest and most advanced in phonographs is The Brunswick. This remarkable instrument has attracted nation-wide attention. Chiefly because of the Brunswick Method of Reproduction. This new development brings finer tone for every record, whatever make. No other instrument has these advanced ideas.

Now Brunswick Records

We bring now as a further contribution to the phonographic art our own make of records. We include all the fine standards of today, yet add what we consider a vast improvement. And this we know will be the verdict of the public.

This is the secret—each Brunswick Record is interpreted by a noted director or an accomplished artist technically trained in the art of recording. Thus we unite the talent of the artist with the genius of the composer.

Brunswick

We feel sure that you will recognize the betterment brought out by this idea. We want you to judge Brunswick Records by those same severe tests with which people have judged Brunswick Phonographs. And that is by comparison.
Remember—Brunswick Records will play on any phonograph with steel or fibre needles.

Just Hear The Brunswick and Be Convinced

OSCAR OTTO
Music House

Let's settle this right now!

No man ever smoked a better cigarette than Camel!

You'll find Camels unequalled by any cigarette in the world at any price because Camels combine every feature that can make a cigarette supreme!

Camels expert blend of choice Turkish and choice Domestic tobaccos puts Camels in a class by themselves. Their smoothness will appeal to you, and permit you to smoke liberally without tiring your taste!

Camels leave no unpleasant cigarette aftertaste nor unpleasant cigarette odor!

You'll prefer Camels blend to either kind of tobacco smoked straight!

Camels are sold everywhere in scientifically sealed packages of 20 cigarettes for 20 cents, or ten packs of 200 cigarettes in a glass-paper-covered carton. We strongly recommend this carton for the home or office supply or when you travel.
