

# Are You One of the 21?

Uncle Sam says that there are 121 families for every 100 dwellings in this country.

Think of the doubling-up; the dividing of families; the breaking of home life, made necessary to give each person even a shelter. Such a condition is a menace to the welfare of individuals, of communities and of the entire nation.

Most people who build must borrow at least part of the money, and loaning money for building homes is one of the safest of investments.

We shall be glad to talk it over with you at any time

#### A MEASURE THAT SHOULD CARRY

One measure to be voted on at the coming election in Morrow county is that providing for an increase in the salary of the school superintendent. The office is one of the most important in the county because the incumbent is the head of the school system and the public school is the most important institution we have. It is really a disgrace to a county like Morrow to ask any man or woman who is qualified to fill this office to do so for the present salary of \$1200. The work requires all of the time of the superintendent for the entire year. High school girls are drawing \$125 per month for teaching in several country districts while the highly trained and long experienced educator now holding the superintendent's office receives but \$100. The condition should be remedied. Vote for the increase.
