Professional trip to the mountainous district of southern Morrow county last week where he performed a major surgical operation. The operation was eminently successful, but, as sometimes happens, the patient—ah—died. The patient was a fine, big, fat buck deer, and again the Herald family had heat for dinner.

This writer has heard reports of other Heppner hunters returning laden with the spoils of the chase, but as we have been furnished with no proofs of these stories we hesitate to publish any details. The Herald is very particular about being accurate in this hunting story business.

WHO KNOWS THIS RING?

The ring here photographed, of 14-carat gold and without trademark, was found on the body of an American soldier now buried in France. The war department requests that the jeweler who made it, or anyone who recognizes it, communicate with the Quartermaster General, Cemetery Division, Washington, D. C., so that the dead hero may be definitely identified and the ring returned to his relatives.
