

Thanksgiving Day

This good old New England custom of counting blessings and giving thanks therefore, is becoming world-wide in observance.

There are many things to be thankful for if you give the matter careful attention. If you have opened an account at our bank and regularly deposited your savings, you can be thankful for the snug sum you now have on hand for emergency. If you have not done that, you can at least be thankful for the fact that the opportunity is still at hand for you to start an account, and that a good, reliable bank is ready to care for your deposits. If you can't be thankful for that—well, you can at least be thankful that you are not a turkey!

What the Sphinx Says

By Newton Newkirk.

"Where there's much smoke there's often an imperfect Cabbage cigar—or a smelly old pipe."

Jury Cuts Down Turner Claim

A damage suit involving a quantity of wheat, in which E. H. Turner was plaintiff and Gustave Friedwald was defendant, was tried in Judge Phelps' court last Thursday. The amount claimed by Mr. Turner was \$840.00.

After hearing the evidence the jury returned a verdict in favor of the plaintiff in the sum of \$375.00.

Woodson & Sweck represented the plaintiff in the case, and Sam E. Van Vactor appeared for the defendant.

The blue stone lime method of seed treatment is preferable to formaldehyde for late fall planting. This is one of the many helpful hints contained in the circular published by the department of plant pathology, O. A. C. This circular (No. 176) is on the treatment of seed for smut prevention, and may be had by writing the college.

Saved His Horse

Mr. R. L. McIntyre, of Altoona, Ala., says: "Dr. LeGear's Antiseptic Healing Powder quickly healed some bad wire cuts on my horse. I defy any stranger to find the slightest scar on him."

Dr. LeGear's Advice and Remedy saved this valuable animal. He warns you not to leave a wound, sore, or cut exposed, but to dust on Dr. LeGear's Antiseptic Healing Powder, which instantly forms an antiseptic protection and promotes healthy healing.

In his 28 years of Veterinary Practice and Expert Poultry Breeding, Dr. LeGear has compounded a remedy for every curable ailment of stock or poultry. Whenever they require a remedy, it will pay you, as it did Mr. McIntyre, to purchase from your dealer the proper Dr. LeGear remedy on a satisfaction or money back guarantee.

LOCAL HAPPENINGS

From Neighboring Towns

BOARDMAN

The Boardman community continues to increase in population, three families having just moved in: T. V. Deuprey and family of Willow Creek taking charge of the Jack Graham place west of town; Heber Hopkins and family from Bains have purchased the Hagan place in the east end; and N. A. Macomber and family from Pilot Rock, one of the parties in the Boardman garage recently purchased by Macomber Bros. and Everett.

Word has been received from the State Chamber of Commerce that J. W. Brewer, field warden, will be in

ALWAYS AT WORK

Man's Network of Brains Never Really at Rest.

Every Action of the Body Controlled by Thousands of Nerves of Which Few Persons Have Any Adequate Conception.

It is only within recent times that the brain has been recognized as a thinking organ, the anciently having located the thinker in the liver.

But even in the good old days there were physiologists who regarded the kidneys as the real seat of the mind. Even nowadays we speak of a person as being "of the same kidney" as ourselves.

We speak of a coward as a "white-livered" individual. An ill-tempered person we call "splenic," because in earlier days the emotion of anger was supposed to be engendered in the spleen. Indeed, the word spleen is in our language a synonym for angry irritability.

It was formerly imagined that the gentle emotions were engendered in the heart, an idea that even now holds its grip to a considerable extent. Thus we speak of a "kind-hearted" person or of a "loving heart." The lover calls his lady fair his "sweetheart." To refer to the hearts that decorate every valentine seems superfluous.

As a matter of fact, the heart is in a certain sense an emotional center. Joy makes it flutter; fright will cause it for a moment or two to stop beating.

This is because there is in the heart a considerable assemblage of the "ganglia," which are in effect tiny brains, being mainly composed of the same sort of gray matter that goes to make up the cerebral cortex. Acting as a group, it is their business to control the rhythmic pulsations of the heart.

These little brains, strung like beads along the sympathetic nerve, are distributed through the body. One finds the biggest bunch of them in a complex interlacement of nerves behind the stomach. This is the "solar plexus" we have heard so much about. It is, of course, a highly sensitive piece of apparatus, so much so that a hard blow in the stomach may kill a man.

You have probably noticed that keen anxiety will give you an uncomfortable and even sickish feeling in the region of the stomach. The solar plexus is responsible. It is perfectly true that some of your thinking is done for you by your liver, your heart, your kidneys and other parts of our body. Ninety-nine per cent of the things you do are done automatically and without conscious effort of the mind. The thousands of little brains distributed throughout your body are at work helping. They know their business better than you know it. Try to fix your mind on the tying of your four-in-hand scarf and you are likely to find yourself doing it much more clumsily than if you "let the thing do itself."

Arlington Celebrates

Arlington is celebrating today the fact that the State Highway Commission has designated that town as the point where the John Day Highway will connect with the Columbia River Highway. There will be a big goose dinner and a grand ball, and Dr. Donnelly, who has won the chief honor for road development, will be presented with a gold headed cane or some other valuable token of appreciation.
