YOUR HOME TOWN PAPER

When people want to interest distant friends in their home town they send away copies of the local newspaper. When anyone wants to know what kind of a place a distant town is he sends for a copy of the local newspaper. When the merchants are full of courage and advertise freely an impression is created among the many people outside the town who see the paper that this is an exceedingly bright and wide-awake business town. If, at times, the merchants let up a little on the advertising the town does not look so good to outsiders. Your paper, then, is the representative — the spokesman — for

your community. As your publication appears to those outside your immediate local city, so must your town paper appear to them. Editorials and items of news all have their place, but the stranger to your town will closely follow the advertisements carried in your paper, for by this means he judges the character and extent of the business of the community. —Lander (Wyo.) State Journal.

British After Trade.

British merchants are planning exhibitions in large cities of China to recover their commercial position lost during the war.

Fill Fountain Pen Without Dropper.

How can the fountain pen be filled without having a dropper handy? A man does not usually carry a dropper with him. But in the crowd at hand there is likely to be someone who has a self-filling fountain pen. If he can be induced to lend it for a moment the trick is done, says the Popular Science Monthly.

Take the self-filling pen and steep it in ink until it is full. Assure the owner that no damage will be done to the point of his valuable self-filler and permit him to watch the following performance:

Press the lever of the borrowed pen, and through its point discharge its contents of ink into the barrel of your own pen. Then refill the borrowed pen and return it.

Emergency Call.

"We've got lizards in our basement, and I just killed a snake in the front yard. Can't you send some one out right away to kill them?" wailed a voice over the telephone to William F. Cleary, clerk of the board of public works.

It was a woman's voice, or Mr. Cleary would have sent a request to the board of public safety that one of the morals squads be sent out with a suggestion that they might find whatever it was that made people "see snakes." However, he asked the board to send out an ordinary policeman to kill the reptiles. —Indianapolis News.

Eat Arsenic With Impunity.

In some parts of Austria, and especially in theilly country toward Hungary, there exists the extraordinary custom of eating arsenic. There, however, the peasants are so accustomed to its use that they are able to take huge quantities without harm, and they assert that the remarkable beauty of their women folk is entirely due to constant drugging with arsenic.

The Telephone Company and Wages

Salaries and wages constitute 72% of the expense of this company. Out of every dollar spent by the telephone company, 72 cents is turned over to its employees in the form of compensation. It is our purpose to retain competent and experienced employees. An efficient and contented organization is the main factor in good service.

The deficit in earnings which we have experienced in Oregon has been largely augmented by necessary increases to our employees. It will be of interest to our Oregon patrons to know what our increased expense for salaries and wages in Oregon has been since 1916 as shown in one of the exhibits filed with the Public Service Commission in connection with our recent application for an increase in telephone rates.

Increase in wages of Plant employees, present over 1916.....	\$ 307,000
Increase in wages of Traffic (operating) employees, present over 1916	581,000
Increase in wages of Commercial employees, present over 1916	98,000
Total annual increase in wages.....	\$1,086,000

Although these large increases in wages have been made they represent only approximately a 60% increase over pre-war wages, as compared with increases of over 100% in many trades and occupations requiring no greater skill or preparation on the part of the worker. We do not think our employees' wages should be reduced under present conditions or under conditions now possible to forecast.
