#### COIN WON'T BUY LOVE

Woman Turns Down Husband Who Deserted Her.

Prefers Work in Department Store to Life of Ease With Father of Her Children.

Chicago,—Mrs. Margaret Reeves, mother of 11 children, can leave her work in a loop department store and have servants and a thousand other things she has craved-if she wants

She doesn't want to. She's decided to keep plugging along at her gro-cery counter until she dies.

The reason for Mrs, Reeves' choice Is that if she leaves her job for the ranch she will be compelled to live with her husband, James Reeves, who deserted her eight years ago.

Her children were small then, and Mr. and Mrs. Reeves were having a hard time of it, but Mrs. Reeves always managed, some way, somehow, tutil her husband slid our with every cent in the house-\$100 and a few

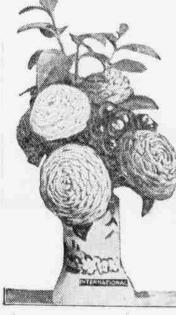

Thereafter, Mrs. Reeves continued to manage, but not so well. She went to work. The children—those who were old enough-worked, too. Then one by one they died, until only four were left.

A week ago Reeves experienced a change of heart and wired Chief of Detectives Hughes that out in Pocatello, Idaho, where he had gone, he had been lucky. He said he had a ranch, all paid for, a lot of money and two kittens for the twins.

By the time Mrs. Reeves gets around to write her husband he will know the twins are dead. And she'll tell him her love died with the twins and with the other five children who

But she will add, on second thought, that they are still in poverty, although happy without him, and some of the money he has been bragging about can be used.

#### MADE OF VEGETABLES

It would need the discerning eye of a flower lover to tell at first glance that the specimens pictured here are not flowers. They are samples of the wighted of M. Leopold Leone, an are the alry French flower girdles the Italian ex-soldier and chef, whose young girls are wearing on their party converting of potatoes, turnips and other vegetables into beautiful "flowers" is at present the talk of London, The flowers pictured here are samples of M. Leone's finished work,

#### TO WASH DELICATE FABRICS

Soapbark, Starch Water or Bran Water Advised by Government Home Economics Specialists.

When the action of soap is likely to njure a delicate color, use somplark. starch water, or bran water, advise economics specialists of the United States Department of Agricul-

Soupbark, although not a sonp, when heated in water will form suds. To prepare it for use, boil for ten minutes a cup of the back with 1 quart of water; then cool and strain the liquid. The "sonpy" water may be used full strength for the sponging, or diluted for washing; half of this amount is enough for 1/2 tab of water. Since the liquid is brownish, it should be used only on dark colored goods.

Starch water is especially good for cleaning delicate cotton fabrics. This is usually made by adding thin starch paste to the wash water. Water in which rice has been boiled, if it is not discolored, may be used instead. If it is not desirable to have the material starched slightly, it must be rinsed in salt water.

Bran water, made in the same way is sompbork solution, is useful with colors that are likely to fade. It does not give suils, but cleans like starch

#### PLUSH USED INSTEAD OF FUR

Material Affords Most Unusual Effects in Trimming for Suits, Dresses, Skirts.

In trimmings we have as great atitude as in materials. Plush-like fabrics are profusely used in lieu of fur. Most unusual are the effects obtained by the application of huge plush flowers to suits and dresses. They may cover an entire sult skirt and reappear on the jacket at the hips, collar and cuffs. Enormous puffs of plush are used to form large collars as well as to edge the bottoms of conts.

In contrast to these heavy trimmings

frocks. They are seen on silver of delicately tinted ribbons, and the most exquisite color effects are obtained through their use. The flowers may be strewn along the edge of a ribbon girdle which is little more than a thread of color. Small, dainty flowers such as moss rose buds and margueites are chosen for these girdles. The silver ribbons with picot edges in color make attractive girdles of this sort The color of the edge is brought out again in the flowers scuttered over the ribbon.

#### KNOW MONEY BY PICTURES

How Those Who Handle Many Bills Find It Comparatively Easy to Tell Bad Ones.

It is a comparatively easy matter to become an expert in the quick handling of money and also to detect bills that have been raised, according to those who have tried. A large proportion of the bills now in circulation are federal reserve notes. Those in amon use have identification char-De Largy explained later that he acteristics, in addition to the numerals, easy to memorize,

Cashiers who handle large and small tills rapidly usually memorize the portruit on the bills, which are large enough to be unmistakable as the mafor mark of identification, with the numerals as the minor aid. The two combined are well-nigh infallible, save in the case of clever counterfeits.

As the raising of bills is accomplished with the numerals, familiarity with the portraits, and comparison, will verify the proper denomination of the bills. The portraits on the federal reserve bills in everyday use are as

# U. S. TO HANDLE FOOD MARKETING

Federal Trade Commission Favors Supervision by Government Authorities.

#### WOULD ELIMINATE HOARDING

Establishment of Central Markets for Perishable Food Products and Creation of Licensing System Urged by Board.

Washington.-Establishment of central markets for perishable food prod-ucts in all large cities and the setting up of a federal licensing system applicable to all dealers in such foods at those markets are proposed by the federal trade commission in its annual report to congress,

The commission's conclusions are ased on an investigation covering many months, and it declares that federal action is necessary to obtain effective regulation and to avoid unfair and wasteful practices with the

consequent effect on prices. In the present system the commission sees as a hindrance to the proper passage of perishables from the producer to the consumer certain inter-trade dealings which it believes should be eliminated, and it suggests that the handling of these products be surrounded by numerous regulations and restrictions such as the recording of available supplies and the dating of cold-storage periods and provisions for auction marketing.

Would Eliminate Hoarding. Facilities should be made adequate the commission says, to enable the producer to ship freely into the cen-tral markets and "with proper pro-tection of his interests." The markering system should be so covered that obtestionable he eliminated and proper co-ordination of transportation facilities should be accomplished to make deliveries certain when required.

The commission says that "the needed reforms can hardly be expected to be accomplished by the initiative of the deniers," and asserts that state and municipal authorities lack plequate power to effectively regulate the handling of the food supplies.

Big Jump in Flour Profits. Turning to wheat products, the comnission says it has found that conentration of the milling industry has ountry for flour." The commission.

\$20,000,000 in the same period. Reporting on the operation of the dinmeter. Webb-Pomerene act, permitting formation of associations for export trade, the commission informs congress that this net has served as "n decided factor" in promoting the regress of American manufacturers in foreign markets. The commission says that during the year 43 associa tions, comprising approximately 732 oncerns, whose offices and plants were distributed over 43 states, reported to it as operating under the export art.

The commission says also that the aw, instead of increasing the strength of the already great American Industrial establishments, has enabled the naller concerns to band together in a fashion to push fully organized export trade in a keenly competitive manner, which they are not able to do at home. To this extent, the commission believes, the law has worked to the great advantage of the small

#### BUYS WATCHES FOR SUBJECTS

Indian Princess Wants Her People Not to Rely on Sun for Time of Day.

Coneva.-The begum (princess) of Bhopai, India, who bought 4,000 stiple in the central Indian state when she visited Switzerland in 1911, has just sent for another lot of 2,500 timedeces. She wants her subjects to be umciual and not rely on the sun for the time of day.

The Mohammed princess of Bhopal probably is the only female ruler of a state in India, and is also called sultan. The throne of Bhopal has descended in a female line for more than 75 years and many of the begums have displayed modern tendencies in look-Inc after the welfare of their subjects who number 665,000. Sultan Jahan segum succeeded to the throne in
