Deep Plowing, Thorough Cultivation, Secret of Good Crops.

Mr. Cutforth, who raises wheat on an extensive scale three and one-half miles north of Lexington, was a business visitor here Saturday. Mr. Cutforth has 500 or 600 acres of wheat which is looking fine and is busy getting about the same amount of summer fallow ground in shape.

He thinks Morow county never had so fine a prospect for a wheat crop as at present, and says that so far as his neighborhood is concerned nothing that ever has happened there in the way of climatic conditions, can prevent them from having a big crop this year. He is a strong

believer in deep plowing and thorough cultivation and this, he says, will insure a good crop in the Lexington country every time. He is now plowing his summer fallow nine inches deep and says the present moisture is ample to insure a good crop in 1922 if it is conserved properly as his methods will do.

Chas. H. Latourell, Ford representative here, is making a demonstration of the Fordson tractor on Mr. Cutforth's ranch today.

Women's Sphere.

Eventually we may be forced to concede that woman's sphere is this one on which we live.—San Diego Tribune.
