OREGON HAY GROWERS PERFECT ORGANIZATION

Organization of the Oregon Hay growers association was perfected at Hermiston Monday evening, May 16th when a canvas of the acreage signed up and showed that more than 4000 acres were then pledged to the movement with indications that 2500 additional acres will be signed up this season. This will give the association a good start off with the control of the marketing of some 29,000 tons of hay.

Farmers in Malheur and Deschutes counties are said to be very much interested in the movement and it is

expected the organization will be extended to those counties in the near future.

The object of the association is to assist in marketing the hay by providing for the regular distribution of the commodity in such a way as will tend to eliminate the high prices the ultimate consumer has often been forced to pay in the past.

The association will specialize in grading inspecting and shipping hay, thereby being able to standardize the product, insuring the buyer exactly the grade of hay he pays for.
