TELEPHONE SERVICE FOR ROSE FESTIVAL

The Pacific Telephone and Telegraph company is installing and will operate for the benefit of the Rose Festival and the thousands of visitors during the Rose Festival week in Portland, a sound amplifying apparatus which will convey to and distribute over the festival center grounds musical programs, addresses, announcements etc. from distant locations about the city.

Two experts from the east have been in Portland for the last two weeks installing the necessary apparatus in order to furnish this unique entertainment to the visitors during Rose Festival Week. The Festival Committee is arranging to feature this apparatus as the means of entertainment to all visitors. Hereafter an address or a musical program has been available only to the limited number who could crowd inside a hall or within the range of a speaker's voice. With the amplifying apparatus furnished by the telephone company a complete address or musical program will be spread over several city blocks and every one who wishes to will be able to understand every word spoken and hear every musical note of the program.

The apparatus consists of a system of motors, generators, wires, transmitters, amplifiers and other electrical equipment, weighing several tons and filling several rooms. The machinery is very delicate, requiring the utmost care in its operation. A drop of water at a certain point or a piece of metal the size of a pin head will put the whole plant out of business. The transmitter, amplifier and horns are very delicately adjusted and sensitive to the slightest change in current and resistance in the circuits. None of the apparatus will be visible at the festival center, except the suspended horns, and will give the impression of sound created out of the air.

This apparatus was given its greatest outdoor test at the inauguration of President Harding at Washington March 4th, where the voice of President Harding in the inaugural address was distributed over a radius of six blocks from the Capitol steps and could even be heard distinctly on the steps of the Congressional library, more than 1200 feet from the inaugural platform. At all previous presidential inaugurations, only a few hundred people who were fortunate enough to secure seats directly in front of and near the inaugural platform were able to hear the inaugural address. But on March 4, 1921, with the amplifier apparatus in service on the Capitol grounds, 125,000 people, the largest crowd that ever heard a man's voice at one time, distinctly heard President Harding's address. It is this same apparatus which has been forwarded to Portland and will be placed in service for the entertainment of those who attend the Rose Festival in June.

The offer of the Pacific Telephone and Telegraph company to furnish and operate this apparatus for the Rose Festival Committee will insure a distinctly new entertainment for the Rose show. The expense for installation of the necessary electrical apparatus has precluded the use of this equipment at any except the largest and most notable gatherings, such as the Republican and Democratic conventions last year and the inaugural ceremonies of President Harding. The Rose Festival Committee is to be congratulated on their success in securing this as the greatest entertaining feature of the 1921 Festival.

INTERNAL ORGANS MISPLACED

Hospital Patient in Vermont Has Heart, Liver and Stomach on Wrong Side.

Rutland, Vt.—William Bowen of West Charleston, Vt., twenty-six, a patient at the Vermont sanitarium in Pittsford, is a curiosity to the medical world.

All his internal organs are on the wrong side. He has tuberculosis, but this has nothing to do with the misplaced organs.

The transposition was discovered when an x-ray picture was taken by Dr. Clarence T. Ball here to determine the condition of the lungs. It had been known that Bowen's heart was not in the customary place, but the x-ray showed the stomach on the opposite side, the liver on the left instead of the right and the vermiform appendix on the left.

Bowen is expected to recover from tuberculosis.

OREGON GETS MORE GIRLS THAN BOYS

(Telegram Washington Bureau) WASHINGTON, May 28. (Special)—Oregon grew in population in the last ten year period 116,624. Women increased greatly in the count during the decade and the foreign born showed a decrease.

The details of the population as compared with ten years ago, as announced by the census bureau this morning follow:

The total population of the state, 783,383, comprises 416,334 males and 367,049 females. The corresponding figures for 1910 were: Total, 672,765; males 384,265, females 288,500.

During the decade the total population increased by 16.4 per cent, the male population by 8.3 per cent and the female population by 27.2 per cent. The ratio of males to 100 females decreased from 133.2 in 1910 to 113.4 in 1920.

The distribution of population according to color or race in 1920 was as follows: White 769,146, Indian 4590, Japanese 4151, Chinese 3090, Negro 2144, all other (Filipino, Hindu, Korean and Hawaiian) 268. The corresponding figures for 1910 were White 655,090, Indian 5090, Japanese 3413, Chinese 7363, negro 1492, all other 312.

During the decade the rate of increase in the white population was 17.4 per cent, in the Japanese population 21.4 per cent; but the Indian, Chinese and all other population decreased, the falling off in Chinese population from 7363 to 3090, or 58 per cent being noteworthy.

The foreign born white population numbered 102,151 in 1920 as against 105,001 in 1910. This element of the population constituted 13 per cent of the total in 1920 as against 15.3 per cent in 1910.

CARD OF THANKS

We desire to express our sincere thanks and appreciation to our friends and neighbors for the kindly sympathy extended during the illness and at the time of the death and burial of our beloved husband father, son and brother.

Mrs. May F. Case,
Don Case,
Velma Case,
Mrs. Mary L. Case and family

Threshing Costs

How Much Are You Paying to Put Your Grain in the Sack

The Experience Of Ed Reed
A Farmer Living One Mile East of Mohler is interest-

ing because it shows what can be accomplished by using a Fordson Tractor with a small separator.

Mr. Reed has given to the Nezperce Motor & Supply Co., of Nezperce, Idaho, the following interesting information concerning the accomplishments of a Fordson Tractor purchased from them, during the 1920 threshing season.

He has kept accurate account of the threshing of 180 acres spring grain and 20 acres fall grain, which he threshed in six days with a crew of 8 men. His cost is as follows:

Wages, 5 men at \$6, 3 men at \$8 for 6 days,	\$324.00
Meals at 50 cents for 7 days,	84.00
2 barrels kerosene	29.45
6 quarts oil	2.25
Int. on investment and depreciation at \$7.50 per day,	45.00
Total Cost,	\$484.70

The average yield was 20 bushels per acre, or a total of 4000 bushels. His average cost of threshing was 12 cents per bushel. He had 5 settings and all the time lost for adjustments was 10 minutes.

The Fordson furnishes an abundance of power is economical and easy to handle, not only for threshing, but for all kinds of farm work—plowing harrowing, discing and drilling.

See us about a tractor for your fall plowing or seeding, or phone in for a demonstration. Immediate delivery can be made.

WISDOM IS KNOWING WHAT TO DO

Skill is knowing how to do it—but real human service is characterized by the doing. It is the development to a high degree of these three attributes that has established our reputation and builded up in the public mind a confidence in our word and work.
