USE CERTIFIED SEED WHEAT

Unless your wheat is pretty clean it will pay you to consider good clean wheat for seeding and in doing so it will be best to purchase the certified seed.

Many have stated that it seems that wheat runs out in a few years. This is largely true, simply because we are saving the seed from all the heads every year. If the vettleman bred all his poor females as well as the good ones he too would certainly find his herd badly run down. Unless an animal comes up to a certain standard she is discarded for breeding purposes, and the wheat man needs to do the same thing. This selecting, however, can best be done by experiment stations and then the selected wheat increased. The Karlov Turkey wheat which is being grown in Morrow county is one of these pure line selections. The new Forty fold wheat, a small amount of which was brought into this county was selected in the same way. The same is true, in fact, of most of the certified seed wheat in Morrow county.

you not only get wheat that is free from mixtures but also wheat that has been selected for production. This wheat will cost you very little more. Consult the list name of the Morrow County Pure Bred News if you desire to know this more. It goes to teach with this article we will have you told. It must certainly pay to see nothing but the very best.
