"The Line Is Busy"

When the telephone operator tells you "the line is busy," this fact has been made known to her by an electric signal. With the thousands of calls in daily telephone traffic, if the operator, to secure this information, were compelled to listen on the line of the party called, prompt service would be out of the question.

This delay is eliminated by an electric device which in the fraction of a second automatically indicates that the line called for is in use.

When "busy" reports are repeated on successive calls for the same number, it is generally due to an immoderate use of the called line. The length of a telephone conversation is obviously beyond the control of the telephone operator. Have confidence in her when she makes the report "the line is busy."
