

LEGAL NOTICES

NOTICE FOR PUBLICATION

Department of the Interior, U. S. Land Office at The Dalles, Oregon, November 8, 1922. Notice is hereby given that John J. McDonald, of Hardman, Oregon, who, on Oct. 26, 1920, made homestead entry, No. 020263, for W 1/4 N E 1/4, Sec. 20, T. 6. S., R. 25 E., Lots 2, 3, NE 1/4 SW 1/4, NW 1/4 SE 1/4, SE 1/4 SE 1/4, Sec. 5, SE 1/4 NE 1/4, Section 6, Township 6, S., Range 27 E., Willamette Meridian, has filed notice of intention to make final Proof, to establish claim to the land above described, before J. A. Waters, United States Commissioner, at Heppner, Oregon, on the 20th day of December, 1922.

NOTICE TO CREDITORS

Notice is hereby given that the undersigned has been duly appointed by the County Court of the State of Oregon for Morrow county, an Executor of the Last Will and Testament of W. O. Minor, deceased and that she has qualified as such.

All persons having claims against the said estate must present them to the undersigned, properly verified, at the office of Woodson & Sweek, attorneys, in Heppner, Oregon, on or before six months from the date of the first publication of this notice.

MAHALA MINOR, Executrix.

GILLIAM & BISBEE'S COLUMN

Come and get the county agent's machine for the dry treatment of your seed wheat with copper carbonate. The work is done directly and economically. Get your order in early as it takes some time to make one.

We have sold all kinds of grain drills but have decided that the Kentucky Double Run is the best suited for this territory. Come in and look them over for yourself.

The Revolving Rod Weeder are the ones that get the weeds.

If you are going to use the dry treatment for your seed wheat you cannot afford to pass up the Calkins machine.

GILLIAM & BISBEE

NEW USE FOR SCOTCH LAKES

Long Famed in Song, It Is Now Seriously Proposed to Develop Their Water Power.

Scotland is waking up to the fact that its lakes and waterfalls may be made to serve other purposes than providing scenic attractions for tourists. As proof of this the "Gramplan Electricity Bill" has been given a second reading in the house of commons. In this a company is empowered to collect and use the waters of 15 lochs and 100 small lakes, rivers, and streams over an area of 47 square miles.

The waters proposed to be utilized are estimated to be capable of generating 20,000 horse power to supply electricity to the counties of Perth, Kinross and Angus, and districts in four other counties. The capital is placed at £1,700,000 (£22,500,000). That any of the beautiful lakes and falls of "The Lochs, rivers and wild" should be used to set the wheels of industry spinning, many in Scotland regard almost as sacrilegious desecration. And that opinion is shared by not a few Americans who are accustomed to visit Scotland annually.

DANGER IN STEEL HORSESHOE

Substitution of Copper, It Is Believed, Will Lessen Possibility of Destructive Forest Fires.

Copper horseshoes as a means of preventing forest fires have recently made their appearance in several of the national forests of the West, and, if the plans of certain forestry officials are carried into effect, this metal will supplant steel upon the hoofs of all horses to be used on public domains where there is any measure of fire hazard.

According to the supervisor of the Angeles National forest, in southern California, steel horseshoes used in flinty mountain regions may have been the cause of some of the mysterious fires that have started in the forest reserves.

Heavy steel horseshoes striking against flint or hard granite may readily be the source of sparks, which falling into dry grass or other inflammable material, would quickly cause it to burst into flames if fanned by a breeze.

The new horseshoes were given their first try-out recently in Calaveras county, California.—Popular Mechanics.

Moth-Proof Wool

A mothrepellant has been introduced in the German market, which, it is claimed, will positively make the wool fabric absolutely moth-proof. An additional advantage of this product, known as Eulan F, is that it does not discolor the fabric, so that the wool can be dyed in bright shades without any difficulty.

Affected With Myopia

I am nearsighted, and as a consequence often get into embarrassing situations. One in particular greatly mortified me.

I had started out bravely to sell books, and it was my first attempt at salesmanship. As I stepped onto a shaded porch out of the bright sunlight, I stood for a second waiting, somewhat dazed. A diminutive figure appeared on the opposite side of the screen door.

Thinking the person a child, I asked: "Is your mother in?" Imagine my confusion when I discovered the person to be a man about seventy years of age.—Exchange.

Northcliffe Superstitions

Lord Northcliffe had his superstitions. He was incredibly afraid of the hat hawk frequently associated with 43 persons at a table. At a luncheon in his home in London last summer, he then sat down, including some Americans. Suddenly Lord Northcliffe exclaimed in a horrified voice: "There are 43 at this table. Every one get up. We must wait until my secretary comes to make 44." Subsequently Lord Northcliffe gravely related to one of his guests, an American newspaper man, many tragedies which he said were the result of the seating of 43 persons at table.

Past and Present

A New York city official, as the story is going the rounds, was walking through City Hall park with one of his combes. As they passed the statue of Nathan Hale, who stands with his hands behind his back, the combesman said: "Mr. Official, don't you think that statue of Nathan Hale is a beautiful piece of work?" "Hale? Nathan Hale?" said the official in a puzzled tone. "Why, I thought that was a statue of Ben Franklin."

BLACK GOWN EVER POPULAR

The black gown always claims its right to recognition, and crepe is the leading material. Of course the skirt must be of uneven length and the bodice plain. This model is attractive.

JACKET BLOUSE IS WELCOME

Garment Will Help Out Milady's Wardrobe; Suitable for Women With Slender Lines.

The jacket blouse is new and something that is going to be welcomed by a lot of women as a means of helping out their wardrobe. The idea started in Paris, where all through the spring and summer they were worn with skirts and waists in different colorings. This is a fashion which should be confined to women with long, slender lines, because on any more robust figures it is quite an unhappy thing to break the line of waist and skirt. However, there are many tall, thin figures in the world and they will look lovely in the jacket blouse.

It is, really, a blouse with a long waistline and a tight, rather wide band about the hips. It is made with a low, rolled collar or with a high one that buttons under the chin, and its material is some heavy colorful fabric suitable to the street, with a covering coat, that makes it a sort of coat in itself—hence its name, the jacket blouse. The favorite material for this kind of blouse is a fabric called matisse. It has a rather thick, almost quilted, silk surface and over all an embroidered design.

These outer blouses are often worn with plaited skirts of black satin or crepe, and they are desirable, too, with the lighter weight woolen materials. They will naturally grow more in favor as the cooler days approach, for they are essentially the thing to wear before one needs to don a top coat of any great warmth or weight. They are at their levellest when more or less brightly colored. There is one sort in black and white which is very effective, the embroidery done in black on a white ground. There is another done in dull tones of red on a background of black. The red ones are extremely good looking and there are others which will thrill those who naturally like to wear costumes of this sort.

THE STOUT WOMAN'S GOWNS

Dresses for the Party Matrons Are Still Cut With the Low Waist-line.

Dresses designed for stout figures are still cut with the low waist-line, and both panels and side drapery are employed to relieve the skirt of its otherwise plain appearance. The overlapping side, caught up at the side front with double clasps or buttons, is newer than the panels, which, however, are by no means out of favor.

The stout woman has always worn her skirts quite long and therefore not much change in the length is noted.

Moderately large sleeves are advocated for stout women, as a stiff sleeve emphasizes the circumference of an abnormally sized arm, and whose artistic effect is aimed at cord or very slender string girdles are used rather than crushed belt or sash.

The neck outline is round, square or pointed, according to taste. But fashion gives the preference to round necks where they are becoming. The same materials are used for large sizes as for the normal, and dark colors such as black, navy and the warmer, richer tones of brown are shown chiefly.

The Sailor Hat

A trimming to make the sailor wearable for nearly any occasion is made by sewing ribbon flowers to a detachable hat band. Black or copolymer velvet can be put on and off under a bow at the center back. In front, colorful flowers made of any fabric can be sewed on so they will not interfere with the removal of the band. Sewing on the flowers in the hat French fashion is a good style. For those who dislike small rosettes and bow ties, the flowers in the hat French fashion is a good style. For those who dislike small rosettes and bow ties, the flowers in the hat French fashion is a good style.

SPRIGHTLY SILK FROCKS

Any number of sprightly, new taffeta frocks came trooping in, in advance of spring, and they were perfectly sure of a welcome. Along lines similar to those in the pretty model shown here designers have made them in very great variety, suited to gay youth and varied to please charming age. In a conspiracy to make them wholly irresistible to gentlemen, lace is introduced in the sleeve or neck or both, and the silk is used in hand-made embellishments of flowers and ruelings, covered cord or straps.

The dress pictured here for afternoon or informal wear, is a youthful model with full scalloped tulle over a plain skirt. Its elbow sleeves, of the tulle, are lengthened by a puff of the net ending in a band of silk at the wrist. Straps of the tulle extend from the elbow to cuffs and roses of it are set about the tunic. The scalloped edge is finished with a silk-covered cord.
