THE DANCE QUESTION

Dancing is a subject that has divided the opinion of many excellent people for generations. There are those who contend that such form of amusement is very wicked—that it tends to degrade and corrupt those who engage in it.

Lately there has been much talk about public dances being given in Heppner. Admittedly there have been objectionable features and because of that those who oppose dancing would solve the problem by closing the pavilion and denying that amusement to those who enjoy it and believe it is perfectly all right when properly conducted.

Dancing is not an unlawful pastime. Drunkenness or disorderly conduct in any place is unlawful. To stop all dancing because wrong conditions have been permitted by the authorities or management is to take away the enjoyment of many of our best people in order to avoid invoking the law against drunks, disorderlies and bootleggers.

Reports from the Barn dance Friday night indicate that good order can be had even outside the town. Why not try it in Heppner?

TALKATIVE MR. HAYNES

Headlines like these glare from the day's news: "Evidence reveals existence of national booze and dope ring."

"Thousands of cases of whiskey taken ashore from Bahama fleet."

"Rum-running into United States from Canada assumes formidable proportions."

"Home brew artists increase numbers."

"Moonshiners menace prohibition officers with guns. Shoot to kill."

"Breakdown of national prohibition law imminent."

"Bootleggers show no fear of capture." With these and a thousand other daily reports shouted at him from every quarter of America to show that the booze evil is a crisis and not a romance, Federal Prohibition Commissioner Haynes came to Portland.

He might have reassured anxious citizens that effective measures will be applied to stop the flagrant violations of liquor and narcotic laws on the Pacific Coast.

He might have shown how the failure of national prohibition law will be redeemed by skillful, powerful organization and the day won in its last hour, for order and decency.

He might have given the evidence of a resolute and disciplined mind devoted to a huge and grievous problem that threatens every American home and every American institution.

Instead, he talked optimism in generalities. He said that home brew is in its last gasp. Perhaps he meant the last gasp of its consumers.

He charged aliens with chief responsibility in liquor and narcotic law violation. His interviewers elicited from him the startling admission that he did not know the congressional committee was at the moment in session, deliberating on the reduction of the 3 per cent immigration limit.

His organization, though so strongly represented in his entourage, was not represented there.

People who listened to the rubicund optimism and rolling statistics of the federal commissioner or his personal representative and who did no more genuine thinking than the orators, may have been encouraged. Why, with such valiant defenders, fear the bootleg demon or the narcotic monster! Aren't they being driven by the commissioner's junket into the void where conversation ends? Isn't it altogether sufficient to draft enforcement officials from political ranks and let them talk and talk until the last rum-runner has retired with his gains and America has thus been freed from booze and dope by the Haynes conversational heroism?

Commissioner Haynes might take a tip from Governor Pinchot of Pennsylvania, who in his inaugural said he had found he must give all his time to talking or working, and he had decided to work.—Oregon Journal.
