Henry Ford claimed, a few years ago, that Wall street financiers made a determined effort to "break" him. They failed, however, for today he is reputed to have more real money than any other man in the world. **FORD SALES PASS HALF MIL.
LION MARK IN 120 DAYS**

More than a half million cars and trucks sold in 120 days.

That is the astonishing record just established by the Ford Motor company, eclipsing all previous sales figures and emphasizing more strongly than ever the right of the Ford to the title "The Universal Car."

From January 1 to May 1 sales of Ford cars and trucks in the United States reached the enormous total of 561,544, nearly twice the number sold at retail during the same period a year ago when the total was 283,782.

Even with its huge production facilities, now operating on a schedule in excess of 6,500 cars and trucks a day, the company is unable to keep up with the unprecedented demand.

April set a new sales record for the month, just as has every other month this year, and was the thirteenth consecutive month in which sales have run over the 100,000 mark.
