

SCHEDULE OF PREMIUMS AND DISCOUNT ON WHEAT

(By C. E. Spence, Market Agent, 727 Court House, Portland)

In 1921 the state legislature amended the grain inspection act, and provided a schedule of premiums and discount for different varieties and weights of wheat. This amendment has not been enforced.

The Northwest Grain Dealers' association, in session in Spokane, Wash., June 18, 1923, adopted a schedule of discounts, but it pays no premiums on wheat that weighs more than the basic (58 pounds) and their discounts run too low when the milling value of the light wheat is considered.

The values of wheat, under the amended law, are based very closely on the Howard laboratory tests of Minneapolis—recognized as the highest authority in the country.

The following schedules, ordered by the state market agent, C. E. Spence, carry out the provisions of the amended law of 1921, and will be in effect on and after September 1, 1923. This table of prices, in relation to test weight of Soft Red winter, Common White and White Club wheat is worked out for each pound and half of pound test weight and based on a price of 1 cent per bushel for No. 2 wheat weighing 58 pounds per bushel, as provided in the 1921 amendment to the Oregon Grain Inspection act.

For premium No. 2 or better wheat testing over 58 pounds per bushel.

Table with 2 columns: Test Weight and Price. Rows include 65.0, 64.5, 64.0, 63.5, 63.0, 62.5, 62.0, 61.5, 61.0, 60.5, 60.0, 59.5, 59.0, 58.5, 58.0.

For discount wheat grading below No. 2 because test weight below 53 pounds per bushel.

Table with 2 columns: Test Weight and Price. Rows include 57.5, 57.0, 56.5, 56.0, 55.5, 55.0, 54.5, 54.0, 53.5, 53.0, 52.5, 52.0, 51.5, 51.0.

To determine the price per bushel for any wheat included in the list, find the figure in the price column opposite the test weight figure corresponding to your wheat. Multiply it by the number of cents the price for 58 pound wheat of that class.

T. B.-FREE DAIRY CATTLE WINS PREMIUM FOR HOGS

Freedom from tuberculosis of dairy cattle means a better price for hogs, when the fact is properly guaranteed.

A premium of 10 cents per hundred pounds on live hogs received from Clatsop and Tillamook counties has been offered by Swift & Co.

That is because the counties have been declared free of tuberculosis as a result of several years of persistent work in testing and eradication.

Some 40 thousand dairy cattle exclusive of the Clatsop and Tillamook herds were tested last year by the United States department of agriculture, the office of state veterinarian, the extension service and the various counties. The local dairymen are assisted by the county agents in planning the campaign.

Klamath and Jackson counties are conducting vigorous campaigns, and Multnomah planning to Crook, Morrow, Umatilla, Wasco and Washington counties are doing some testing.

Benton, Clackamas, Lane, Umatilla, Linn, Polk and Columbia did much work last year, the last three having compulsory testing.

With work going on and planned for the future, Oregon is making progress toward elimination of this disease. This would add not only to the profits of dairy breeding and production in the state but likewise to Oregon's reputation as one of the greatest though one of the youngest dairy states of the union.

The prospect for \$20 bonus on a carlot of hogs is another incentive to dairymen raising hogs to carry on the testing work.
