Heppner Citizens Gladly Testify and Confidently Recommend Doan's Kidney Pills.

It is testimony like the following that has placed Doan's Kidney Pills so far above competitors. When people right here at home raise their voices in praise there is no room left for doubt. Read the public statement of a Heppner citizen:

E. L. Berry, Main St., Heppner, Oregon, says: "You are welcome to use my name as one who has been cured of kidney complaint by Doan's Kidney Pills. My kidneys were weak and my back was so painful that I was unable to walk all stooped over. The contents of one box of Doan's Kidney Pills effected a cure and during the past two years there has been no recurrence of the trouble."

If your back aches—if your kidneys bother you, don't simply ask for a kidney remedy—ask distinctly for Doan's Kidney Pills, the same that Mr. Berry had—the remedy backed by home testimony. 50c all stores. Foster-Milburn Co., Props., Buffalo, N. Y.

"Showing" the Boxers. An incident of the Boxer rebellion, when Yuan Shih Kai was viceroy of Chih, notes the Outlook. A number of the Boxer chiefs of his province came to ask him to take part in the leadership of their movement. As an inducement they assured him that it was impossible that the movement should fail, because the Boxers were possessed of a magic which made them invulnerable to foreign bullets. Expressing great interest in this invulnerability, Yuan invited them to an excellent dinner. When they had dined he declared that it would be a very simple matter to test the invulnerability, because his soldiers were equipped with foreign guns. He thereupon conducted his guests to the courtyard, stood them up against a wall and, with a company of his own soldiers armed with foreign rifles, made a convincing test of the matter. Strange to say, not a single Boxer proved invulnerable.

An English Ghost Story. The ghost of Lord Tyrone, it is said, appeared to Lady Beresford, the wife of Sir Tristram Beresford, who died in 1673, and announced that Lord Tyrone, of whose death she had not heard, had died a few days before. The ghost went on to say that Lady Beresford would be blessed with a long desired heir; that she would marry again and would die at the age of forty-seven. The first three things came to pass, and Lady Beresford was congratulating herself on approaching her forty-eighth birthday when the clergyman who had christened her told her that she was really a year younger than she thought. "You have signed my death warrant," she said. "I have not much longer to live." That afternoon she told the story to her son and daughter and died, and on her wrist was the withering mark where the ghost had touched her.

Storms That Beat About the Horn. The waters of Cape Horn have never been unvisited by storms for more than a week or two at a stretch within the memory of man. Standing on the outpost of the world, Cape Horn is the meeting place of ocean currents of very different temperatures, from the icy cold waters of the antarctic drift to the warmth of the Brazilian and Peruvian return currents. The prevailing winds are from the north-west and west, and these, coming from the warm regions of the Pacific, condense into fogs which the sailors call "Cape Horn blankets" and which are the sure forerunners of storms. The extremely low levels to which the glaciers of Tierra del Fuego descend, the perpetual congelation of the sub-soil, the meeting of conflicting winds of very different temperatures, are all direct or indirect causes combining to make this the most constantly stormy region in the world.

Emergency Rations. On active service every English soldier carries what is known as an emergency ration, though its use is forbidden except by the order of an officer or in extremity. When occasion for its use arises the center band is torn off, and two tins are disclosed. One tin contains one-quarter pound of concentrated beef and the other one-quarter pound of cocoa paste. These rations can be eaten dry, but if water is available greater benefit can be derived. An ounce of the beef boiled for an hour makes a pint of tea; by simmering one ounce of the cocoa paste in a pint of water for a quarter of an hour a liquid cocoa of good strength is obtained. If the ration is eaten in small quantities at a time it is calculated to maintain strength for thirty-six hours.

Not a Word From Washington. "I've just had a new one sprung on me," remarked a man in a cigar store, "and by a kid too. The other day I was expecting a telegram from Washington, where I've been negotiating a business transaction. Knowing I would be in a friend's office from 2 until 5 o'clock that afternoon, I left word in the telegraph office to have my message sent there. About 4:30 o'clock a messenger boy came in and inquired for me. 'You're expecting a wire?' he asked. I told him I was. 'Sorry,' he said, 'but we can't get a word from Washington.' I jumped out of my chair in a hurry. 'What's the matter?' I asked. The kid edged near the door and replied, 'He's dead.' And then he ran out. But he left the message."—New York Tribune.

Ocean Currents. There are twenty-seven permanent currents in the oceans of the world, and there are nearly as many more of the semi-permanent variety existing at one time. Several causes tend to originate and maintain these drifts. Uniformly directed winds have the greatest influence, and differences of temperatures, storms, polar ice and eddies have each some effect, creating usually the currents of semi-permanent variety.

Reasons Obvious. "We will sing 'Awake, Ye Saints,' immediately before the sermon tomorrow," announced the minister at choir practice on Saturday afternoon. "Don't you think," inquired the observant tenor, "that it would be more appropriate to sing it immediately after the sermon?"

A NEW INSTRUMENT

An attachment for hoe drills as illustrated here has two very valuable and important features which every progressive farmer will appreciate. They are made to fit any size, are easily adjusted and answer the double purpose of regulating the depth of sowing and at the same time presses the soil firmly around the grain thus insuring immediate germination. Splendid results are obtained from their use.

IT WILL DO IT

Let the AKERS PATENT FASTENER reduce your draper troubles to a minimum this season.

The fastener, which is illustrated here, is stamped from sheet steel, having two leads struck up from each jaw which are driven into the stick when the jaws are set up.

This holds the stick as if in a vise. There are no rivets going through the stick to weaken or split it. We use the best No. 6 duck, straight grained ash sticks and first quality leather belt. We guarantee the quality and we guarantee the workmanship. These drapers will cost you no more than other makes and they will save you much time and annoyance. Don't fail to use one on your Harvester or Header this season.
