"The wagon that stands up like the reputation of its makers"

When you buy a Studebaker wagon you buy a wagon that will last until you turn the farm over to your son and he turns it over to his son.

One of the first Studebaker wagons ever made saw constant service for thirty years, and we will gladly send you the names of farmers who have in their possession wagons that have been in constant use anywhere from 17 to 48 years—and there are thousands of them. We are building the same kind of wagons today.

A Studebaker wagon is an investment that will give you full return for your outlay. It is built on honor, iron, steel, wood, paint and varnish used in its construction are tested and retested to make sure each is the best.

For work, business or pleasure—for town or country use—there is a Studebaker vehicle to fit your requirements.

Farm wagons, dump carts, trucks, buggies, surreys, runabouts, pony carriages, business vehicles of every description—with harness of the same high standard.

If Polk county has an industry that is really successful above all others it is the dairy industry. Not a week passes hardly but what we announce some improvement on the dairy ranches of the county. One week we see the importation of a thoroughbred Jersey bull while the next week we are able to announce the importation of some standard grades of cattle, the building of a new barn, the planting of more clover for hay or the purchase of new separators. These are all indicative of a growing prosperity among the dairy farmers. An inquiry at the banks bring forth the information that the dairy farmers almost all are out of debt and make their deposits every few weeks, the results of their regular sales. While they are building up a good herd of cattle and a bank account, they are also building up their land. The crop they plant produces better soil productively for the future. Besides, the hogs, chickens and vegetables all help to build up their business and there is no reason why they should not prosper.—Independence Monitor.
