Clean It Up.

All persons residing within the corporate limits of the City of Heppner who keep cows or horses, are notified to clean away all manure from their stables once every four days during the summer months. This will prevent the breeding of flies and be conducive to better health and sanitary conditions. The city marshal is instructed to see that this regulation is carried out.

ARCHIE McMURDO,
City Physician.

THURSDAY, July 3, - - - 1913

The effort being put forth by the lone Commercial Club to induce the parties interested to locate a colony of Scandinavian farmers in that vicinity is well worth the encouragement of all our citizens. Mr. N. P. Peterson of Portland, who was in Heppner the past week, is much interested in getting his countrymen located in Eastern Oregon, and he especially recommends to the managers of the Scandinavian Immigration Bureau that they encourage their people to locate in Morrow county, and will use his efforts to get them to do so. Mr. Peterson is well posted on the various sections of the Northwest, and believes we have the best opening here of any place. Our lands are cheaper and their returns are surer and quicker. He states that the majority of the people being interested through this source in locating in Oregon will have from \$2000 to \$3000 to invest as a starter. They are of the best type of Swedish and Danish farmers, thrifty, industrious and frugal. They will be satisfied to get along in a small way at first but they are stayers, and will come out prosperous in a few years. We hope to see large numbers of them located on the unused lands in the vicinity of Ione, and then up this way there are a large number of big ranches that can be divided up, that are suitable to dairying and wheat raising and will make fine combination ranches for these people, and we can handle a large number of them. Let them come. They are welcome.

The Portland business men are to raise a fund of \$150,000 to get industries established and immigrants from northern Europe for the rest of the state. The Blue Mountain Eagle says, "No thank you we don't need them. Eastern Oregon would rather have an immigration of Americans from Missouri, Illinois, Ohio, Indiana or none rather than the selected scum of northern Europe." We have a different idea of the immigrant from northern Europe over here in Morrow county and well we should have. The families that have settled here after coming from that cold northern country have adapted themselves to conditions in a most satisfactory way. They are thrifty and industrious and among the large settlement of these foreigners, not a single one of them has a mortgage attached to his farm. Better than that, the majority of them are accumulating wealth,

some of the more wealthy citizens of our county being natives of northern Europe. As citizens we could not wish for better. They are intelligent and give their aid to good government wherever possible. Give us more of them.

HARDMAN

Born on Friday June 27, to the wife of Kinnard McDaniel, fine boy.

Mrs. Chas. Ham departed Sunday morning for Tacoma on business.

And still we continue to receive fine rains and everybody is happy.

They undoubtedly had a good game of ball in Heppner but it was nothing to compare with the one played in Hardman.

George Bleakman made a fiving trip to Heppner Sunday in his auto. He took some of the Hardmanites in to see the ball game.

Nick Leathers, Mack Biddle and Bird Swift were out fishing last week. If you wish to hear some fish stories just mention it to Biddle.

There is not much to write about this week as everybody is doing nothing but talk about the big crop that will be harvested here this year.

Jaks Young with his road crew is doing some good work on the Rock creek road which will be a benefit to this part of the county when finished.

Earl Cramer, J. A. Gibbons and Squire Bates went to Ditch creek Monday to spend a couple of days fishing. There won't be any fish left in the creek when they return.

Jack Eads and son Victor and Geo. Cox of Monument were in town Sunday night. They left Monday in company with Frank Cramer for Ione. All of these gentlemen have some fast horses and expect to walk off with some of the prize money at Ione on the Fourth.

IONE.

We are all too busy to write items this week so beg to be excused this one time.

Miss Woolery arrived in town last Tuesday with a brand new American automobile. A pretty nifty looking car.

Hank Cramer's mare and Peterson's horse ran a race Tuesday morning last for a purse of a hundred dollars, Cramer came out in the lead.

The latest and most up to date weeder, and something new for Morrow County can be seen at work on the Lac McMurry ranch, on Rhea creek, an enterprising wheat grower, Alex Lindsay, Demonstrator. If arrangements can be made with the air man, a birdseye view may be obtained of the weeder at work on the McMurry ranch by the air ship circling Mat Halvorsen's Buttes.

Banana Belt Will Lead.

Charley Morey and Art Finley, two farmers from the "Banana Belt" of Morrow county were Heppner visitors Monday, being witnesses before Judge Patterson on the final proof of Fred Maxner, a neighbor. According to Mr. Morey the "Banana Belt" will be the banner crop section of Morrow county this year. Wheat is now practically made out that way, and it will be an abundant crop free from weeds and of fine quality. Morey says he has bluestem wheat that is now filling well with heads from five to seven inches in length, and so far this year he finds no need for irrigation. The rains have hit that section just right.

HOT WEATHER GOODS

Now is the time of year to secure some of those pretty

LAWNS and DIMITIES

for hot weather wear. We can show you them in a great variety.

We are agents for
STANDARD PATTERNS

SAM HUGHES

University of Oregon Increases Its Faculty

The University Regents have authorized the addition of 16 instructors, the first material change in the University of Oregon faculty in five years. In addition to this was the creation of the chair of political science with professor James D. Barnett at the head. An associate

professor has been authorized and with his appointment the courses in political science and elementary law will be greatly extended.

Among the several appointments already made are an associate professor of civil engineering, instructor in physics, instructor in zoology, assistant professor in mathematics and an instructor in physical training for women. Positions which have been author-

ized but remain unfilled: Associate professor, professorship in journalism, and political science and instructors in electric engineering, history, education, latin and geology.

This increase in faculty members together with salary increases that have been made require approximately \$30,000 of the \$50,000 appropriated by the Legislature for the extension work.
