Notice has been received at this office this week announcing that Town-ship 3 South, Range 29 E. W. M. in Morrow county will be subject to the provision of the 320 acre homestead act after Aug. 30. R. A. Rineheart, of the State Tax Commissioner's office, was in Hepp-ner several days this week. He was busy gathering data from the the Morrow county records showing the ratio of assessments to valuations on the property at large in the county to that of the railroad. The railroad claims that they have been assessed out of proportion to their valuation while other property in the county has not, and the question is to be threshed out later before the Tax Commission. Mr. Rineheart is gathering information that will help the Commission in properly settling the question when it comes up.

Alex Lindsay was up from Jordan Friday looking after business interests here. He is contemplating shipping a car of his "demonstration weeders" to Heppner for exhibition at the com-ing county fair. By the way, there is not much joke about this weeder business. Alex has a bunch of good sheep and he has thoroughly demon-strated to various farmers in his neighborhood that they are excellent weeders, and that the running of a few head of sheep on the farms for keeping down the weeds, if for no other purpose, would be a good invest-ment.

After a visit of a few days with relatives at Hepp-ner and friends at Lexington, the old home of Mr. Potter and family, they returned home Monday.

No doubt there are a good many people who desire to get timber off of public, non-mineral lands in Morrow county, and it will be well for all such to get proper permits from the govern-ment before any cutting is done. You will save trouble by taking this pre-caution as it is unlawful to cut timber from government land.

Testing Crude Oil.

A bunch of men started to work on the block from the Fair building to the Sanitorium Monday morning treat-ing the surface of the street to a coat-ing of crude oil. This is being done as an experiment on the part of the city authorities, as it has been thought a good plan for some time to test out the street oiling proposition. It was spread by hand after being heated, as the city has no regular apparatus for putting it on. After spreading the oil from the spouts of a hand sprin-kler, it was thoroughly raked into the surface of the street, and the dust well laid. It would have the appearance of working well tho it has not been on long enough for a thorough test yet.

In many localities the crude oil is used very successfully for this pur-pose and there is no reason why it should not work at Heppner. The matter of cost has been an item to contend with as we are too far re-moved from the oil region and freight rates on the quantity needed here would be too high according to any figures that can be had at present. However, this may be adjusted so that the oil can be handled for the streets and a good oiled surface kept up the year around.

For Counterfeiting.

Ralph Fouts, 21 years of age, was arrested near Lexington Thursday evening last, upon the complaint of William A. Glover, U. S. Secret service agent, by Deputy United States Marshal George Jackson. Fouts is charged with the crime of counterfeiting and he was brought before U. S. Commissioner C. C. Pat-terson at Heppner, the same evening for a preliminary hearing. He waived examination and was placed under bonds of \$5000 for his appearance be-fore the federal court and was re-manded to the custody of the marshal who took him to Portland Friday Fouts is alleged to be partner of L. E. Morris who was arrested by Glover on an island near Corvallis two weeks ago. It is stated that the men have both confessed to making counterfeit dollars, halves, quarters and dimes and Fouts is said to be a green hand at the business. The imitations were fairly good.

Hay For Sale.

About 130 tons of alfalfa at the John Hughes place 4½ miles north of Heppner. Parties buying same can have place for feeding.
Inquire or write Matt T. Hughes Heppner, Oregon.

The hay crop in this vicinity is much larger than predicted in the early spring. It was thought because of the extended cold weather in the early part of the year that the crop would yield only about one-half the usual amount but very favorable grow-ing weather in July brought the yield up to nearly normal. About 25,000 tons of alfalfa will be raised in the immediate vicinity of Prineville this year. Labor is plentiful. The farmers are paying \$1.50 per day for hay hands.—Prineville Review
