

MAKE HOME HAPPY WITH A GLOWING NEW HEATER. ENJOY THE COMFORT OF SITTING AROUND A HANDSOME, WARM STOVE.

OUR HEATERS WILL HOLD THE FIRE OVER NIGHT, SO THAT YOU ONLY NEED TO MAKE A FEW TWISTS AND POUR IN SOME COAL TO HAVE A HOT FIRE.

"FIRE OUT" YOUR OLD STOVE AND "FIRE UP" A NEW ONE.

WE WILL SHOW A HEATER THAT WILL ROAST POTATOES INSIDE OF A PAPER BAG AND NOT BURN THE BAG. PUT BAG AND POTATOES INSIDE OF THE HEATER AND ROAST YOUR TOES ON THE OUTSIDE AS WELL. IT'S NO LIE; WE TELL THE TRUTH. COME AND SEE IT.

THE LIGHTING OF SCHOOL ROOMS

Public School Children's Eyes Are Often Damaged by Poor Light.

Public school children's eyes are often seriously damaged by poorly lighted schoolrooms. This fact should be remembered in building schoolhouses. Modern school architects and hygienists have worked out some definite plans to conserve eyesight which should not be forgotten. For instance, in Northern countries, where sunlight is less prevalent than in Southern countries, and where fog, clouds and smoke are common, schoolrooms should have one-fourth as much window-glass as there is floor space. In Southern countries, where the atmosphere is clear one-sixth window-glass space is sufficient. The bottom of the windows should be four feet above the floor. Windows should be as numerous as is consistent with safe construction. They should be as far back in the room as possible, and to the left of the pupils. The windows should be contained between iron or steel mullions, and their edges should be rounded, to permit the ingress of light and its useful distribution and to prevent shadows falling on the desks. As the best light comes from above, the windows should extend to the ceilings. If hills or tall buildings are close to the school prismatic or ribbed glass should be used in the upper portions, as too much glare is produced. Sliding or sash blinds should not be used. They are expensive and inefficient. Use double shades, so large that chinks of light cannot enter. They should be fastened in the center of the window and should roll up or down, so that light can be admitted from either above or below. The curtains should be light green in color. Blackboards absorb much light and should be covered by light curtains on dark days and when not in use. — Journal of American Medical Association.

HIGH SCHOOL NOTES.

Oh you '14's class.

We wonder how the "Freshies" like German. It seems to "get their goat."

The Caesar class is exceedingly large this year and seems to be progressing.

The chemistry class is taking much interest in the work. They spent Tuesday morning getting their laboratory in shape.

Eleven pupils enrolled in the Commercial department, and it is expected that several more will take up at least some of this work.

Class of '15 held a meeting Tuesday evening and elected officers for the coming year. Miles Potter was elected president, Spencer Crawford vice president, Grace Van Vactor Secretary and Helen Alken, treasurer.

Heppner High School opened for the fall semester on Monday the fifteenth. Fifty-one pupils were in attendance and the work started off without much trouble. Monday was spent purchasing books and material and the assignment of lessons, which were taken up Tuesday. On account of Teachers' Institute, which occupied the last three days of school week, work was discontinued until the first of this week. Work was resumed Monday with much enthusiasm and the pupils seem determined to make up for the late start.

A football meeting was held at the 10:30 intermission Monday morning and some good material has come to light. 15 men reported for the try out and there is promise of several more. Officers were chosen and arrangements for suits and suitable grounds talked over. Harvie Young was chosen captain and Miles Potter manager. Under their able leadership H. H. S. should come off victorious in their gridiron struggles. The first tryout of new material will be held immediately after the fair. Here's to a successful team which will make up for the defeats of last season.

Notice of Final Accounting.
