THERE is work on your farm for an International Harvester tractor every week in the year. It will pull your plows, disks, drills, harrows, binders, haul your products and supplies, do road work, run your thrasher, ensilage cutter, husker and shredder, concrete mixer, well drill, etc.

For best tractor service use an IHC oil tractor—Mogul or Titan. They are built to meet field difficulties. Their mechanism is simple. Moving parts are carefully protected. There is no unnecessary weight. They satisfy buyers.

IHC oil tractors—Mogul and Titan, are built in sizes for all farms, from 6-12 to 30-60 H. P., to operate on kerosene and gasoline.

Write for catalogues and other information on International tractors and oil engines and we will tell you where to see the machines.

DON'T RAISE WEEDS!

USE A JONES WEEDER

Built in Morrow County

(Patented Dec. 16, 1913)

There has been a great need for a machine to cultivate summerfall that would do it thoroughly with the least possible loss of moisture and "do it quick."

We claim the Jones Weeder will do all of this and more. It can be used in as many sections as wanted, like a harrow. Four sections cut 18 feet 8 inches and pull no heavier than four sections of steel harrow.

The blades having a slope of 60° it will not choke under normal conditions.

I am now putting up 100 sections. Parties wanting this machine should send in their orders at once.

For further information, prices, etc., write or see

IRRIGON ITEMS

Graybeal drove to Umatilla, Sunday.

N. Seaman is having his residence in this town painted and improved.

The usual ball game was not played here Sunday on account of the wind.

A few of the young folks of the town spent Sunday evening at the dance home.

Mr. and Mrs. Peter Sushauer went to Umatilla in their auto Sunday to attend church services there.

Mrs. Carl Brownell and niece, Shuway McCoy were Irrigon visitors Saturday and Sunday, from Umatilla.

The river is rising fast; good news to those who have been carrying water from neighbor's wells for the last several months.

Mrs. N. Seaman has gone to Sheboygan, Michigan, to visit her father, who is very ill and not expected to live long. Mrs. Seaman left last Wednesday.

A daughter was born to Mr. and Mrs. Charlie McPaul, of Durkee, Or. Mrs. McPaul has been visiting her mother, Mrs. Graybeal, here for some time past.

Ten government surveyors have established a camp some distance west of town. Judging from appearances they intend to make things around here hum—at least we hope so.

Last Sunday several of the boys around town found and destroyed about two hundred crow's and magpie's eggs. These birds are very disagreeable and harmful to our small fruits later in the season and this disposes of quite a few.

GALLOWAY.

L. D. Neill was an Echo visitor Saturday.

Earl Wiglesworth went to Echo Sunday evening.

J. T. Ayers made a business trip to town Tuesday.

James Lindsey of Ione, spent Saturday and Sunday on Butter creek.

Mrs. Mae Chisholm of Pendleton is visiting friends and relatives on Butter creek.

Misses Lucy Corrigal, Edna Ayers and Okie Jackson visited at the home of Mrs. Ed Neill on Sunday.

Anyone desiring a fine pup, sheep dog variety, might apply to Miss Ruby Ayers at Galloway, "huh".

WOOL NOT THE HANDLE FOR LIFTING THE SHEEP.

Oregon Agricultural College, Corvallis, Ore., Apr. 22. To most farm hands the wool seems to be a natural handle for lifting the sheep," says O. M. Nelson, specialist in sheep raising at the Agricultural College. "By it sheep are caught, dragged and lifted from place to place. This leaves a bruised and inflamed area, as may be seen by examining the flesh of a sheep treated in this way previous to slaughter. A sheep is a gentle and timid animal and the inhuman treatment often given them on the farm is awful. It decreases the profits and sometimes causes an actual loss.

"The sheep is first driven with others into the corral where it may be caught without frightening the flock. It may then be caught by the neck, flank or hind leg above the hock, and moved by standing to the left of it, placing the left hand under the jaw, the right hand on the hock and gently pressing.

"To lift the sheep stand at the rear and a little to the right. Grasp the right fore leg close to the bricket and gently raise the fore part from the ground. Then seize the left hind leg at the hock and lift the sheep up. This method prevents struggling and injury to the sheep.

"It is easy to make light sheep sit up. Heavy sheep may be made to sit by placing the left arm around the front of the animal, reaching under its body and grasping the left hind leg at the hock and gently drawing the leg toward you while pushing with the breast against the
