

Among the Orchards of the Northwest

A Page of Interesting Advice and Information About Fruits, Large and Small.

The big problem the orchardist faces these days, and it is a problem for commercial purposes, as part of his work, is the disposal of his crop. Mr. Stephens has a few ideas well worth considering on how to obtain the maximum cash yield from apple orchards.

BY E. F. STEPHENS.

The commercial apple orchardist is often asked by his friends, "Do you hope to find room to market all the apples you are growing?" In my own case I expect to produce in a single season three hundred to four hundred car loads of apples from the orchards in my care.

What are the conditions surrounding the future market of the commercial apple? Recently, in Lincoln, Neb., I found Ben Davis grown in Kansas selling at wholesale for \$8 a barrel. Jonathans at \$6.50 a barrel, and other varieties in barrels at similar prices. Western box apples, wholesale, are selling at \$2.25 to \$2.75 a box. The Yakima Fruit Growers' Union is selling Wineaps f. o. b. Yakima, Wash., at \$2.25 a box. These prices are extraordinary, and arise from the fact that the crop of apples for 1913 in the United States with boxes computed in barrels, was only 25,000,000 barrels as against 45,000,000 barrels for the crop of 1912.

Production on Increase.

The average production of the United States for the last ten years has fallen to not far from 30,000,000 barrels annually. Whenever the crop falls below 40,000,000 barrels the commercial grower may be sure of good prices for his apples, if properly grown, packed and marketed.

On the streets, my friends tell me that oranges are as cheap as apples, that while the consumption of oranges is up to the limit of production, the orange does not take the place of the apple. The apple can be eaten for many months in the year and can be cooked in many and varied ways. It will be difficult to develop any other fruit which will really supplant the apple in the markets of the country.

People tell us that by persistent advertising, wide distribution and forcing the fruit into consumption, oftentimes by very low prices, they have been able to increase the consumption of the banana from 10,000 to 75,000 car loads annually. Their effort is to make the banana the fruit of the workman and the child.

Millions of Trees Planted.

The apple orchardist has these conditions to contend with. He must organize a campaign of education, calling attention to the many and varied uses that can be made of the apple, and must endeavor to inaugurate different systems of distribution. Under previous methods, too many carloads of apples were shipped to the large centers. The smaller towns, able to handle a car or one-half car, were often overlooked and neglected. The retailer usually asks for more profit for his work in distributing apples than the grower can hope to make on the entire year's work.

To illustrate: In my home town I supply the local merchants with apples at \$1.50 a box, and they immediately dispose of them at \$2.25 a box, a profit of 50 per cent on an article in his hands but a few days. Should these apples go on the stand or be sold by the grocer in small lots, the selling price is likely to be doubled. This phase of distribution will require earnest attention.

In the matter of production, we know that millions of apple trees have been planted in Montana, Washington, Oregon and Idaho. These states have the climate, soil and water suited to large production. What then will happen to the millions of trees planted in the states and sold to non-resident investors?

Incompetent Grower In Fix.

If the non-resident investors finds himself able to give up his present line of work and to give personal attention to his five or ten acres; or if he is able to place the care of his orchard

in the hands of some capable friend or some responsible company that can give the same care to his orchard they would give their own, his orchard will then become a producer of commercial apples. If these orchards of non-residents are not intelligently and skillfully handled, and the fruit not graded and honestly packed, then it will not enter the markets.

A year of large production like 1912 surrounds an incompetent or financially weak grower with grave difficulties. Perhaps his capital will not allow him to store his fruit in his own or some other warehouse until the markets ask for it. Perhaps his fruit is shipped before there is a demand, or too many cars are shipped to one point, or for some other reasons it does not render him a suitable profit, then the weaker and less successful growers become discouraged and neglect their orchards. They then drop out of the race and are no longer competitors with the up-to-date commercial orchardists.

Ten Per Cent Produce.

Professor Bailey, a very noted and reliable writer on horticultural topics, states that only 10 per cent of the fruit trees sold by nursery men ever become productive and bear fruit for a continuous period. The others fall by the wayside.

The production of apples is less at this time than ten years ago for the reasons above suggested, while the citrus growers and the banana trust have taken up some portion of the apple market, yet the production of apples has fallen off, and during the next five years the market is not likely to be overstocked with apples. There seems yet to be room in the expanding markets of the world for extra fancy and fancy grades of fruit, grown and marketed by the intelligent, up-to-date and successful orchardist. It is believed that the Panama Canal will help to expand the market for apples grown upon the Pacific Coast. The inhabitants of the islands of the Pacific and the oriental races are gradually becoming consumers of apples.

By the use of graders and by packing in the most attractive and up-to-date manner, the orchardist can get his product before the public in such form as to increase the sale and broaden his market. A year like 1912 should decidedly encourage the orchardist who has sufficient capital to construct cold air storage houses either on his own land or at his nearest railroad switch. Thus equipped with storage facilities under his own control, the orchardist will not contribute to the depressing overstock at any point by throwing unsolicited car loads on markets already filled.

New Cherry Pests Are Being Found

"CHERRY trees in this region are infested with two serious insect pests, and my office receives a great many inquiries concerning methods of combatting them," said J. R. Shinn, county agriculturist of Spokane. "The insects are the black cherry aphid and the cherry leaf slug. "Spraying with a combination of the lime sulphur, and the tobacco spray known as 'Black Leaf 40,' just as the cherry buds are opening has resulted in preventing 90 to 100 per cent of aphid infection. The mixture is made by using one gallon of commercial lime sulphur to 10 gallons of water, and adding one part of the 'Black Leaf 40' to 800 parts of the dilute lime sulphur.

"The cherry slug is the progeny of a small fly which deposits eggs on the lower surface of the leaves. These eggs hatch into slime-covered larvae that do so much damage by eating away the green portion of the leaves, leaving nothing but a network of leaf veins. Two remedies have proven successful in the northwest in combating these slugs. One is the use of a spray containing one pound of white hellebore to 50 gallons of water and the other contains one part of 'Black Leaf 40' to 800 parts of water. These sprays are used as soon as the slugs are discovered on the foliage."

FARMERS! BIG SACRIFICE!

180 acre diversified Dairy and Hog ranch all in cultivation except 10 acres in pasture.

FINE SPRING AND CREEK.

Good Seven-Room House, Fine Large Barn.

OTHER OUT BUILDINGS.

Following STOCK included:

SEVENTEEN MILCH COWS

(Mostly Jerseys)

FOUR CALVES

ONE BULL

EIGHT HORSES

SIXTY HOGS AND

ABOUT \$1000 WORTH MACHINERY, TOOLS, ETC.

THIS ENTIRE PROPERTY

WELL WORTH

\$15,000

EVERYTHING GOES, IF SOLD

THIS WEEK, FOR

\$10,000.00

WILL REQUIRE \$4,500 CASH.

5 Acres for \$250.00

\$10.00 DOWN AND \$5.00 PER MONTH.

Buy 5 acres of good level logged-off land, between Portland and Centralia, on the main line of three railroads, 1 1/2 miles from a town of 1,000 population, sawmills and other industries. We have 160 acres to choose from, some of these tracts are about 1/2 cleared; also a fine trout creek runs through them. You can get any kind of laying tract that you want. Some of this land is bottom land.

Perfect Title and Warranty Deed.

CHARLES DELFEL

312 Railway Exchange Bldg., between 3rd and Fourth, on Stark St., Portland, Ore.

A SNAP

A first class steam laundry. Fully equipped. Laundry buildings and residence; wagon; teams. Earning \$700 per week. Splendid town. \$4,900; easy terms.

PEOPLES REALTY CO.,

14 N. 6th St., Portland, Oregon.

WOULD YOU LIKE AN INCOME OF \$2,500 A YEAR?

If so, and you have \$1,000 to invest in a good, legitimate business that will stand the strictest investigation, write to me

JOHN SPRINGS, 312 Henry Bldg.

912 Henry Bldg., Portland, Oregon.

A RARE OPPORTUNITY FOR AN ALASKAN INVESTMENT.

The stock and bond house of Herrin & Rhodes, Inc., Seattle, Wash., the oldest established firm in this line in Washington, has been authorized by the management of the Golden Hill Consolidated Mines Company, situated in the famous Willow Creek free gold quartz district of Alaska, to sell 100,000 shares of treasury stock at 15c per share. The remarkable feature of this commission is that we are furnished with a written guarantee that the full purchase price of these shares is to be returned to all of the purchasers of this stock in dividends before any other shareholders can participate in the profits. The guarantee provides that the money is to be used only for a stamp mill, which is under construction now, and is expected to be in operation on July 15. There is sufficient ore in sight to warrant a substantial profit from this season's run, and to reimburse the purchasers of this stock. By reason of this operation the shares should greatly increase in face value. This is a great opportunity for a good investment. Mail your check today. We will gladly furnish you further information. Redwood sawdust is being used by vintners in California for packing fresh table grapes. It takes the place of the ground cork used for imported Spanish grapes.

50,000 ACRES

Level Valley Land For Sale in Harney Valley, Harney County, Oregon, at Prices Ranging From \$20.00 to \$30.00 Per Acre. Terms, ten per cent cash and the balance in nine equal annual payments, payable on or before maturity, with interest at six per cent. Deep and productive soil, no rock, no gravel. Yields magnificent crops of wheat, barley, rye, oats, flax, field peas, field roots, alfalfa, meadow grasses, fruits and garden truck. Excellent and abundant water at from ten to fifteen feet.

An unsurpassed opportunity, for those looking for a home. Lack of railroad transportation has up to the present time kept this great valley from being largely brought under cultivation; however, the Oregon & Eastern Railway Company is now engaged in constructing a line into the valley, and the road will be completed in the very near future.

For booklet containing further information, address

Oregon & Western Colonization Co.

268 Stark St., Portland, Ore.

FARMS WANTED

From 10 to 500 acres, state how much under cultivation and also what improvements; full description and location, terms, etc. I'll do the rest; option required.

CHAS. HIRSTEL

104 Sherlock Building, Portland, Oregon.

Seahurst

On Cohasset Beach
The Great Ocean Resort of
The Pacific Northwest

Have you ever experienced the delights of a vacation at a real seaside resort? It's the finest outing in the world, for nothing compares with the real ocean for genuine fun, pleasure, sport and health upbuilding recreation power.

If you would like to know how you can obtain a choice lot for nothing in the new Northwest Pacific Ocean Resort Townsite of SEAHURST, where \$100,000.00 will be spent in improvements, simply fill in and mail us the attached coupon.

The proposition is only open to a limited number of people. To be in time you must return the coupon promptly.

OREGON & WASHINGTON DEVELOPMENT COMPANY
401-2 Green Building, Seattle, Wash.

Send me full particulars regarding your proposition, also your free illustrated folder describing Seahurst, the new Ocean Resort Townsite of the Northwest.
