INTERNATIONAL Harvester oil tractors rank first as machines for all-around farm use. Enumerate a dozen of your farm operations and you will find these tractors—Mogul or Titan—can be used with profit in all.

They furnish reliable power for all belt machines and for disking, plowing and other drawbar work. Features which make I H C tractors valuable are the truck design, the large main shaft and its long bearings, the power starting system, the dust proof engine—features of proved value which you find on all I H C tractors.

I H C tractors, Mogul or Titan, are simple, strong, and easily operated. They are built in all sizes, from 12 to 30-H. P., and in styles to meet the needs of every good sized farm. The I H C line also includes various styles of general purpose engines from 1 to 50-H. P., operating on high and low grade fuel oils.

Write us for catalogues and other information about tractors and engines.

INDUSTRIAL REVIEW OF STATE.

Progress of Industries and Manufacturing That Provide Oregon People With Payrolls.

Five counties from Eugene to Portland have united to develop the Pacific Highway on the east side of the Willamette valley.

A public dock is to be built at Port Orford to cost \$6000.

Corvallis is to have a new Episcopal church.

At the Manufacturers banquet held in Lane county sentiment was unanimous against enactment of any more harassing industrial laws.

A Lake Labish drainage scheme is being worked out in Marion county at an expense of \$20,000.

Richland and Newbridge, Baker county, are to be supplied with a mountain water system to cost \$50-000.

Astoria will spend \$280,000 this year on a seawall, and fill in fifty blocks of city property for factories and business.

Coos Bay lumber shipments to San Francisco for the last two weeks of April surpassed all others on the coast—8,240,000 feet.

The Pendleton Tribune says not only the individual but every phase of industrial activity is hampered by too much legislation.

Marshfield city and county officials are planning the construction of a boulevard to the ocean.

The Oregon Power Co. at Eugene is making special rates to induce factories to locate at that city.

A factory at Marshfield has been equipped with machinery to turn out fifty mattresses daily.

Business men in the hop industry representing \$25,000,000, and a yearly output of 5 to 6 millions are organizing against prohibition.

Astoria is to get a streetcar line extension of two miles at the hands of the Pacific Power and Light Co.

The Malheur Enterprise says there will be general approval of the members of the legislature who put in their time swatting fool laws.

Judge McGinn holds that a railroad company is not liable for damages done a passenger caused by a wreck in a storm.

Construction of a water system for Coos Bay cities costing \$150,000 will be started at once and to be completed this summer.

A farmers co-operative creamery has been organized at Bend.

The Presbyterians of Astoria have let a contract for a \$5000 church.

It is expected that trains on the Willamette Pacific will run from Eugene to Tidewater this fall.

The O. W. R. & N. Co. is planning terminals at Pendleton, with shops and yards to employ several hundred men.

Astoria and Portland merchants are co-operating to find a market for the product of the new Astoria flouring mills.

Halibut banks off the Tillamook coast are being investigated.

The Southern Oregon and Northern California Mining Congress will be held at Ashland early in July to revive interest in mining and minimize the evil effects of the Blue Sky laws.

Lumber interests and creosote interests are uniting to establish a number of wood block paving plants in Oregon cities that have the raw material and go after some of the street and permanent highway business.

Oregon has abundant raw material, plenty of labor but must have capital to develop these resources. In the mean time laws that tax the capital and regulate the industry off the earth are suicidal.

The Lamb mining company is building a big reservoir near Ashland and will irrigate the Sunset orchard of several hundred acres.

North Bend will have a wharf with a quarter of a mile of straight deep-water harbor line.

The Oregon-Idaho Power Co. is developing a 2000 horsepower plant on the Snake river opposite Copperfield.

Laws that deprive laborers of employment in Oregon are to be supplemented with laws to create a commission to employ the unemployed.

The Simpson Lumber Co. on Coos Bay expect to employ twice as many men as heretofore.

Mrs. Amelia Brown of Lane county has invented a sanitary cap for milk bottles that a Denver firm offers her fifty thousand for.

The fight for the use of Oregon stone as trimmings for the new state University administration building is whether the State Architect shall select terra cotta or Oregon stone.

The Port of Coos Bay Commission has decided to raise \$300,000 more on a bond issue for deepening the channel.

It is believed by many that the era of fads, fancies and experimentation in politics and business in Oregon has reached its climax.

Boys' Short Course in Agriculture, June 15-30.

In connection with the regular summer session of the Oregon Agricultural College, a two weeks' short course in Agriculture will be given for boys of the Seventh, Eighth and High School grades. A special illustrated circular of 16 pages has been issued and mailed to all county school superintendents and principals. Copies may be secured of them or of the director of the summer school, Prof. E. D. Ressler, Corvallis, Oregon.

The Circular contains a description of the instruction to be given, full information in regard to R. R. rates, cost of board and room, supplies and clothing to be brought by boys, method of application for enrollment, etc. There are also pictures of the boys of last year's course in class, laboratory, field, swimming pool, on hikes and at games. Thirty-five boys, representing over a dozen counties, attended the first session. Accommodations for one hundred boys are provided this year.

Four to five hours each day, including Saturday, are devoted to study and the remainder of the time to play, with Wednesday and Saturday afternoons free. A general leader, assisted by three to five senior or graduate college boys, will keep careful oversight of the boys day and night, both to keep them from getting into mischief and to see that each boy gets his share of all the work and fun. The boys will be organized into groups, according to age and development, for both the instruction and play. Each group will have one of these leaders who will be sort of big brothers.

Any boy in Oregon is eligible, but not more than one will be accepted from one district or ward school in the towns so long as there are applicants from schools not represented. All applicants must be approved by the county or town superintendent both as to character and ability to profit by the course. No tobacco users will be accepted.

Boys, teachers, parents or others who may be interested should secure a copy of this circular.

New Feature at Rose Festival.

Portland, Ore., May 19 (Special)—In addition to the unusually elaborate made for welcoming the "Queen of Rosaria" and for the vehicle, industrial and human Rosebud parades, an event of extraordinary interest and one entirely unique in celebrations of this kind, will be staged during the coming Rose Festival. This will be a night conflagration in which an 8-story factory building occupying an entire city block will be theatrically destroyed by fire. This attractive feature will be in the nature of a drill for the Portland Fire Department and will be produced under the direction of a professional stage manager assisted by a large company of actors who will be scattered throughout the building when the torch is applied.

A general fire alarm will be turned in after the building has been treated with chemicals and other materials to give the proper fire effect and the full equipment of the fire department will respond. All the most modern fire fighting apparatus and the most effective life saving appliances will be brought into play during this spectacle. The structure which is to be "destroyed" is centrally located and it is estimated that fully 250,000 people will be able to see it from near-by points.

John Day Minerals.

The mineral resources of the John Day Valley are described in detail by Arthur J. Collier, of the University of Oregon, in "The Mineral Resources of Oregon," number three, just issued by the State Bureau of Mines and Geology. The article deals very largely with the coal deposits of the John Day and Heppner regions, and throws many interesting side lights on the geological formation of the great John Day fossil belt. Copies may be had by requesting them of Dean H. M. Parks, O. A. C., Corvallis, director of the Bureau of Mines.

Shearing Plant Closes.

The Whetstone shearing plant on Hinton creek, under the management of Guy Boyer, finished their run this week and closed on Tuesday. Sixteen shearers have been operating the plant for the greater part of the time but the past week there have been but thirteen on the job. The season has been a good one and band after band of sheep have been shorn of their wool and the average fleece has been excellent; perhaps from ten to twenty percent above what it was last season. The Boyer place presents a lively appearance while the shearing is on as it requires a small army of men to do the work.

Purchased Wool.

Thos. Ross last week purchased 400,000 pounds of wool from sheepmen at Heppner. He also bought 100,000 from sheepmen here in Umatilla county. The wool was bought for Crimmins & Pierce of Boston.

Mr. Ross also shipped three other cars of wool this week to the same firm.—Echo News.

Judge W. P. Dutton returned to his Portland home on Saturday. He had spent several days in Heppner putting through a real estate deal.

DON'T RAISE WEEDS!

USE A JONES WEEDER

Built in Morrow County

(Patented Dec. 16, 1913)

There has been a great need for a machine to cultivate summer-fallow that would do it thoroughly with the least possible loss of moisture and "do it quick."

We claim the Jones Weeder will do all of this and more. It can be used in as many sections as wanted, like a harrow. Four sections cut 18 feet 8 inches and pull no heavier than four sections of steel harrow.

The blades having a slope of 60° it will not choke under normal conditions.

I am now putting up 100 sections. Parties wanting this machine should send in their orders at once.

FOREST NOTES.

Angora goats have been used with profit to keep fire lines clear of inflammable vegetation on national forests in California.

Last year the fire loss on the Canadian timber reserves was the smallest ever known, only one-fiftieth of one per cent of the area being burned over.

Zentaro Kawase, professor of forestry at the imperial university of Tokio, Japan, has been making a tour of the national forests of this country to learn the government's methods of selling timber and of reforestation.

More than 858,000 young trees are being set out this spring on national forests in Utah and southern Idaho, and the season is reported as particularly favorable to their successful growth.

Armstrong lake, within the Bear-tooth national forest, Montana, is said to rival the famed Lake Louise of the Canadian Rockies. It lies at an elevation of 7,000 feet surrounded by towering mountains. A good road which can be traveled in half a day by automobile connects it with the railroad at Billings. A rustic hotel has recently been completed, and many trails make the surrounding region accessible.

The attention of sheepmen and camp tenders is called to the store at Lena. You can be well supplied in all your wants for canned goods and stock salt as this store will keep a good supply of these goods on hand during the summer. Save time and money by patronizing the Lena store, situated on the main trail to the summer ranges. m 14-1m.
