Mr. John Watt Says:

"I saw the oil continually running from three different places. The formation of the country, generally, is composed of black shale, sandstone and soapstone and in my opinion it will prove to be the richest oil field in America when developed.

W. Blakemore, Consulting Engineer, Victoria, B. C., Says:

"The results of such work as has been done justifies the conclusion that the FIRST COMPANY THAT STARTS OUT WITH SUFFICIENT CAPITAL, UNDER UNHAMPERED DIRECTION OF A COMPETENT OIL EXPERT AND GOOD MANAGEMENT, WILL SURELY MEET WITH A RICH REWARD.

The boring would probably have to be carried down 2,500 feet and possibly 3,000 feet but this presents no difficulties to adequate equipment and good management, and if the well is properly placed with regard to the anticlinal which is known to exist, the adventure may be regarded as an investment rather than a speculation."

E. J. Sinclair, Geologist and Oil Expert

who for some years has been associated with a number of the largest oil companies in the world, in speaking of oil in the Flathead Valley field, says: "But that it is there in commercial quantities can not be doubted after seeing the amount of gas and oil that is seeping up through the rocks, the oil seepage and the strong pressure in the two oil wells drilled by the British Columbia Oil, Coal and Development Co.

Our Holdings

Consist of 2000 acres of Selected drilling sites along the primary anticline in the Flathead Valley Oil Field—

These selections were made by Mr. James Fisher, who is probably the best informed man in the entire district, having spent over 12 years in prospecting in the Flathead Valley, together with Mr. Sinclair and other eminent geologists. Mr. Ralph Arnold, geologist of world repute, considered our locations to be very choice, and the company which depends on his knowledge and advivce has offered $110.00 per acre for our holdings. As soon as oil is struck at depth and in commercial quantities, which we expect in the near future, every acre owned by the company will be worth from $1,000.00 to $10,000.00 per acre, according to the amount of oil secured. In that event our stock would have a cash value of from $1.00 to $10.00 per share without any development on our part whatsoever. All the oil leases of this company are fully paid for in stock and the company does not owe one dollar for its holdings.

The Provincial Mineralogist, Mr. William Fleet Robertson

says, in speaking of the big oil seepage on Sage Creek, that "it is not a question of seepage out of any surface material, but of a spring coming up from the formation underlying the surface deposit and carrying oil.

E. I. Segur

a successful and practical California oil producer and refiner, says: "The seepages on Sage Creek are quite large, and the oil is very high in gasoline and illuminating oils; the lubricants are of high order, being almost equal to those of Franklin, Pa., which are the best-known lubricants today. From surface indications there are excellent reasons to believe that a flow of oil will be had at a reasonable depth in various parts of this district. I do not think that there is a more promising oil field today anywhere."

Other well-known geologists who have examined this field are: Ralph Arnold and Harry E. Johnson of California, eminent oil experts of world-wide reputation. These men have been very much impressed with the Flathead field, and Mr. Johnson quite recently had a party of twelve geologists in the field ostensibly taking geology. They have located every available fraction of land obtainable in the field.

FLATHEAD VALLEY OIL COMPANY

Capital $300,000

Fully Paid

2000 Acres Selected Drilling Sites.

WHY NOT IMPROVE YOUR POSITION IN LIFE?

THIS IS YOUR OPPORTUNITY! You cannot afford to loose this opportunity. We invite your thorough investigation.
