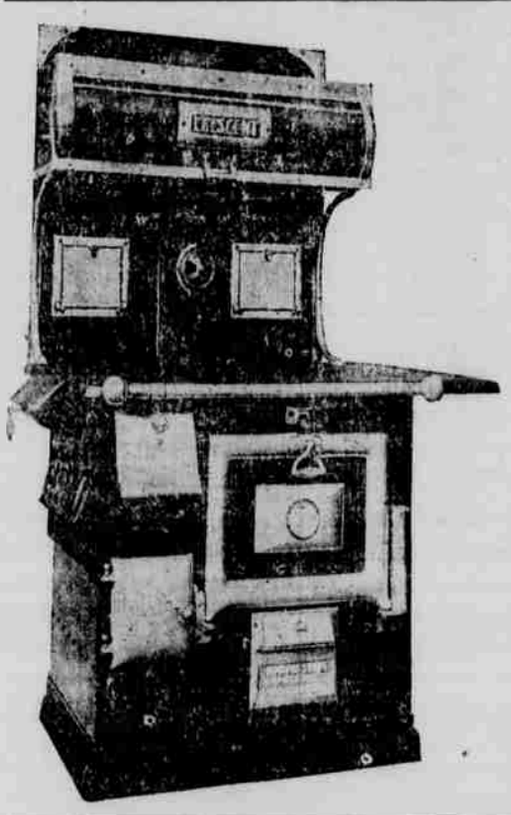
MINOR & CO.

There are 57 Reasons Why Your Next Range Should Be a

CRESCENT



The first Reason is because the Crescent is

"MADE IN OREGON"

The other 56 Reasons are Just as Good.

Guaranteed by the Manufacturer

BUILT IN THREE SIZES AND IN ANY STYLE TO SUIT THE TASTE OR REQUIREMENT

THE CRESCENT STEEL RANGE
For Wood or Coal

Sizes	Ovens	Top surface exclusive of end of shelf	Weight
8-14	14 x 19½ x 13½	27 x 30	370
8-16	16 x 19½ x 13½	27 x 30	385
8-18	18 x 19½ x 13½	27 x 34	400

Length of fire box, 24 inches.
From floor to top of Range, 30¾ inches.
From floor to top of High Closet, 58 inches.
Extreme height of Range, 63 inches.

THE CRESCENT NICKLE TRIMMINGS ARE THE FINEST EVER USED ON A STEEL RANGE AND POSSESS A WHITENESS AND BRILLIANCY THAT CANNOT BE EXCELLED.

Simplicity in design, correct proportioned fire box and flues with just the right amount of weight in all parts to endure the test of time has been the aim of the manufacturers.

WE COULD BUILD THEM CHEAPER BUT WE WON'T.

The fire box extension has been built for a purpose. It is the same width as the firebox and permits the use of long sticks of wood.

Ample provision has been made for the Water Coil.

THERE IS NOTHING HAPHAZARD ABOUT THE CONSTRUCTION OF THE CRESCENT RANGE. NOTHING UNTRIED.

Crescent Range Bodies are made from one sheet of heavy, cold rolled, Wellsville polished steel. There are no seams.

Triple walls are formed by an interlining of heavy asbestos board and steel plates, strongly rivited, this construction preventing radiation of heat and insuring durability.

CRESCENT RANGES ARE ECONOMICAL IN FUEL CONSUMPTION AND ARE EXCELLENT BAKERS.

There is but one sheet of heavy, cold rolled wrought steel in the Oven and the bottom is reinforced with three cast braces to prevent warping.

EVERY PART OF A CRESCENT RANGE IS ACCESSIBLE AND CAN BE KEPT CLEAN WITH A MINIMUM AMOUNT OF LABOR.

Crescent tops are so constructed that they will heat quickly and with a minimum amount of fuel, yet they are reinforced in such a way that they will not warp or crack.

CRESCENT RANGE CASTINGS ARE MADE OF THE FINEST GRADES OF IMPORTED PIG IRON.

A plain, smooth casting in keeping with the Crescent design. Very neat and easy to keep clean. Can be furnished in the plain casting or full Nickel Plated.

YOU SAVE FUEL AND LABOR WHEN YOU BUY A CRESCENT.

Has the latest approved type of coil. It has been demonstrated that water can be heated much quicker by this method than by the old style Cast water backs or fronts.

This double coil of one-half inch pipe extends the full length of the fire box and is supported by corrugations in both the front and back linings. It does not take up space in the fire box nor does it interfere with the baking qualities of the oven.

MEDIUM PRICED RANGE—GUARANTEED SATISFACTION. SOLD EXCLUSIVELY BY

CASE FURNITURE COMPANY

Agency for high grade Aluminum cooking utensils. They cost but little more
